NOTICE OF CERTIFICATE ISSUANCE

The attached certificate confirms the water right established under the terms of a permit issued by this department. The water right is now appurtenant to the specific place where the use was established as described by the certificate. The water right is limited to a specific amount of water, but not more than can be beneficially used for the purposes stated within the certificate.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within **60 days of the mailing date stated above** as specified by ORS 183.484(2).

This statement of judicial review rights is required under ORS 536.075; it does not alter or add to existing review rights or create review rights that are not otherwise provided by law.

Under ORS 537.260 and 537.270, a water right certificate may be contested before the Water Resources Department within three (3) months of the date it is issued. If a certificate is contested, the qualifying contestant shall be offered an administrative hearing.

Oregon law does not allow the Director to reissue a certificate because of a change in the ownership of the appurtenant place of use. The water must be controlled and not wasted. To change the location of the point of diversion, the character of use, or the location of use requires the advance approval of the Water Resources Director.

If any portion of this water right is not used for five or more consecutive years, that portion of the right may be subject to forfeiture according to ORS 540.610. Land enrolled in a Federal Reserve Program is not subject to forfeiture during the period of enrollment. Other exceptions to forfeiture are explained in ORS 540.610.

If you have any questions please contact Gerry Clark at 503-986-0811.

Thank you for your letter regarding an assignment of permit 47561.

We will be able to change our records to show you as holder of the permit if you will send us a copy the deed showing you as legal owner of the property in question. The statutory filing fee is \$10 for the first page of the deed to be filed and \$5 for each additional page.

The validity of the permit is questionable, however. Under the terms of the permit, adequate irrigation equipment was to have been on hand by October 1, 1985 and water from the spring used to the fullest extent intended up to 15 acres on or before October 1, 1986. We have not been advised as to whether or not these requirements were satisfied. The enclosed forms should be completed and sent to us along with the deed copy and fee at your earliest convenience.

If the terms were not met but some of the project watered. perhaps you could have the time limits of the permit extended. We will send you the application upon request.

In event nothing has been done, the permit should be canceled and the assignment not executed.

According to the terms of your Permit 47561, complete application of water was to have been made by October 1, 1986.

Complete application of water means the application of water to a beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If the water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of November 10, 1986.

Ors 537.360 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the Water Resources Director proof of completion of the appropriation as required by ORS 537.230 and 537.250, the Water Resources Director may, after 60 days notice by registered mail, order the cancellation of the permit"

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is recieved within 60 days from the date of this letter, the permit may be canceled without further notice.

If you are no longer interested in the project described by the permit, we would appreciate being advised. If the property involved has been sold and any part of the project was completed, you should assign the permit to the new owner. An assignment form will be furnished upon request.

If additional information is needed, please contact Ves Garner, Manager, Survey/Certificate Section.

Dear Mr. Thatcher:

REFERENCE: File 64998

Your Application 64998 describing the proposed use of 0.2 cubic foot per second of water from a spring-fed pond for irrigation of 15.0 acres, together with the map and legal description, has been reviewed.

Item 1 of your application mentions a pond. It appears that this pond is for pumping purposes only. However, if the pond is for storage of water for future use, then needed is a permit to store the water. Please give more details on the pond in Item 6 of the application.

It appears that the source of water for this application is the spring. Please amend Item 1 to state the spring as a source rather than the pond. If the pond stores water for future use, then both sources should be stated in Item 1. If the spring is in the pond, please state this in Item 2 of the application and on the map.

Please crosshatch the land to be irrigated on the map.

The metes and bounds legal description of the property where the water is to be used is needed to verify the place of use. This can be copied from your deed, title insurance policy, or sales contract.

I am returning your application and map for correction and completion. The application is endorsed so that in order to retain its priority date it must be received in this office on or before June 27, 1983.

Sincerely,

CHRIS L. HUGHES

Dear Mr. Thatcher:

REFERENCE: File 64998

We have received your application for use of water for irrigation along with the supporting data and fees. Our Receipt 35835 is enclosed. Your application has been filed and assigned number 64998.

Applications which are received in proper form for a permit, including maps, supporting data and fees, will be considered for approval shortly after the mandatory 30-day waiting period. Applications which are defective, conflict with existing rights or require additional information will be reviewed in detail and will be returned for completion or correction within 45 days.

If your application is approved, the project described in the application will be subject to the Water Policy Review Board's Basin Program statements, existing minimum flows and demands of prior rights during periods of low water.

Sincerely,

RALPH H. JACKSON, Supervisor
