Re: Ernest Bussman Water Right Applications R-73021, S-81718

Dear Michele:

Oregon Department of Fish and Wildlife (ODFW) conducted an onsite inspection of the above referenced reservoir site on July 26, 2013. No native fish are present at or upstream of the reservoir site.

Because no native fish are present ODFW has determined that fish screening, by-pass devices, and/or a fishway are not necessary for applications R-73021 or S-81718.

While onsite ODFW also conducted inspections of reservoir sites for applications R-79634/S-71131 and R72495/S72496. No native fish are present at either site and ODFW has determined that fish screening, by-pass devices, and/or fishways are not necessary for applications R-79634, S-71131, **R72495**, or S72496.

Please call if you have any questions.

Sincerely,

Todd Confer
District Fish Biologist

___15. The work remaining to be completed consists of: _____

___16. Progress in perfecting the permit is being held up by: _____

___17. Has the applicant pursued perfection of the right in good faith and with reasonable diligence? **Yes / No**

Some Factors that may be considered in determining "Reasonable Diligence" [OAR 690-315-040(3)]

- a. The amount of construction completed within the time allowed in the permit or previous extension;
- b. The amount of beneficial use made of the water during the permit or previous extension time limits;
- c. Water right permit holder conformance with the permit or previous extension conditions; and
- d. Financial investments made toward developing the beneficial water use.

___18. Determination of the market and the present demand for water or power to be supplied: _____

Some factors to consider in determining the Market and the Present Demand for water or power [OAR 690-315-040(4)]:

- a. The amount of water available to satisfy other affected water rights and scenic waterway flows;
- b. Special water use designations established since permit issuance (such as...state scenic waterways, federal wild and scenic rivers, serious water management problem areas, water quality limited sources, etc.);
- c. The habitat needs of sensitive, threatened or endangered species, in consultation with ODFW;
- d. Economic investment in the project to date;
- e. Other economic interests dependent on completion of the project; and
- f. Other factors relevant to the determination of the market and the present demand for water or power.

___19. Based on the written record, can the Department make a finding of "Good Cause" to approve the extension request?

Yes... "Good Cause" can be found. → Approval of Extension Request

No ... "Good Cause" cannot be found. → Denial of Extension Request

___20. Conditions to be included on Extension PFO: _____

owner of record, or duly authorized agent, of Application No. R-72495, Permit No. R-11810,
do hereby request that the time in which to:

- ☒ complete the construction of diversion/appropriation works and/or purchase and installation of the equipment necessary to the use of water, which time now expires on October 1, 2001, be extended to October 1, 2012,

and/or the time in which to:

- ☒ accomplish beneficial use of water to the full extent under the terms of the permit, which time now expires on October 1, 2001, be extended to October 1, 2012.

NOTE:

The extension of time requested should be long enough to finish the project.

Should this request be approved, it will be the Department's expectation that you will complete your project within the new time period allowed. Future extensions may not be granted.

Attached is an instruction sheet to assist you in completing the information on the permit extension application form. Oregon Water Law and Administrative Rules requires this information to be considered by the Water Resources Department when reviewing a permit extension application. All items must be completed or the application will be returned. Please feel free to provide the Department with any additional information that would aid us in making our decision. Please use additional sheets of paper as needed to fully respond to the questions.

After reviewing the application form and the instruction sheet, if you have any questions, you may contact the Department at (503) 378-3739, and request assistance from the Water Rights Division, permit extensions personnel.

RECEIVED

MAR 28 2003

WATER RESOURCES DEPT.
SALEM, OREGON

1. Did water system construction/well drilling begin within the time specified in the permit [yes/no]?

Yes.

2. Has construction of diversion/appropriation works, distribution system, and use of water, if any, been accomplished consistent with the limitations and conditions of this permit [yes/no]?

Yes, we have complied with permit conditions.

- A) Please describe how you have complied with each applicable permit condition (**NOTE: the instruction sheet for permit extension applications provides some direction as to what is an "applicable" condition at time of permit extension review**).

Reservoir construction was started in the summer of 1998. The reservoir has been constructed and the pump is purchased. No pipe has been installed.

- B) If you have not complied with all applicable conditions, please explain the reasons why and indicate a date certain, in the near future, by which time you will be in compliance with applicable conditions.

All of the permit conditions for R-11810 will be complied with at the time of project completion.

3. I have accomplished the following described works, purchases and installation of equipment necessary to the use of water under said permit:

- A) Within the past year or, if a prior extension was authorized, during the last permit extension period:

Pipe has been purchased to connect the reservoir with the place of use.

- B) Prior to the past year or, if a prior extension was authorized, prior to the last extension period:

Excavation of the reservoir and purchasing of the reservoir pump.

4. I have accomplished beneficial use of water under the permit to the extent of (amount of water used and acres irrigated):

A) Quantity of Water Used [*in cubic feet per second (cfs) or gallons per minute (gpm) if using surface water or ground water.....and/or..... in acre-feet (af) if using stored water*]:

None at this time.

B) Number of Acres Irrigated (*if an irrigation permit*):

None at this time.

5. Cost of project to date \$40,000.00. Estimated remaining cost to complete the project \$7,500.00.

6. Please list the reasons why the project was not constructed, and/or water not beneficially used within permit time limits under the appropriate categories below. Please provide supporting information for each reason identified:

A) The project is of a size and scope that the original intent was to phase it in over a period longer than the timeframes allowed in the permit.

N/A

- B) Financing and/or cash-flow needs to develop the project precluded completion of the project within authorized timeframes.

Due to reduced cash flow caused by the collapse of the cranberry market, the project has been slowed but not abandoned.

- C) Good faith attempts to comply with permit conditions and/or to acquire permits from other agencies, or otherwise comply with government regulations, delayed completion of the project.

No.

- D) Acts of God or other unforeseen events delayed full development of the water system and use of water.

I am the permittee, or have authorization from the permittee, to apply for an extension of time under this permit. I understand that false or misleading statements in this extension application are grounds for the Department to suspend processing of the request and/or reason to deny the extension.

SALEM, OREGON

STATE OF OREGON

COUNTY OF CURRY

PERMIT TO STORE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

JAMES A BUSSMANN
PO BOX 211
SIXES, OREGON 97476

(541) 332-6611

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: R-72495

SOURCE OF WATER: AN UNNAMED STREAM, A TRIBUTARY OF SIXES RIVER

STORAGE FACILITY: BUSSMANN #1 RESERVOIR

PURPOSE OR USE OF THE STORED WATER: TO BE APPROPRIATED UNDER APPLICATION S-72496, PERMIT 52322, FOR CRANBERRY OPERATIONS.

VOLUME OF USE: 2.07 ACRE-FEET EACH YEAR

PERIOD OF ALLOWED USE: WATER MAY BE APPROPRIATED FOR STORAGE FROM DECEMBER 1 THROUGH APRIL 30

DATE OF PRIORITY: JUNE 29, 1992

The area submerged by the reservoir, when full, will be 0.5 acre and the maximum depth of water will be 20.0 feet. The maximum height of the dam shall not exceed 9.0 feet.

DAM LOCATION: NW 1/4 SW 1/4, SECTION 4, T32S, R15W, W.M.; 700 FEET SOUTH AND 1220 FEET EAST FROM THE W 1/4 CORNER OF SECTION 4

THE AREA TO BE SUBMERGED BY THE RESERVOIR IS LOCATED AS FOLLOWS:

NW 1/4 SW 1/4
SECTION 4
TOWNSHIP 32 SOUTH, RANGE 15 WEST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

The permittee shall install, maintain, and operate fish screening to prevent fish from entering the proposed diversion. The permittee shall also install a fishway at the obstruction that will provide adequate upstream and downstream passage for fish. The required screens and fishways are to be in place, functional, and approved by Oregon Department of Fish and Wildlife before diversion of any water.

Before water use may begin under this permit, a staff gage that measures the entire range and stage between full reservoir level dead pool storage must be installed in the reservoir. The staff gage shall be United States Geological Survey style porcelain enamel iron staff gage style A, C, E, I or M. Additionally, before water use may begin under this permit, if the reservoir is located in channel then weirs must be installed upstream and downstream of the reservoir, and, a gated valve outlet must be installed. A written waiver may be obtained from the local Watermaster if in his judgement the installation of the weir(s) will provide no public benefit.

STANDARD CONDITIONS

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction work shall begin within one year from permit issuance and shall be completed on or before October 1, 1998. The reservoir shall be filled and complete application of the water to the use shall be made on or before October 1, 1999.

Issued May 28, 1996

Martha O. Page, Director
Water Resources Department

Oregon Water Resources Department
Water Rights Division

Water Rights Application
Number R 72495

Final Order
Extension of Time for Permit Number R 11810

Application History

On OCTOBER 5, 1999, JAMES BUSSMAN submitted an application to the Department for an extension of time for permit number R 11810. The Department issued Permit number R 11810 on MAY 28, 1996. The permit called for completion of construction of the water development project by October 1, 1998 and complete application of water to the full beneficial use by October 1, 1999. In accordance with OAR 690-320-0010(8), on NOVEMBER 2, 1999, the Department issued a Proposed Final Order proposing to extend the time to complete development of the water development project to October 1, 2001, and/or the time to fully apply water to beneficial use to October 1, 2001. The protest period closed DECEMBER 17, 1999. No protest was filed.

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.230, 537.248, 537.630 and 539.010(5) (as appropriate).

Order

The extension of time for Application R 72495, Permit Number R 11810, therefore, is approved. The deadline for completing construction is extended to October 1, 2001. The deadline for applying water to full beneficial use is extended to October 1, 2001.

DATED September 18, 2000

Paul R. Cleary, Director

Appeal Rights

Under the provisions of ORS 536.075, the applicant may appeal this order by filing a petition for review in the Circuit Court for Marion County or the circuit court for the county in which the applicant resides or has a principal business office. The petition for review must be filed within 60 days after the date this order is served. ORS 183.484.

**Oregon Water Resources Department
Water Rights Division**

Water Right Permit Extension Application
for Permit Number R 11810

Water Right Application Number R 72495

Proposed Final Order

This Proposed Final Order applies only to permit number R 11810.

Summary of Recommendation

The Department proposes to:

grant the extension for complete construction of the water system from October 1, 1998 to October 1, 2001, and

grant the extension for complete application of water from October 1, 1999 to October 1, 2001.

Application History

Permit no. R 11810 was granted by the Water Resources Department on MAY 28, 1996. The permit authorizes use of 2.07 ACRE-FEET of water from UNNAMED STREAM for STORAGE FOR CRANBERRY USE in the SIXES RIVER basin. It specified that construction must be completed by October 1, 1998, and water applied to full beneficial use by October 1, 1999. A copy of permit no. R 11810 is attached.

On OCTOBER 5, 1999, the Department received an application from JAMES BUSSMAN for an extension of time to complete construction and to apply water to full beneficial use. The applicant has requested until October 1, 2001 to complete construction of the water system and to apply water to full beneficial use. This is the first permit extension request.

Findings of Fact

ORS 537.230(2) and 537.630 (1) allows the Department to grant an extension of time to perfect a water right for good cause. In evaluating good cause, the Department has considered the written record in the permit application file in relation to the requirements of ORS 537.230(2), ORS 537.630 (1) and ORS 539.010(5) and makes the following findings.

1. The applicant is legally entitled to apply for an extension on this permit.
2. The applicant has submitted a completed permit extension form and the required fee.
3. The water project development made to date has been accomplished in accordance with the terms and conditions contained in the permit.
4. Progress in perfecting the permit is being held up by reduced cash flow. The market price of cranberries has dropped, which has reduced available money.
5. The applicant has pursued perfection of the right in good faith and with reasonable diligence.
 - a) Work on the water development project completed to date includes construction of the reservoir and installation of pump. Water has not yet been diverted to the pond.
 - b) The applicant has invested approximately \$ 40,000 of an estimated total water system project cost of \$ 47,500.
 - c) The work remaining to be completed consists of the remaining construction of the water delivery system and complete application of water.
6. Based on the written record, the Department finds there is good cause to approve the extension request. The applicant has pursued perfection of the right in good faith and with reasonable diligence.
7. Due to the reasons outlined above in item 4 and the water development progress to date, the Department finds that the length of time requested for completion of construction and the length of time requested for completion of the application of water should be extended to October 1, 2001 as requested by the applicant.

Conclusions of Law

1. The applicant is entitled to apply for an extension of time to complete construction and/or completely apply water to the full beneficial use pursuant to ORS 537.230, and ORS 537.630.
2. The applicant has submitted an extension application form and the fee required by ORS 536.050(1)(L).
3. The applicant has pursued perfection of the right in good faith and prosecuted construction with reasonable diligence.
4. The applicant has shown good cause for the untimely completion of the water development project and complete application of water to full beneficial use pursuant to ORS 537.230(2), and ORS 537.630 (1).
5. The permit extension should be approved until October 1, 2001 to complete construction and until October 1, 2001 to complete the application of water.

Recommendation

The Department proposes to issue an order to:

extend the permit time to complete construction from October 1, 1998 to October 1, 2001 and

extend the permit time to complete application of water from October 1, 1999 to October 1, 2001.

DATED: ~~NOVEMBER 2, 1999~~

Dwight French

Protest Rights and Comments

1. Under the provisions of OAR 690-320-0010(8) you have the right to protest this proposed final order. Your protest must be in writing and must include the following:
 - a) Your name, address and telephone number;
 - b) Your interest in this proposed final order, and if you claim to represent the public interest, a precise statement of the public interest represented;
 - c) A detailed description of how the action in the proposed final order would impair or be detrimental to your interest;
 - d) A detailed description of how the proposed final order is in error or deficient and how to correct the alleged error or deficiency;
 - e) Any citation of legal authority supporting your protest, if known; and
 - f) The \$25 protest fee required under ORS 536.050 (1)(j).
2. Each person submitting a protest shall raise all reasonably ascertainable issues and all reasonably available arguments supporting the person's position by the close of the comment period.
3. The Water Resources Department must receive written protests or written comments no later than **DECEMBER 17, 1999**.
4. After the close of the comment and protest period, the Director will either issue a final order, or schedule a contested case hearing if the Director finds there are significant disputes related to the use of water.

This document was prepared by Dallas Miller. If you have any questions about any of the statements contained in this document I am most likely the best person to answer your questions. You can reach me toll free within Oregon at 1-800-624-3199 extension 272.

Outside of Oregon you can dial 1-503-378-8455.

If you have questions about how to file a protest or if you have previously filed a protest and want to know the status, please contact Adam Sussman. His extension number is 262.

If you have other questions about the Department or any of its programs please contact our Water Rights Information Group at extension 499. Address all other correspondence to: Water Rights Section, Oregon Water Resources Department, 158 12th ST. NE Salem, OR 97310, Fax: (503)378-2496.

**APPLICATION FOR EXTENSION OF TIME
TO THE WATER RESOURCES DIRECTOR OF OREGON**

I, JAMES A. BUSSMANN
NAME

P.O. Box 211 SIXES OR 97476(541) 332-8006
ADDRESS CITY STATE ZIP PHONE

owner of record, or duly authorized agent, of Application No. R-22495, Permit No. R-11810, do hereby request that the time in which to:

☐ complete the construction of diversion/appropriation works and/or purchase and installation of the equipment necessary to the use of water, which time now expires on October 1, _____, be extended to October 1, _____,

and/or the time in which to:

☒ accomplish beneficial use of water to the full extent under the terms of the permit, which time now expires on October 1, 1999, be extended to October 1, 2000.

NOTE: The extension of time requested should be long enough to finish the project. Should this request be approved, it will be the Department's expectation that you will complete your project within the new time period allowed. Future extensions may not be granted.

Attached is an instruction sheet to assist you in completing the information on the permit extensions application form. Oregon Water Law and Administrative Rules requires this information to be considered by the Water Resources Department when reviewing a permit extension. All items must be completed or the application will be returned. Please feel free to provide the Department with any additional information that would aid us in making our decision. Please use additional sheets of paper as needed to fully respond to the questions.

After reviewing the application form and the instruction sheet, if you have any questions, please contact the Department at 1-800-624-3199, or locally in the Salem vicinity at (503) 378-3739, and request assistance from the Water Rights Division, permit extensions personnel.

1-Did water system construction/well drilling begin within the time specified in the permit [yes/no]?
yes

2-Has construction of diversion/appropriation works, distribution system, and use of water, if any, been accomplished consistent with the limitations and conditions of this permit [yes/no]? yes

Ab ✓

A) Please describe how you have complied with each applicable permit condition (NOTE: the instruction sheet for permit extension applications provides some direction as to what is an "applicable" condition at time of permit extension review).

THE RESERVOIR
HAS BEEN CONSTRUCTED. THE PUMP HAS BEEN INSTALLED AT
THE POINT OF DIVERSION.

B) If you have not complied with all applicable conditions, please explain the reasons why and indicate a date certain, in the near future, by which time you will be in compliance with applicable conditions.

PERMIT CONDITIONS LIMIT PERIOD OF USE FOR PERMIT 52322
DECEMBER 1 THROUGH APRIL 30. COMPLIANCE WILL BE COMPLETED
BY APRIL 30, 2000

3-I have accomplished the following described works, purchases and installation of equipment necessary to the use of water under said permit:

A) Within the past year or, if a prior extension was authorized, during the last permit extension period:

B) Prior to the past year or, if a prior extension was authorized, prior to the last extension period:

C) I have accomplished beneficial use of water under the permit to the extent of (amount of water used or acres irrigated):

4-Cost of project to date \$40,000. Estimated remaining cost to complete the project \$7,500.

5-Please list the reasons why the project was not constructed, and/or water not beneficially used within permit time limits under the appropriate categories below. Please provide supporting information for each reason identified.

A) The project is of a size and scope that the original intent was to phase it in over a period longer than the timeframes allowed in the permit. _____

B) Financing and/or cash-flow needs to develop the project precluded completion of the project within authorized timeframes. DUE TO REDUCED CASH FLOW THE PROJECT WAS SLOWED.

C) Good faith attempts to comply with permit conditions and/or to acquire permits from other agencies, or otherwise comply with government regulations, delayed completion of the project.

D) Acts of God or other unforeseen events delayed full development of the water system and use of water. _____

6-Please identify the economic market or markets to which beneficial use of water under the permit is responding. CRAWBERRIES

A) Has there been any change in this market since the permit was issued? THE PRICE PER POUND OF CRANBERRIES HAS DROPPED 50-60¢/LB

B) Have these changes, if any, affected the economic feasibility of your project? THESE CHANGES HAVE SLOWED BUT NOT STOPPED THE PROJECT.

7-Are there other present competing demands for water in your community? NONE OTHER THAN THE ONES EXISTING WHEN THE PERMIT WAS ISSUED.

A) Has there been any change in these demands for water since the permit was issued? NO!

B) Are you aware of alternative sources of water that may be able to satisfy the competing demands? NO!

C) Are you aware of any adverse affects on your source of water that may have been caused by recent changes in use of water in your community? NO!

8-Will the income or use from the water development project authorized by this permit provide reasonable returns against the investment in the project? YES !

9-If the extension request is denied, is the current level of water use economically feasible?

NO!

I am the permittee, or have authorization from the permittee, to apply for an extension of time under this permit. I understand that false or misleading statements in this extension application are grounds for the Department to suspend processing of the request and/or reason to deny the extension.

STATE OF OREGON

COUNTY OF CURRY

PERMIT TO STORE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

JAMES A BUSSMANN
PO BOX 211
SIXES, OREGON 97476

(541) 332-6611

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: R-72495

SOURCE OF WATER: AN UNNAMED STREAM, A TRIBUTARY OF SIXES RIVER

STORAGE FACILITY: BUSSMANN #1 RESERVOIR

PURPOSE OR USE OF THE STORED WATER: TO BE APPROPRIATED UNDER APPLICATION S-72496, PERMIT 52322, FOR CRANBERRY OPERATIONS.

VOLUME OF USE: 2.07 ACRE-FEET EACH YEAR

PERIOD OF ALLOWED USE: WATER MAY BE APPROPRIATED FOR STORAGE FROM DECEMBER 1 THROUGH APRIL 30

DATE OF PRIORITY: JUNE 29, 1992

The area submerged by the reservoir, when full, will be 0.5 acre and the maximum depth of water will be 20.0 feet. The maximum height of the dam shall not exceed 9.0 feet.

DAM LOCATION: NW 1/4 SW 1/4, SECTION 4, T32S, R15W, W.M.; 700 FEET SOUTH AND 1220 FEET EAST FROM THE W 1/4 CORNER OF SECTION 4

THE AREA TO BE SUBMERGED BY THE RESERVOIR IS LOCATED AS FOLLOWS:

NW 1/4 SW 1/4
SECTION 4
TOWNSHIP 32 SOUTH, RANGE 15 WEST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

The permittee shall install, maintain, and operate fish screening to prevent fish from entering the proposed diversion. The permittee shall also install a fishway at the obstruction that will provide adequate upstream and downstream passage for fish. The required screens and fishways are to be in place, functional, and approved by Oregon Department of Fish and Wildlife before diversion of any water.

Before water use may begin under this permit, a staff gage that measures the entire range and stage between full reservoir level dead pool storage must be installed in the reservoir. The staff gage shall be United States Geological Survey style porcelain enamel iron staff gage style A, C, E, I or M. Additionally, before water use may begin under this permit, if the reservoir is located in channel then weirs must be installed upstream and downstream of the reservoir, and, a gated valve outlet must be installed. A written waiver may be obtained from the local Watermaster if in his judgement the installation of the weir(s) will provide no public benefit.

STANDARD CONDITIONS

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction work shall begin within one year from permit issuance and shall be completed on or before October 1, 1998. The reservoir shall be filled and complete application of the water to the use shall be made on or before October 1, 1999.

RE: Follow-up on Protested Water Right Applications Previously
Scheduled for Hearing November 18, 1996.

Dear Ron:

I wanted to touch base with you on the protests scheduled for
hearing November 18, 1996, and still unresolved. Your clients with
unresolved protests are:

S-69980 and R-69989 (Gardner), S-69537 (Stolz), S-72496
(Bussman), and S-72420 (Watson Escola).

- 1) Gardner - My understanding is, and I think you agree, that
these applications need to be set for hearing. Although these
two files went through the inter-agency review process,
fishery concerns have been expressed throughout the history of
these application.

My intention with these two files is to request the Hearings
Officer set them up for hearing for July or August. Please let
me know if you disagree.

- 2) Stolz - I plan to take another run at settlement on this
application this month. Similar to Gardner, fishery concerns
on the Stoltz application are not new. I'm hopeful we can
reach a reasonable agreement without a hearing.
- 3) Bussman - In our last conversation on this application you
indicated that a well might be drilled to resolve this
protest. Please provide me with some specifics
such as a well log (if already drilled) or proposed
location, depth etc. Once I get this type of material
I can explore settlement options.

Commerce Building
158 12th Street NE
Salem, OR 97310-0210
(503) 378-3739
FAX (503) 378-8130

- 4) Watson Escola - It is my understanding that you have contacted WaterWatch about their protest on this application. Is there possibility of settlement? Please let me know the status of the negotiations if any and if this matter should be set for hearing.

Please feel to contact me at (503) 378-8455 ex. 262 to discuss any of these cases further.

Sincerely,

Adam Sussman
Program Analyst and
Department Representative

S72496, S73251, S71837 & R71840		

TO: The parties addressed as shown on the attached Certificate of Service

Hearings Rescheduled to New Date and Time

Pursuant to the request made by the Water Resources Department, the contested case hearings on the above-listed applications are hereby POSTPONED.

All hearings on all the applications listed above are consolidated and are RESCHEDULED for the week of November 18, 1996. The hearing will be held in Room 216 of the Douglas County Courthouse in Roseburg, Oregon, before Weisha Mize, Administrative Law Judge. The hearing will commence at 1 p.m. on Monday, November 18, recess at 5:00 p.m. and reconvene at 9:00 a.m. the following day.

The hearings on the applications listed above are being consolidated as they share the common issues of the review by the interagency team and restrictions placed on the proposed use as a result of that review.

The Water Resources Department will present its case first. Ron Yockim, Attorney at law, representing the applicants for applications S71884, S72605, S73096, S74037, S74489, S69980 & R69989, will present the case on behalf of these applicants, followed by Steven Mountainspring, legal counsel presenting the applicants on applications S73073, S73853 and S73313, and Gary Hill, legal counsel for the applicant on application S72636. The individual unrepresented applicants will then present their cases in the order set out in the above case caption and attached certificate of service.

Prehearing telephone conference call

A prehearing conference will be conducted by telephone on October 29th, using Oregon's Meet Me Teleconferencing system. The prehearing conference will begin at 1:30 p.m. and must conclude no later than 3:30 p.m. To participate, parties must call 1-503-378-3333 no earlier than 1:30 p.m. As there are a maximum of 20 ports (in-coming lines) available through this system, applicants on applications S69537, S73065, S71883 & R73469, S72496, and S73251 in the south coast area will be connected through an ATT conference operator.

The purpose of the prehearing conference call will be to discuss and establish clear procedures and guidelines for the consolidated hearing, including order of presentation and time requirements; to identify, simplify and clarify issues; to specify matters on which judicial notice may be taken; to obtain stipulations of fact; and to discuss settlement or other resolution or partial resolution of the cases.

Department Representative

The Department has provided notice that it will be represented in this matter by Melinda Bruce, Assistant Attorney General, Department of Justice. Assisting Ms. Bruce will be Paul Conable, law clerk, and Adam Sussman, lay representative for the Department.

Any witness lists, copies of proposed exhibits, motions, pleadings or other filings to be served on the Department should be directed to Melinda Bruce at the address set out in the attached certificate of service.

DATED this 26th day of August, 1996.

A handwritten signature in black ink, appearing to read 'Weisha Mize', is written over a faint, circular official seal.

Weisha Mize
Administrative Law Judge

Certificate of Service

I certify that on August 26, 1996, I hand-delivered a copy of this Notice of Hearing in a sealed envelope to the office of Melinda Bruce, Assistant Attorney General; Oregon Dept. of Justice; 100 Justice Building, Salem, OR 97310; and mailed, first-class postage prepaid, a copy of this Notice and the agency's file to:

Oregon Water Resources Department
Water Rights Division

Water Rights Application
Number R-72495

Final Order

Application History

On June 29, 1992, JAMES A BUSSMANN submitted an application to the Department for a water use permit. The Department issued a Proposed Final Order on December 12, 1995. The protest period closed January 26, 1996, and no protest was filed.

An interagency team reviewed this proposed use for potential adverse impacts on declining fish populations. This team consisted of representatives from the Oregon Departments of Water Resources (WRD), Environmental Quality, Fish and Wildlife (DFW), and Agriculture. WRD and DFW representatives included both technical and field staff. The interagency team recommended that additional limitations or conditions of use be imposed on this application as follows:

The period of use for storage has been limited to DECEMBER 1 THROUGH APRIL 30.

Before water use may begin under this permit, a staff gage that measures the entire range and stage between full reservoir level dead pool storage must be installed in the reservoir. The staff gage shall be United States Geological Survey style porcelain enamel iron staff gage style A, C, E, I or M. Additionally, before water use may begin under this permit, if the reservoir is located in channel then weirs must be installed upstream and downstream of the reservoir, and, a gated valve outlet must be installed. A written waiver may be obtained from the local Watermaster if in his judgement the installation of the weir(s) will provide no public benefit.

The proposed use would not impair or be detrimental to the public interest, but the Department's continuing evaluation reveals that the Proposed Final Order requires modification to include the condition(s) described above.

Order

Application R-72495 therefore is approved with the above modifications to the Proposed Final Order, and Permit Number R-11810 is issued as limited by the conditions set forth in the permit.

DATED May 28, 1996

Martha O. Page
Director

Hearing and Appeal Rights

Under the provisions of ORS 537.170, the applicant may request a contested case hearing by submitting the information required for a protest under ORS 527.153(6) to the Department within 14 days after this order is issued. If a contested case hearing is requested, the Department must schedule one. In the contested case hearing, however, only those issues based on the above modifications to the proposed final order may be addressed.

Under the provisions of ORS 183.484, the applicant or any person having standing may appeal this order by filing a petition for review in the Circuit Court for Marion County or the circuit court for the county in which the applicant resides or has a principal business office. The petition for review must be filed within 60 days after the date this order is served.

STATE OF OREGON
WATER RESOURCES DEPARTMENT
WATER RIGHTS DIVISION

Before the Director of the Water Resources Department

In the matter of	)	PROPOSED
Reservoir Application	)	FINAL
R-72495 submitted by	)	ORDER
JAMES A BUSSMANN		

FINDINGS OF FACT

Water Use Request

1. JAMES A BUSSMANN requested to construct BUSSMANN #1 RESERVOIR and to store the waters of AN UNNAMED STREAM, A TRIBUTARY OF SIXES RIVER, to be appropriated under Application S-72496, for CRANBERRY OPERATIONS, within the South Coast Basin.
2. The amount of water requested for storage each year is 2.07 ACRE- FEET.
3. The area to be submerged by the reservoir is located in Curry County within SECTION 4, TOWNSHIP 32 SOUTH, RANGE 15 WEST, W.M.
4. The total area proposed to be submerged by the reservoir, when full, is 0.5 acres; the proposed maximum depth of water is 20.0 feet. The maximum height of the dam will not exceed 9.0 feet.
5. The request was made in Application R-72495 which was received by the Water Resources Department on June 29, 1992.

Affected Waters

1. AN UNNAMED STREAM, A TRIBUTARY OF SIXES RIVER, is not within or above a State Scenic Waterway.
2. ODFW has advised that one or more species of game fish are present at the described dam location and point of diversion and requires applicant to provide fish screening pursuant to ORS 498.248.
3. There are senior water rights on AN UNNAMED STREAM, A TRIBUTARY OF SIXES RIVER, and on downstream waters.

Department Actions

1. The application was determined to be complete and not defective.
2. A technical review of the application was completed and a report of the results of that review was mailed to the applicant on March 9, 1994.

3. The technical review determined:
 - a. CRANBERRY OPERATIONS is allowed under the South Coast Basin Program [OAR 690-517-001(8)].
 - b. The use is not prohibited by Statute.
 - c. Water is available for storage (at a 50 percent exceedance probability) for the period NOVEMBER 1 THROUGH JUNE 30.
 - d. The use would not injure existing water rights.
4. The report of technical review listed these determinations and disclosed a number of conditions and restrictions that would likely be included in the permit if issued. These conditions and restrictions are listed in the attached draft permit.

Assessment

1. In proceeding with evaluation of Application R-72495, the following criteria were found to be relevant by the Department.
 - a. The South Coast Basin Program [OAR 690-517-001(8)]
 - b. The Curry County Comprehensive Plan and Zoning Ordinance
 - c. Dam Construction Standards (OAR Chapter 690, Division 20)
 - d. The amount of water available in AN UNNAMED STREAM, A TRIBUTARY OF SIXES RIVER
 - e. Pending, senior applications and existing water rights of record
 - f. Comments received

CONCLUSIONS OF LAW

1. Based upon continued evaluation, the Department finds the determinations of the technical review remain valid.
2. Based on comments and data received, the Department has determined that the proposed use can be allowed as conditioned. The Department has further determined that, to protect the resource, an additional condition on the proposed water use is necessary. The condition, as further described on the attached draft permit, would require fish screening.
3. Period of allowed use: CONSTRUCT RESERVOIR AND STORE WATER FROM NOVEMBER 1 THROUGH JUNE 30.
4. The Department finds that no more than 2.07 ACRE-FEET would be necessary for CRANBERRY OPERATIONS. The amount of water requested, 2.07 ACRE-FEET, is allowable for the proposed use.
5. Curry County Planning Department staff completed the Department's Land Use Information Form and indicated thereon that the land use associated with the proposed use is compatible with the Curry County Comprehensive Land Use Plan.

6. The proposed use would not conflict with existing water rights, and, if exercised in accordance with law, rule, and proposed conditions, would not result in injury to existing water users.
7. The proposed use complies with all other rules of the Commission.
8. Pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly, and given the findings listed above, a rebuttable presumption has been established that the use will not impair or be detrimental to the public interest if exercised in the manner described in the attached draft permit.
9. Therefore, the proposed use, as conditioned, and described in the attached draft permit, would not impair or be detrimental to the public interest.

PROPOSED ORDER

IT IS PROPOSED that Application R-72495 in the name of JAMES A BUSSMANN be approved for STORAGE OF 2.07 ACRE-FEET OF WATER, TO BE APPROPRIATED UNDER APPLICATION S-72496 FOR CRANBERRY OPERATIONS, as provided in the attached draft permit.

DATED December 12, 1995

Steven D. Applegate
Administrator
Water Rights and Adjudications Division

NOTICE:

This Proposed Final Order is issued by the Department pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly.

To seek changes in this proposed final order, you must file a formal protest.

Formal protests to this proposed final order must be made in proper form and accompanied by the statutory fee in the amount of \$200. Note: The applicant is not subject to this fee.

For other than the applicant, if you agree with the findings in this proposed order, but wish to maintain your right to participate in any contested case proceeding or judicial review, you must file a written request for standing. Requests for standing in proceedings relating to this application must be made in the proper form and accompanied by the statutory fee in the amount of \$50.

Protests or requests for standing, along with the appropriate fees must be received by the Water Resources Department in Salem, Oregon by 5:00 pm on January 26, 1996.

Only the applicant and any persons who timely file a protest or request for standing may participate in further proceedings before the Department or the Commission which deal with this Application.

DRAFT
STATE OF OREGON
COUNTY OF CURRY

DRAFT PERMIT TO STORE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

JAMES A BUSSMANN
PO BOX 211
SIXES, OREGON 97476

(503)332-6611

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: R-72495

SOURCE OF WATER: AN UNNAMED STREAM, A TRIBUTARY OF SIXES RIVER

STORAGE FACILITY: BUSSMANN #1 RESERVOIR

PURPOSE OR USE OF THE STORED WATER: CRANBERRY OPERATIONS

PURPOSE OR USE OF THE STORED WATER: TO BE APPROPRIATED/MAINTAINED UNDER APPLICATION S-72496 FOR CRANBERRY OPERATIONS.

VOLUME OF USE: 2.07 ACRE-FEET EACH YEAR

PERIOD OF ALLOWED USE: WATER MAY BE APPROPRIATED FOR STORAGE FROM NOVEMBER 1 THROUGH JUNE 30

DATE OF PRIORITY: JUNE 29, 1992

The area submerged by the reservoir, when full, will be 0.5 acre and the maximum depth of water will be 20.0 feet. The maximum height of the dam shall not exceed 9.0 feet.

DAM LOCATION: SW 1/4 NW 1/4, SECTION 4, T32S, R15W, W.M.

THE AREA TO BE SUBMERGED BY THE RESERVOIR IS LOCATED AS FOLLOWS:

SW 1/4 NW 1/4
SECTION 4
TOWNSHIP 32 SOUTH, RANGE 15 WEST, W.M.

Measurement recording and reporting conditions:

- A. The Director may require the permittee to install a meter or other suitable measuring device as approved by the Director. If the Director notifies the permittee to install a meter or other measuring device, the permittee shall install such device within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period. Once installed, the permittee shall maintain the meter or measuring device in good working order and shall allow the watermaster access to the meter or measuring device. The Director may provide an opportunity for the permittee to submit alternative measuring procedures for review and approval.
- B. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

The amount of water diverted for CRANBERRY OPERATIONS, together with amounts secured under any other rights existing for the same lands, is limited as follows: For temperature control, 0.15 cubic foot per second per acre; For flood harvesting or pest control, 0.05 cubic foot per second per acre; For irrigation of cranberries, ONE-FORTIETH of one cubic foot per second and 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. For the irrigation of any other crop, ONE-EIGHTIETH of one cubic foot per second and 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The permittee shall install, maintain, and operate fish screening and by-pass devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. The required screen is to be in place and functional prior to diversion of any water.

The water user shall install and maintain, both upstream and downstream of the reservoir, a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

STANDARD CONDITIONS

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction work shall begin within one year from permit issuance and shall be completed on or before October 1, 1997. The reservoir shall be filled and complete application of the stored water to the use shall be made on or before October 1, 1998.

do hereby make application for a permit to construct the Bussmann #1 reservoir

and to store the unappropriated waters of the State of Oregon, subject to existing rights.

1. The name of the stream from which the reservoir is to be filled is unnamed

tributary to Sixes River

2. If not in channel of a stream, state how it is to be filled. in channel

3. The dam will be located in the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 4

Township 32 S, Range 15W, W. M.

4. The maximum height will be 9.0 feet above stream bed or ground surface at the

centerline. The top width will be 20' feet, slope of upstream face 3:1

slope of downstream face 2:1, and height of dam above water line when full

2.5' feet.

5. The dam will be (check one) X earthfill, concrete, flashboard, other.

If "other", give description:

6. Give the location, description, and dimensions of the outlet conduit: centerline of the dam at

natural stream level will be a 36"x45' CMP having a flashboard style

outlet.
(All dams across natural stream channels must be provided with an outlet conduit, of such capacity and location to pass the normal flow of the stream at any time)

Application No.....

Permit No.....

7. The impounded water will be used for..... 28 acres of cranberry production.....

8. The amount of water to be stored is..... 2.07..... acre feet.

9. The area submerged by the reservoir, when full, will be..... 0.50..... acres,
and the maximum depth of water will be 20..... feet.

10. Give the location and dimensions of the spillway 2.5' below the surface of the.....
dam will be a 24" x 27' cmp. (State whether over or around dam)

The bottom width of the spillway, B, will be n/a..... feet.

The top width of the spillway, T, will be n/a..... feet.

The distance between the crest of the dam and the crest of the spillway, D, will be 2.5'..... feet.
(Must be at least 2½ feet)

If any other type of spillway describe and give dimensions:

11. Construction work will begin on or before..... Aug. 1992.....

12. Construction work will be completed and the reservoir filled by Aug. 1993.....

Remarks:.....

I/We certify that the information I have provided in this application is an accurate representation of the proposed water use and is true and correct to the best of my knowledge.

This permit, when issued, is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

RE: Water Right Application #R-72495 and 72496; Reports of
Technical Review

HABITAT
CONSERVATION
DIVISION

During discussion between ODFW field personnel and the applicant, the applicant agreed to the shortening of the allowed storage to exclude summer low-flow months, June through October. Therefore, ODFW requests WRD modify the proposed permit conditions for R-72495 to reflect this agreement.

Because one or more species of game fish are present at the described POD, ODFW will require the applicant to provide fish screening pursuant to ORS 498.248. Therefore, ODFW requests WRD add the following condition to those already proposed:

The permittee shall install and maintain a fish screening device as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. The required screen is to be in place and functional prior to diversion of any water.

ODFW also requests the following condition relating to in-channel obstructions be included as a permit condition:

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream.

Thank you for the opportunity to comment.

Sincerely,

A handwritten signature in dark ink, appearing to read "Albert H. Mirati, Jr.".

PO BOX 211
SIXES, OREGON 97476

Reference: File R 72495

Hello:

This letter informs you of the current status of your application for a water use permit and accompanies the Satisfactory Report of Technical Review For Water Use Permit(s). We apologize for the delay in transmitting this information and Report to you and for any inconvenience the wait may have caused you.

The enclosed Report of Technical Review is the Department's summary of a specialized analysis of various legal and scientific aspects of your application and proposed water use. We are required by the state of Oregon's administrative rules (in OAR 690-11-160) to conduct this official technical review of each application submitted to the Oregon Water Resources Department for a water use permit. This process was designed to insure that your application receives a fair evaluation and to secure protection of existing water rights and of the public at large.

AS THE RESULT OF OUR TECHNICAL EVALUATION, WE HAVE DETERMINED THAT YOUR APPLICATION SATISFIES THE REQUIREMENTS OF THE TECHNICAL REVIEW.

The Department will now move your application to the next phase of processing. This phase includes a public interest review of your proposed water use. No final action may be taken on your application until the public interest review is completed.

You should also note that the Report of Technical Review describes conditions currently anticipated which may limit the water use proposed in your application.

If you wish to object to any of the analyses contained in the Report, you must submit your objection to the Department in writing within 60 days of the date of mailing of this Report or by the date specified below. Your objection must allege that the technical review is defective and you may also submit evidence which demonstrates that your proposed water use will not impair or be detrimental to the public interest.

Copies of the Report of Technical Review will be distributed to all persons who have filed comments or otherwise expressed an interest in the

water use proposed in your application. Interested parties must also submit their objections within the prescribed objection period. Those objections must allege that the technical review is defective and/or that the proposed water use may impair or be detrimental to the public interest.

3850 Portland Rd NE
Salem, OR 97310
(503) 378-3739
FAX (503) 378-8130

If an objection contains allegations that the technical review is defective, it must be accompanied by facts which support such allegations. If an objection contains allegations that the proposed water use may impair or be detrimental to the public interest, the objection must specify the particular public interest standards which apply as set out in Oregon Revised Statutes (ORS 537.170(5)) and Oregon Administrative Rules (OAR 690-11-195) and state facts showing how such standards would be violated.

All evidence and objections must be received by our Salem office **no later than 5:00 p.m. on or before JUNE 1, 1994** or the Department may presume there is no opposition to any of the analyses set out in the technical review report. Evidence and objections must be addressed and delivered to: Oregon Water Resources Department, Water Rights Section, 3850 Portland Road, Northeast, Salem, Oregon 97310.

If objections and evidence are submitted on or before the above time and date, the Director of the Water Resources Department will evaluate each issue raised in the objections and either accept or deny them. Objectors are encouraged to indicate whether they would be interested in resolving their concerns through alternative dispute resolution.

If any of the objections are denied, the objector will be allowed thirty days to submit a protest to the denial. The protest must meet the standards set forth in OAR 690-02-030 through 080.

If you have any questions, please feel free to telephone me or any of the Department's Water Rights Section staff. My telephone number is 378-3739, in Salem, or you may call toll free from within the state to 1-800-624-3199.

Sincerely,

A handwritten signature in cursive script that reads "Dallas Miller".

Enclosures

Report Date: MARCH 9, 1994

OREGON WATER RESOURCES DEPARTMENT

SATISFACTORY REPORT OF TECHNICAL REVIEW

FOR WATER USE PERMIT(S)

OBJECTIONS TO THE PROPOSED WATER USE AS DESCRIBED BELOW MUST BE RECEIVED IN WRITING BY THE OREGON WATER RESOURCES DEPARTMENT, 3850 PORTLAND ROAD N.E., SALEM, OREGON 97310, BY 5 P.M. ON OR BEFORE: JUNE 1, 1994

1. APPLICATION FILE NUMBER - R 72495

2. MINIMUM APPLICATION INFORMATION

Applicant name/address/county/phone:

JAMES A BUSSMANN

PO BOX 211

SIXES, OR 97476

CURRY Co. 503-332-6611

Date application received for filing and/or tentative date of priority: 6/29/1992

SOURCE: UNNAMED STREAM

TRIBUTARY TO: SIXES RIVER

Purpose and/or use: CONSTRUCT RESERVOIR AND STORE WATER FOR CRANBERRY OPERATIONS

Flow: 2.07 acre-feet

Point of Diversion Location:

NWSW SEC 4, T 32 S, R 14 W, WM; 700'S, 1220'E, W 1/4 COR SEC 4

Place of use:

NWSW

2.07

Acre-feet

Section 4

T 32 S R 14 W, W.M.

SURFACE WATER AVAILABILITY

Water is likely available in excess of needs for all existing rights 50% of the time during each monthly period proposed by the technical review.

Water availability tables are available in the application file and may be reviewed in the office of the Water Resources Department in Salem.

CONFLICTS WITH OTHER WATER RIGHTS:

There are no existing rights from this point of diversion.

There are no existing water rights appurtenant to the lands described in the application.

REPORT CONCLUSIONS:

Based on the Department's review of water availability and Oregon Administrative Rules, stored water in the amount of 2.07 acre-feet is likely available for 8 months during storage season, no live flow. Therefore, the Director finds that water is available in sufficient amount and during periods which will reasonably support the proposed use.

THE PROPOSED WATER USE, AS CONDITIONED, SATISFIES THE REQUIREMENTS OF THIS TECHNICAL REVIEW.

This Report of Technical Review sets out the Director's technical analysis of the application. In addition to this technical analysis, the Director will evaluate this application to determine whether the proposed water use might impair or be detrimental to the public interest under the standards set out in ORS 537.170(5) and OAR 690-11-195. Matters relating to public interest in the proposed water use which are raised in objections will be evaluated following the 60-day objection period.

PROPOSED PERMIT CONDITIONS

Application: R 72495

The following conditions will apply to water use under the permit, and will appear in the permit, if issued.

1. Use of water under this permit is subject to all prior rights.
2. Period of allowed use: CONSTRUCT RESERVOIR AND STORE WATER FROM NOVEMBER 1 THROUGH JUNE 30 FOR CRANBERRY USE
3. Volume of use: 2.07 ACRE-FEET
4. Water use development requirements:
 - A. Begin construction by (one year from issuance of permit).
 - B. Complete construction by October 1, 1996.
 - C. Completely apply the water to beneficial use by October 1, 1997.
5. Measurement recording and reporting conditions:
 - A. The Director may require the permittee to install a meter or other suitable measuring device as approved by the Director. If the Director notifies the permittee to install a meter or other measuring device, the permittee shall install such device within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period. Once installed, the permittee shall maintain the meter or measuring device in good working order and shall allow the watermaster access to the meter or measuring device. The Director may provide an opportunity for the permittee to submit alternative measuring procedures for review and approval.
 - B. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.
6. Failure to comply with any of the provisions of the permit may result in action including, but not limited to, restrictions on the use, penalties, or cancellation of the permit.

7. The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
8. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.
9. The total area proposed to be submerged by the reservoir, when full is 0.5 acre; the proposed maximum depth of water in feet is 20; the maximum height of the dam is 9.0 feet.
10. The storage of water allowed herein is subject to the installation and maintenance of an fully functional conduit/gate assembly having a minimum diameter of 8 inches.

Re: Objection to Technical Report for:
72496, R 72495, Bussmann, Cranberry, Unnamed Strm/Sixes
Coos Co., South Coast

WaterWatch submits the following objections pursuant to OAR 690-11-170:

◆ **The Technical Reports are Defective**

The technical reports fail to contain many of the elements and evaluations required in OAR 690-11-160(1). The areas of deficiency are the same as those identified in WaterWatch's April 5 objection to application #69165 which we hereby incorporate into this objection.

◆ **The Water Availability Analyses in the Technical Reports are Defective**

The analyses are defective for the following reasons:

- The technical reports fail to contain any analysis of water availability, contrary to OAR 690-11.
- There is no water availability analysis for the proposed source of water, the unnamed stream.
- The water availability analysis in the technical reports fail to take into account flows needed to meet senior pending instream water rights for the Sixes River. If the analysis had taken into account the flows requested by ODFW, the report would have concluded that the river is overappropriated from May through November.¹

¹ The instream flows currently proposed by the Water Resources Department are lower than those requested by ODFW. The exact flows that will be adopted will not and cannot be determined until the instream certificates are issued. To base water availability analysis on the Department's lower flows is bad policy and will result in an overestimation of water availability. Even if the analysis had taken into account the instream flows proposed to be issued by the WRD, the analysis would have concluded that the river is overappropriated August through November and should have prohibited use during those months.

- The analyses fail to take into account existing water rights of record. Failure to account for future increases in water use pursuant to rights of record results in an over-estimation of water availability and over-allocation of the resource. This is contrary to the statewide Water Allocation Policy. OAR 690-400-010.

♦ **The Uses As Proposed are Not in the Public Interest**

The proposed uses fail to pass the public interest considerations in ORS 537.170 and are contrary to the South Coast basin program. *See also*, OAR 690-11-195(3)(d), (4)(a), (4)(c)(A), (4)(d)(A), (4)(f).

The South Coast Basin plan states:

Income from water-related recreation is a major contributor to the economy of the South Coast Basin. Finding 39.

The natural lakes, storage reservoirs and free-flowing streams support part of the water-based recreation use. Finding 40.

The water resources, wetlands and associated habitat are critical to the subsistence and propagation of wildlife in the Basin. Finding 42.

The coastal streams support resident and anadromous species of fish. Finding 43.

The fish resources of the South Coast Basin are significant to the State of Oregon. Finding 44.

Adequate streamflow throughout the year is necessary for the maintenance of aquatic life in the coastal streams. Finding 45.

Low summer streamflow in many Basin streams is one factor limiting production of salmonids. Finding 46.

Summer flows in some streams will not support recommended minimum flows. Finding 47.

The Sixes River system support a variety wildlife and fish life. Coho, Chinook salmon and winter steelhead rely on flows in the Sixes River for different stages of their life cycles.

1. **The proposed uses are not in the public interest because they will interfere with flows needed to support public instream uses of water.**

The proposed uses will deplete flows needed for numerous public instream uses of the Sixes River and its tributaries. This river system supports a variety of fish life including chinook salmon, winter steelhead and coho salmon. Petitions have been filed requesting listing of coastal coho and steelhead under the Federal Endangered Species Act. Low flows during summer months impair fish survival by among other things raising water temperatures and decreasing aquatic habitat and fish rearing areas. Low flows in the winter adversely affect fish habitat by among other things exposing spawning gravel and reducing feeding and rearing areas in the river. Water diversions create problems for fish passage and survival in the basin.

Currently there are pending instream water right applications for the Sixes River system. These pending instream water right applications request flows needed for fish life in the system. The public uses reflected in the instream water right applications (protection and conservation of fish life) has a "reasonable expectation of being developed" as evidenced by the pending instream water right application. This instream use provides greater benefit to the public at large than these proposed uses. These fish populations have statewide and even national significance and streamflows are essential for maintenance of these fish. The additional diversion of water from the unnamed stream will reduce flows in the Sixes system. Thus, the proposed uses are not in the public interest because they will preclude flows needed for the pending instream water right applications.

2. Measurement and reporting.

These conditions should allow the Director to require measurement and reporting of both **rate and duty** of water stored and used. The proposed permit conditions restrict use based upon a specific rate. If measurement and reporting of water use is to be a useful informational and regulatory tool for the Department, it should provide the information needed to ensure that water use is within the terms of the permit.

The surface waters of the Sixes River system are overallocated several months of the year. The information generated by these proposed conditions are essential to the management and control of the water resource. **If** these uses were to be permitted, water use measurement and reporting should be a mandatory condition of use. This information is essential for protection of the public interest in the resource. However, we question the Department's ability to control this use, **even** with these requirements.

The technical reports propose to limit the amount and months of use. The Department's enforcement staff is already incapable of control existing rights to use water in

the basin. These proposed uses add yet another enforcement responsibility on top of an already unmanageable load. Under these circumstances, it is difficult if not impossible for the state to ensure that these applicants will, **at all times**, use water in compliance with the permit conditions. Given the critical state of the water resource in the basin and the Department's inability to control these uses, even with measurement and reporting, these uses are not in the public interest.

3. The uses will impair the public interest because fish screening and passage facilities are not mandatory conditions of use.

The technical reports does not require mandatory fish screening and passage facilities prior to any use of water. Given the critical status of fish populations in the this basin, the adverse impact diversions and dams have on fish habitat, screening and passage should clearly be required to be in place **before** any diversion or storage of water. In addition, failure to maintain screening and passage facilities must be grounds for shutting off water use. There should be a condition which **clearly** states these requirements.

4. The proposed uses are contrary to Oregon policy.

ORS 537.170(5)(a) and (c) require the Department to ensure that waters in the basin will be used and controlled for all purposes, not just consumptive purposes. The Statewide Instream Flow Protection Policy states that "(w)here streamflows have been depleted to the point that public uses have been impaired, methods to restore the flows are to be developed and implemented." OAR 690-410-030(1). When considering applications for new water rights the agency is required to consider the needs of instream and out-of-stream uses and the need to develop streamflow restoration programs. OAR 690-410-030(2)(a). No such consideration has been done.

The recent petition for listing of coho and steelhead populations coast wide makes the protection of instream flows even more important for achieving a balance in this basin. The establishment and protection of instream water rights will help to achieve a balanced allocation of water between public instream and other uses in Basin and throughout the state. Establishment of the instream water right also furthers statewide policies, priorities and goals for streamflow restoration including those in OAR 690-11-030(1), 690-410-070, and 690-77-015. Providing streamflow protection for fish is also necessary in order to carry out the state policy of restoring native fish stocks. ORS 496.435. Thus, protection of the public interest requires denial of these applications.

Failure of the State to look for or provide other sources of water, in the face of potential listing of the coastal coho creates expectations for water that may not be fulfilled if/when the species are listed. Instream flows in the creek provide critical habitat for fish -

without water instream there is **no** habitat. Continuing to issue water rights on a river with a possibility of a listed species, as well as existing water availability and water quality problems makes little sense.

Conservation

Oregon statutes and rules also call for the state to "aggressively promote" water conservation and places a high priority on eliminating waste and improving the efficiency of water use. ORS 537.460(2)(a) and OAR 690-410-060(1). The proposed conditions do little to further these policies. Given the presence of potentially listed species, the water quality problems and the fact water diversions are one of the causes of anadromous fish declines it is imperative that the water use be as efficient as possible. These proposed uses should be held to a high efficiency standard **prior to** any permit issuance.

Sincerely,

Karen A. Russell
Assistant Director

RE: Application for Permit #R72495, 72496, J. Bussman
Sixes River, 2.07 af, 4.2 cfs, Cranberry Operations

WaterWatch has reviewed the limited amount of information contained in the public notice of this water right application. Based upon that information, WaterWatch raises the following issues, questions, and concerns:

Is there unappropriated water available for this proposed use? Will the Department use the 80% exceedence level in determining water availability?

What effect will this proposed use have on instream flows necessary to protect the public's interest in fish, wildlife, recreation, and a healthy aquatic system?

This water source may suffer from water quality problems. Has the Department consulted with the Department of Environmental Quality to determine the effect this proposed withdrawal will have on water quality?

If this water source provides habitat to native fish during any phase of their life cycle, we request that the Department include conditions requiring the installation and maintenance of fish screening and bypass devices prior to any diversion of water.

Given the importance of surface water sources, and the Department's limited enforcement staff, it only makes sense to require this applicant to measure and record water use. Measurement not only helps the Department carry out its statutory mandate to promote the control of water resources for all beneficial uses, it helps the Department protect the public's interest in assuring the use is within the bounds of the permit. ORS 536.220(1)(a), 537.170(5).

Will this proposed use be compatible with Goal 5 elements of the local comprehensive plan?

It is a high priority of the state to eliminate waste and improve the efficiency of water use. OAR690-410-060(1). Statewide policy also calls upon water users to use and maintain their water systems in a manner consistent with the state's priority. OAR 690-410-060(2)(a). What conditions are proposed for this permit that will carry out and encourage compliance with state policy?

Is this an existing illegal use of water? If so, will the continued use without a permit cause harm to existing water rights and the public interest?

We request a copies of the draft permit and the Department's technical analysis of this application.

Sincerely,

Jim Myron

TOTAL SUBMITTED	\$ 50
AMOUNT DUE prior to issuance of permit	\$ 0
AMOUNT OVERPAID	
refund due applicant	\$

S Proposed dates of beginning and completion of construction, and complete application of water.

S A satisfactory map of the proposed place of water use prepared by a certified water right examiner, unless exempt under OAR 690-14-150(3).

NA

A CWRE map is not required for applications filed before November 9, 1987.

S

A written copy of the legal description of the property on which the water is to be used.

NA

A copy of written authorization, contract or easement permitting access to the land or reservoir not owned by the applicant.

S

No statement of ownership was required for applications filed before August, 1990.

S

The proposed use is not restricted or prohibited by statute.

S

The source of water is not withdrawn from appropriation by order of the State Engineer or Water Resources Commission, or legislatively withdrawn under ORS Chapter 538.

S

Irrigation (Crawfish) use(s) is/are classified use(s) under the South Coast Basin Program, OAR 690 - 517.001. (8)

S

The application, map and supporting data are complete and free of defects.

Land Use Compatibility:

As expressed by the Planning Department of Curry

S

The land uses to be served by proposed water uses (including proposed construction) are allowed or are not regulated by the local comprehensive plan (ordinance section 3.050).

NA

The land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals which have been obtained.

NA

The local government was notified, and sent no comment pursuant to the rules at the time; land use was presumed in compliance per such statement printed on the application.

For ground water applications:

NA

A copy of the constructor's log, if available, for any well already constructed, or required information regarding actual or anticipated construction.

NA

The report from groundwater section has been received.

For reservoir applications:

S

Plans, specifications and supporting information for the dam and impoundment area.

STATE LAND BOARD

BARBARA ROBERTS
Governor
PHIL KEISLING
Secretary of State
ANTHONY MEEKER
State Treasurer

Dear Mr. Bussmann:

We received notification of your water appropriations permit application from Water Resources concerning the project on Bussmann 1 Reservoir and store waters of an unnamed stream, tributary of Sixes River.

The project will require a removal permit from our agency if 50 cubic yards or more of material is removed or altered within the waterway, including wetlands. However, pursuant to ORS 196.800 - 196.990, a permit is not required for filling within the waterway for the purpose of constructing, operating, and maintaining dams or other diversions for which a water right or hydroelectric permit shall be issued under ORS Chapters 537 or 539, or under ORS 543.010 to 543.620, administered by the Water Resources Department. Fill for activities associated with dam or water diversions for purposes other than operating or maintaining the dam or water diversion (fishways, erosion protection, etc.) require permits under the Removal-Fill Law.

Enclosed are copies of the Removal-Fill Law and joint application forms for your information and/or use. If we can be of further assistance, please contact our office.

Sincerely,

William L. Parks
Staff Biologist

RE: Water Right application review; request for report of technical review

Dear Steve:

ODFW is interested in reviewing WRD's technical analyses for the following water use applications when they become available:

72487	72495	72532	72540	72547
72491	72496	72533	72544	72550
72492	72529	72538	72545	
72493	72530	72539	72546	

These applications have the potential to impact fish and wildlife resources in the subject waterways and are, therefore, of concern to ODFW.

Thank you.

Sincerely,

Albert H. Mirati, Jr.
Instream Water Right and
Water Right Review Coordinator

REFERENCE: File(s) R-72495, S-72496

We received your application(s) proposing to use water, along with supporting data and fees. Your receipt is enclosed unless you received it earlier. The application has been assigned the above referenced file number and will be reviewed in detail as time allows. If you need to call or write to us, be sure to reference the file number(s) listed above so we may assist you promptly.

Applications which are received in proper form with required maps, supporting data and fees can be considered for approval by issuance of permits following a mandatory 60-day waiting period and after public interest matters are resolved.

Processing of applications which require additional information will be delayed further. If you feel that a delay in the processing of your application will cause a hardship, please advise in writing.

If the application is approved, the use allowed by the permit will be subject to the Water Resources Commission's Basin Program statements, instream flow requirements, and demands of prior rights.

If you have any questions, please contact the Water Right Section at the telephone number referenced below.

Land Use Information Form: Permits, Hydroelectric Licenses, Water Uses In
Addition to Classified Uses

JUN 29 1992

WATER RESOURCES DEPT.
SALEM, OREGON

This information is needed to determine compatibility with local comprehensive plans as required by ORS 197.180. The Water Resources Department will use this and other information to evaluate the water use application. DO NOT FILL OUT THIS FORM IF water is to be diverted, conveyed, and/or used only on federal lands.

Applicant's Name: James A. Bussmann
Address: P.O. Box 211
City: Sixes State: Or Zip: 97476 Day Phone: 332-6611

Please provide information as requested below for all tax lots on or through which water will be diverted or used. (Attach extra sheets as necessary.) Applicants for municipal use, or irrigation uses within irrigation districts, may substitute existing and proposed service area boundaries for the tax lot information requested below.

Tax Lot, or Local I.D.#	Plan Designation/Zoning (e.g. Rural Residential/RR-5)	Check All That Apply		
		Water Diverted	Water Conveyed	Water Use
302				
32-15-4	F.G. Zone	X	X	X

Please list all counties and cities within which water is proposed to be diverted, conveyed, and/or used. Curry

The following section must be completed by a planning official from each county and city listed unless your project will be located entirely within city limits. In this case, only the city planning agency must complete this form. Please request extra forms as needed.

For Local Government Use Only

Local government planning officials are to complete the remainder of this form. If this form can not be completed while the applicant waits, please sign and detach the receipt as instructed below. Please mail the completed form directly to the Water Resources Department (3850 Portland Rd. NE, Salem, OR, 97310) within 60 days of the date of receipt as shown below. If the form is not completed within 60 days, the Department may take action to approve the water use.

a) Check the appropriate box below and provide requested information.

☒ Land uses to be served by proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): CURRY COUNTY ZONING ORD. Go to section b) on reverse side.
SEC. 3.050

☐ Land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below. Note: Please attach documentation of applicable local land use approvals which have already been obtained. (Record of Action plus any accompanying findings is sufficient.)

Description of Water Use

Note to Applicant: This sheet will provide local planning staff with a basic description of your proposed water use. Please fill out this sheet before bringing the attached land use form to your local planning office. It will help local planning offices complete your land use information form quickly.

Note to Local Planning Officials: Please initial this sheet. Do not separate it from the land use information form. If needed, please make a separate copy for your records.
