REMARKS

CWRE 128 Sent: 9-13-89
CCWRE Sent 10/28/91

Form C (690-9-77)

IMPORTANT—This form is a notice to the Water Resources Director that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.

Application No. G-11859

NOTICE OF COMPLETE APPLICATION OF WATER TO A BENEFICIAL USE

I, Eldon G. Crawford, the holder of Permit No. G-10873
to appropriate the public waters of the state of Oregon, completely applied the waters to a beneficial use in accordance with the terms of said permit, on the 1 day of May, 1989

Remarks:

Acquired property in August 1988
irrigate alfalfa crops.

IN WITNESS WHEREOF, I have hereunto set my hand this 28 day of August, 1989

Eldon Crawford
(Signature of Applicant)

Winnemucca, NV. 89445
(Address)

Form B (690-9-77)

Application No. G-11859

NOTICE OF COMPLETION OF CONSTRUCTION

I, Eldon G. Crawford, the holder of Permit No. 10873
to appropriate the public waters of the state of Oregon, completed the construction of the works described therein on the 12 day of December, 1980

Remarks:

If the works have less capacity than described in the permit, or you have definitely abandoned part of the proposed develop-
ment, you should so state in order that our records may not be unnecessarily encumbered.

Well constructed by former owner
and is working fine.

IN WITNESS WHEREOF, I have hereunto set my hand this 28 day of August, 1989

Eldon Crawford
(Signature of Applicant)

5195 E. Kirkway Dr.
Winnemucca, NV. 89445
(Address)

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when construction work is completed.

MESA, WA 99343

REFERENCE: Transfer Application T-12864

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. **YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT.** The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Arla Davis, by telephone at (503) 986-0806 or by e-mail at Arla.L.Davis@oregon.gov.

Sincerely,

Ashley N. Mosley

Enclosure

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of Transfer Application	)	FINAL ORDER APPROVING
T-12864, Harney County	)	ADDITIONAL POINTS OF
	)	APPROPRIATION

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

WHITBY BROTHERS LAND AND LIVESTOCK LLC
JEB WHITBY
62 W JUNIPER RD
MESA, WA 99343

Findings of Fact

1. On March 8, 2018, WHITBY BROTHERS LAND AND LIVESTOCK LLC AND JEB WHITBY filed an application for additional points of appropriation under Certificates 66774, 66775, 67893, 67894, and 93575. The Department assigned the application number T-12864.
2. Notice of the application for transfer was published on March 13, 2018, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On September 7, 2018, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12864 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of October 8, 2018, for the applicant to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicants are authorized to pursue the transfer.
4. On December 27, 2018, the Department issued a Preliminary Determination proposing to approve Transfer T-12864 and mailed a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on January 1, 2019, and in the Burns Times Herald newspaper on January 2, and 9, 2019, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

5. The first right to be transferred is as follows:

Certificate: 66774 in the name of RICHTRON FINANCIAL CORPORATION
(perfected under Permit G-9115)
Use: IRRIGATION of 124.8 ACRES
Priority Date: SEPTEMBER 12, 1980
Rate: 1.56 CUBIC FEET PER SECOND
Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

Transfer Review Criteria (OAR 690-380-4010)

15. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

16. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12864.
17. The proposed change would not result in enlargement of the rights.
18. The proposed change would not result in injury to other water rights.
19. All other application requirements are met.

Conclusions of Law

The additional points of appropriation proposed in Transfer Application T-12864 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The additional points of appropriation proposed in Transfer Application T-12864 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 66774, 66775, 67893, 67894 and 93575 and any related decree.
3. Water right Certificates 66774, 66775, 67893, 67894 and 93575 are cancelled.
4. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
5. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
6. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
7. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2020**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.

8. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

Certificate of Water Right Ownership Update

NOTICE TO SELLERS & BUYERS:

By law, all water belongs to the public (ORS 537.110). In almost every instance, a permit or water right certificate from the Water Resources Department is needed before using, diverting or storing water (ORS 537.130). However, most domestic wells do not require water rights. A certificate of water right stays with the land. In order to keep track of water right ownership, the Department requests that this form be submitted to the Department. *If for multiple rights, a separate form for each right will be required.*

Water that has been used for a long time in one place or that involves a water structure (like a dam) that already exists is no guarantee that there is a water right which would allow the water use to continue.

If you have any questions about this form or water right requirements, please contact your local watermaster or call the Water Resources Department at 503-986-0900.

Note: Please type or print legibly when filling in the following information. Use additional paper if necessary.

Oregon Water Resources Department
Water Rights Division

Water Rights Application
Number G-13569

Final Order
Extension of Time for Permit Number G-11859

Appeal Rights

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Application History

The Department issued Permit G-11859 on November 18, 1994. The permit called for completion of construction by October 1, 1996, and complete application of water to beneficial use by October 1, 1997. On November 29, 2007, Warren Water Association submitted an application to the Department for an extension of time for Permit G-11859. In accordance with OAR 690-315-0050(2), on January 8, 2008, the Department issued a Proposed Final Order proposing to extend the time to complete construction to October 1, 2047 and to extend the time to fully apply water to beneficial use to October 1, 2047. The protest period closed February 22, 2008, in accordance with OAR 690-315-0060(1). No protest was filed.

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, the permit may be extended subject to the following conditions:

CONDITIONS

1. **Development Limitations**

Diversion of any water beyond 0.36 cfs under Permit G-11859 shall only be authorized upon issuance of a final order approving a Water Management and Conservation Plan (WMCP) under OAR Chapter 690, Division 86. The required WMCP shall be submitted to the Department within 3 years of an approved extension application. Use of water under Permit G-11859 must be consistent with this and subsequent WMCP's approved under OAR Chapter 690, Division 86 on file with the Department.

The deadline established in this PFO for submittal of a WMCP shall not relieve a permit holder of any existing or future requirement for submittal of a WMCP at an earlier date as

established through other orders of the Department. A WMCP submitted to meet the requirements of this order may also meet the WMCP submittal requirements of other Department orders

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.630, 539.010(5) and OAR 690-315-0080(3).

Order

The extension of time for Application G-13569, Permit G-11859, therefore, is approved subject to conditions contained herein. The deadline for completing construction is extended to October 1, 2047. The deadline for applying water to full beneficial use is extended to October 1, 2047.

DATED: March 6, 2008

Dwight French, Administrator of
Water Rights and Adjudications
for
Phillip C. Ward, Director

STATE OF OREGON
COUNTY OF HARNEY
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

CARL THOMAS
4055 SOUTH SPENCER #124
LAS VEGAS, NEVADA 89119

confirms the right to use the waters of ONE WELL in the CATLOW VALLEY BASIN for IRRIGATION OF 224.0 ACRES.

This right was perfected under Permit G-10873. The date of priority is OCTOBER 10, 1988. This right is limited to not more than 2.8 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

SW 1/4 NE 1/4, SECTION 8, T 33 S, R 31 E, W.M.; 2650 FEET SOUTH AND 1320 FEET EAST FROM NORTH 1/4 CORNER OF SECTION 8.

The amount of water used for irrigation together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

The right shall be limited to appropriation of water only to the extent that it does not impair or substantially interfere with prior surface water rights as well as prior ground water rights of others.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

NE 1/4 NE 1/4	28.0 ACRES
NW 1/4 NE 1/4	28.0 ACRES
SW 1/4 NE 1/4	28.0 ACRES
SE 1/4 NE 1/4	28.0 ACRES
NE 1/4 SE 1/4	28.0 ACRES
NW 1/4 SE 1/4	28.0 ACRES
SW 1/4 SE 1/4	28.0 ACRES
SE 1/4 SE 1/4	28.0 ACRES

SECTION 8

TOWNSHIP 33 SOUTH, RANGE 31 EAST, W.M.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described.

WITNESS the signature of the Water Resources Director, affixed OCTOBER 12, 1992.

REk: Final Proof Map & Site Report, Permits G-10872 & 10873; Carl Thomas; JO 1224-92

Attention: Larry Nunn;

Dear Larry;

Enclosed for your use is the Site Report and Final Proof Map on the two subject water rights in Catlow Valley, Harney County, Oregon. The permits for these water rights are currently in the name of Valmont Industries, Inc. while the present owner is Carl Thomas of Law Vegas, Nevada. Therefore, also enclosed is an assignment from Valmont to Carl Thomas along with related coorespondence.

If you need anything else, or have any questions, please don't hesitate to give us a call.

Very truly yours,

Cork

Location: In T.33S., R.31E., W.M., Harney County, Oregon:

Permit G-10872 - The NW1/4 of Section 10
Permit G-10873 - The NE1/4 & SE1/4 of Section 8

I. GENERAL INFORMATION

On February 21, 1992 I conducted a site survey on the subject water rights for Carl Thomas of Las Vegas, Nevada. This development, located in the north end of Catlow Valley contains 9 irrigation pivots and nine wells. This report deals with Pivot No.s 5, 7 & 8 and Well No.s 5 & 9. The manager of this operation, V.J. Lefor, was present during this survey.

II. SURVEY METHOD

The field survey was done using theodolite and EDM measurements. The control corners for this survey is the N1/4 of Section 8 and the NW corner of Section 10.

III. SOURCE OF WATER

The source of water are 2 wells as follows:

	<u>Well</u>	
	<u>No. 5</u>	<u>No. 9</u>
Well -		
Casing: size/type/depth	16"/stl.	16"/stl./20'
Measuring Port:	none	none
Depth:	540'	450'
Static Water Level:	95'	94'
Pump -		
Motor Brand/Model:	Verti-line	Verti-line
Motor Hp/RPM:	100/1760	100/1760
Pump Setting:	280'	280'
Pumping Level:	130'	185'
Pump Test (gpm/dd):	2265/85'	2020/122'

Pump tests were done by Western Drilling of Burns, Oregon in January of this year. Drawdown curves from these tests are attached.

IV. PLACE OF USE

The place of use was located and measured and is as shown on the Final Proof Map submitted with this Site Report.

V. IRRIGATION SYSTEM

Irrigation for the two permits involve the following:

Permit G-10872: From Well No. 5 water is pumped through a 16" PVC pipe, 10 feet to the center of a 1220 ft. irrigation pivot. The effective radius of this pivot was measured at 1246 ft.

Permit G-10873: From Well No. 9 water is pumped to 2-1220 ft. irrigation pivots through 10" stl. pipe to each pivot. The effective radii of each pivot was measured at 1246 ft.

VI. HYDRAULIC CALCULATIONS

Based on the above information the capacity of this system is calculated as follows:

Permit G-10872 ✓

System Losses:	elev. head =	130 ft.
	pump column =	2
	16" pipe & fittings =	0
	pivot head loss @ 15 psi =	35
	nozzle pressure @ 11 psi =	25

Total System Head Loss = 190 ft.

Pump Capacity = $Q = [Hp \times Eff. \times 3960] / \text{Head Loss}$

$$= [100 \times 0.80 \times 3960] / 190 =$$

$$= 1667 \text{ gpm} = 3.72 \text{ cfs}$$

$$\text{Duty of Water} = 1/80 \text{ cfs per acre} = 112.0/80 = \underline{1.40 \text{ cfs.}}$$

The system will therefore supply 1.40 cfs as allowed under Permit No. G-10872.

Permit G-10873 ✓

System Losses:	elev. head =	185 ft.
	pump column =	3
	10" pipe & fittings =	4.5
	pivot head loss =	35
	nozzle pressure @ 11 psi =	<u>25</u>

Total System Head Loss = 250.5 ft

$$\text{Pump Capacity} = Q = [Hp \times \text{Eff.} \times 3960] / \text{Head Loss}$$

$$= [100 \times 0.85 \times 3960] / 250.0 =$$

$$= 1344 \text{ gpm} = 2.99 \text{ cfs}$$

$$\text{Duty of Water} = 1/80 \text{ cfs per acre} = 224.0/80 = \underline{2.80 \text{ cfs.}}$$

The system will therefore supply 2.80 cfs as allowed under Permit No. G-10873.

V. CERTIFICATIONS

I, Charles F. Palmer, Certified Water Rights Examiner, registered in accordance with the laws of the State of Oregon, do hereby certify that the final proof site survey and inspection of the use was found to be completed under the terms and conditions of Permit No.s G-10872 and G-10873 was completed by me on February 21, 1992, and that the facts contained in this report and accompanying final proof map are correct to the best of my knowledge.

Charles F. Palmer
 Charles F. Palmer, C.W.R.E.
 Ore. Reg. No. 099

I, Carl Thomas, hereby agree to the above findings of Charles Palmer, Certified Water Rights Examiner, and do submit this site report and map as my Claim of Beneficial Use of the water as provided under the terms and conditions of our Permit No.s G-10872 and G-10873.

PERMIT TO APPROPRIATE THE PUBLIC WATERS

VALMONT INDUSTRIES, INC.
WEST HIGHWAY 275
VALLEY, NEBRASKA 68064

402-359-2201

is hereby issued a permit to use the waters from ONE WELL, within Catlow Valley basin, for IRRIGATION OF 320.0 ACRES. The permit to the use of these waters has been issued under Application G-11859 with a date of priority of OCTOBER 10, 1988. The permit is limited to not more than 4.0 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

SW 1/4 NE 1/4, Section 8, T 33 S, R 31 E, WM;
2650 FEET SOUTH & 1320 FEET EAST FROM N1/4 CORNER, SECTION 8.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The permit shall be limited to appropriation of water only to the extent that it does not impair or substantially interfere with prior surface water rights as well as prior ground water rights of others.

The use of water allowed under this permit shall conform to such reasonable rotation system as may be ordered by the proper state officer.

The place of use is as follows:

	ACRES	1/4 1/4	SECTION	TOWNSHIP	RANGE, WM
primary	40.00	NE NE	8	33 S	31 E
primary	40.00	NW NE	8	33 S	31 E
primary	40.00	SW NE	8	33 S	31 E
primary	40.00	SE NE	8	33 S	31 E
primary	40.00	NE SE	8	33 S	31 E
primary	40.00	NW SE	8	33 S	31 E
primary	40.00	SW SE	8	33 S	31 E
primary	40.00	SE SE	8	33 S	31 E
Total	320.00 acres.				

NCR
DSM
8-21-92
Allow 2.8 CFS

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times. The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

Actual construction work shall begin on or before March 14, 1990, and shall be completed on or before October 1, 1990. Complete application of the water to the use shall be made on or before October 1, 1991.

This permit is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

Issued this date, March 14, 1989.

REK: Final Proof Map & Site Report, Permits G-10872 & 10873; Carl Thomas; JO 1224-92

Attention: Larry Nunn;

Dear Larry;

Enclosed for your use is the Site Report and Final Proof Map on the two subject water rights in Catlow Valley, Harney County, Oregon. The permits for these water rights are currently in the name of Valmont Industries, Inc. while the present owner is Carl Thomas of Law Vegas, Nevada. Therefore, also enclosed is an assignment from Valmont to Carl Thomas along with related correspondence.

If you need anything else, or have any questions, please don't hesitate to give us a call.

Very truly yours,

Cork Palmer, P.E.
M.A. PALMER & SONS, INC.

SITE REPORT
for
CLAIM OF BENEFICIAL USE

For: Carl Thomas
4055 So. Spencer St., Suite 124
Las Vegas, Nevada 89119

Under: Application No. G-11858
Permit No. G-10872
and
Application No. G-11859
Permit No. G-10873

In the Name of: Valmont Industries, Inc.
West Highway 275
Valley, Nebraska 68064

Location: In T.33S., R.31E., W.M., Harney County, Oregon:

Permit G-10872 - The NW1/4 of Section 10
Permit G-10873 - The NE1/4 & SE1/4 of Section 8

I. GENERAL INFORMATION

On February 21, 1992 I conducted a site survey on the subject water rights for Carl Thomas of Las Vegas, Nevada. This development, located in the north end of Catlow Valley contains 9 irrigation pivots and nine wells. This report deals with Pivot No.s 5, 7 & 8 and Well No.s 5 & 9. The manager of this operation, V.J. Lefor, was present during this survey.

II. SURVEY METHOD

The field survey was done using theodolite and EDM measurements. The control corners for this survey is the N1/4 of Section 8 and the NW corner of Section 10.

III. SOURCE OF WATER

The source of water are 2 wells as follows:

	<u>Well</u>	
	<u>No. 5</u>	<u>No. 9</u>
Well -		
Casing: size/type/depth	16"/stl.	16"/stl./20'
Measuring Port:	none	none
Depth:	540'	450'
Static Water Level:	95'	94'
Pump -		
Motor Brand/Model:	Verti-line	Verti-line
Motor Hp/RPM:	100/1760	100/1760
Pump Setting:	280'	280'
Pumping Level:	130'	185'
Pump Test (gpm/dd):	2265/85'	2020/122'

Pump tests were done by Western Drilling of Burns, Oregon in January of this year. Drawdown curves from these tests are attached.

IV. PLACE OF USE

The place of use was located and measured and is as shown on the Final Proof Map submitted with this Site Report.

V. IRRIGATION SYSTEM

Irrigation for the two permits involve the following:

Permit G-10872: From Well No. 5 water is pumped through a 16" PVC pipe, 10 feet to the center of a 1220 ft. irrigation pivot. The effective radius of this pivot was measured at 1246 ft.

Permit G-10873: From Well No. 9 water is pumped to 2-1220 ft. irrigation pivots through 10" stl. pipe to each pivot. The effective radii of each pivot was measured at 1246 ft.

VI. HYDRAULIC CALCULATIONS

Based on the above information the capacity of this system is calculated as follows:

Permit G-10872

System Losses:	elev. head =	130 ft.
	pump column =	2
	16" pipe & fittings =	0
	pivot head loss @ 15 psi =	35
	nozzle pressure @ 11 psi =	25

Total System Head Loss = 190 ft.

Pump Capacity = $Q = [Hp \times Eff. \times 3960] / \text{Head Loss}$

$$= [100 \times 0.80 \times 3960] / 190 =$$

$$= 1667 \text{ gpm} = 3.72 \text{ cfs}$$

Duty of Water = 1/80 cfs per acre = 112.0/80 = 1.40 cfs.

The system will therefore supply 1.40 cfs as allowed under Permit No. G-10872.

Permit G-10873

System Losses:	elev. head =	185 ft.
	pump column =	3
	10" pipe & fittings =	4.5
	pivot head loss =	35
	nozzle pressure @ 11 psi =	25

Total System Head Loss = 250.5 ft

$$\text{Pump Capacity} = Q = [\text{Hp} \times \text{Eff.} \times 3960] / \text{Head Loss}$$

$$= [100 \times 0.85 \times 3960] / 250.0 =$$

$$= 1344 \text{ gpm} = 2.99 \text{ cfs}$$

Duty of Water = 1/80 cfs per acre = 224.0/80 = 2.80 cfs.

The system will therefore supply 2.80 cfs as allowed under Permit No. G-10873.

V. CERTIFICATIONS

I, Charles F. Palmer, Certified Water Rights Examiner, registered in accordance with the laws of the State of Oregon, do hereby certify that the final proof site survey and inspection of the use was found to be completed under the terms and conditions of Permit No.s G-10872 and G-10873 was completed by me on February 21, 1992, and that the facts contained in this report and accompanying final proof map are correct to the best of my knowledge.

Re: Catlow Valley, Oregon
Contract of Sale

Dear Mr. Salmans:

During the past year, I have had substantial work done on the wells on the above property including tests, drilling, geological surveys, etc.. In the process, I have also hired Mr. Cork Palmer to straightened out all of the water rights currently on file, and request additional water rights.

Please see attached correspondence from Mr. Palmer indicating the need for your signature on an assignment. If you would sign the enclosed and return the documents to Mr. Palmer, I would appreciate it.

If you have any questions on the work I have had done, please feel free to contact me, or Mr. Palmer.

Sincerely,

CARL & KENNY DIGGERS, INC.

October 28, 1991

VALMONT INDUSTRIES INC
W HIGHWAY #275
VALLEY NE 68064

REFERENCE: File G-11859

The date for the complete application of water to a beneficial use for your water use Permit G-10873 was October 1, 1991. To date we have not received notice that your project was completed.

If the project was completed, you should promptly submit the notice of complete application of water (Form C), which is enclosed. If you were unable to complete the project within the time allowed, you may wish to request an extension of the time limits. Forms will be furnished upon request.

In order to obtain a certificate of water right, you are required by law to hire a certified water right examiner to conduct the final proof survey of the completed use. This must be done within one year after the use is reported as being complete or within one year after the beneficial use date allowed in the permit, whichever occurs first. Accordingly, the map and claim of beneficial use must be received in this office on or before October 1, 1992. A list of certified water right examiners is enclosed for your information.

Upon receipt of the map and claim of beneficial use, the information will be reviewed and a brief field inspection may be conducted by a representative of this office. Following that, a proposed certificate of water right will be mailed to you for review.

If you are no longer interested in the project, please let us know. We will provide forms for you to authorize the cancellation of the permit.

If you have any questions, please contact the Water Rights Section at 378-3739.

Dear Mr. Lee:

We received your January 15, 1991 letter. We have marked the notices of complete application of water submitted by Eldon Crawford for permits G-10872 and G-10873 as "premature".

You may disregard the notice sent to Valmont Industries on September 15, 1989.

Your permits are conditioned so that the date for the complete application of water is October 1, 1991. Enclosed are new notices of complete application of water (form C). Please notify us when you have made complete application of water.

These permits are in the name of Valmont Industries. They should be assigned to you. Enclosed are form for you to use to have the permits assigned. The forms need to be signed by an authorized representative of Valmont Industries, including the title of the person signing the form. The forms should then be submitted along the \$10 recording fees.

Sincerely,

RE: Permit Nos. G-10872 and 10873

Dear Mr. Nunn:

Regarding the water rights permits referred to above, I wish to inform you that the C forms, "notice of complete application of water to a beneficial use", previously submitted on August 28, 1989 were in error. Having recently acquired the property from Eldon Crawford, who acquired it from Valmont Industries in August of 1988, it appears that the water was not ready for application in accordance with the permits.

I would therefore like to notify your office that the water is now being applied in a beneficial use and I will submit the final proof survey and claim of beneficial use by October 1, 1991.

Sincerely yours,

Ken Lee

WINNEMUCCA, NV. 89445

REFERENCE: File G-11858 and G-11859

We have received your check in the amount of \$10 along with a request to assign permits G-10872 and G-10873.

The assignment form will have to be signed by an officer for Valmont Industries, Inc. The assignment form is enclosed for that signature and title.

Our records do not show that we have made a survey of the projects described in these permits. Our field work will be done the next time our representative is in the area. If time is a factor, you could hire a Certified Water Right Examiner to prepare the claim of beneficial use of water statement.

I have enclosed application forms, pamphlet, and a list of examiners.

Sincerely,

Thomas E. Shook
Water Right Specialist

Reference Files: G-11858 and G-11859

We have received your notice that complete application of water has been made under permits G-10872 and G-10873.

In order to obtain a certificate of water right, you are required by law to hire a certified water right examiner to conduct the final proof survey of the completed use. This must be done within one year after the use is reported as being complete or within one year after the beneficial use date allowed in the permit, whichever occurs first. Accordingly, the map and claim of beneficial use must be received in this office on or before September 1, 1990. A list of certified examiners is enclosed for your information.

Upon receipt of the map and claim of beneficial use, the information will be reviewed and a brief field inspection may be conducted by a representative of this office. Following that, a proposed certificate of water right will be mailed to you for review.

In the meantime, the permit you hold is valid evidence of your right to use the water.

If you have any questions, please contact the Survey/Mapping Section at 378-3739.

REFERENCE: File G-11859

ENCLOSED: Permit G-10873

PLEASE READ THE FOLLOWING INSTRUCTIONS CAREFULLY

Your permit has been recorded in this office, but you should hold the original permit as evidence of your water right. If the land is sold, an assignment to the new owner must be recorded in this office. Assignment blanks will be furnished upon request.

The permit fixes time limits for beginning of construction, completion of construction and complete application of water to beneficial use. The law requires that you begin actual construction within one year from the date of issuance of the permit or your right will be lost. The Water Resources Director is authorized to extend the time for completion of construction and for complete application of water upon proper showing, but has no authority to extend the time limit for beginning of construction.

Forms A, B and C may be attached for submitting (A) Notice of Beginning of Construction, (B) Notice of Completion of Construction and (C) Notice of Complete Application of Water. If your application has stated that construction has already been started, or that construction work is completed, or that complete application of water has been made, only the required forms will be attached.

The start of the drilling operation or other means of constructing the well will be considered as beginning of construction. If no canal system or other permanent type of distribution works is employed, the acquisition and installation of all the machinery or equipment necessary for the project will be considered as completion of construction.

When complete application of water has been made, Form C should be submitted as the first step in proof of appropriation. When proof satisfactory to the Water Resources Director has been made, the right will be confirmed by issuance of a certificate. The certificate will limit the right to the extent that water has been applied to beneficial use in accordance with the terms of the permit.

The permit requires that an access port or other installation be provided to allow the measurement of the water level within the well at any time. Sketches of suggested methods of installation are attached.

Sincerely,

William H. Young

STATE OF OREGON

COUNTY OF HARNEY

PERMIT TO APPROPRIATE THE PUBLIC WATERS

VALMONT INDUSTRIES, INC.
WEST HIGHWAY 275
VALLEY, NEBRASKA 68064

402-359-2201

is hereby issued a permit to use the waters from ONE WELL, within Catlow Valley basin, for IRRIGATION OF 320.0 ACRES. The permit to the use of these waters has been issued under Application G-11859 with a date of priority of OCTOBER 10, 1988. The permit is limited to not more than 4.0 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

SW 1/4 NE 1/4, Section 8, T 33 S, R 31 E, WM;
2650 FEET SOUTH & 1320 FEET EAST FROM N1/4 CORNER, SECTION 8.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The permit shall be limited to appropriation of water only to the extent that it does not impair or substantially interfere with prior surface water rights as well as prior ground water rights of others.

The use of water allowed under this permit shall conform to such reasonable rotation system as may be ordered by the proper state officer.

The place of use is as follows:

	ACRES	1/4 1/4	SECTION	TOWNSHIP	RANGE, WM
primary	40.00	NE NE	8	33 S	31 E
primary	40.00	NW NE	8	33 S	31 E
primary	40.00	SW NE	8	33 S	31 E
primary	40.00	SE NE	8	33 S	31 E
primary	40.00	NE SE	8	33 S	31 E

primary	40.00	SW SE	8	33 S	31 E
primary	40.00	SE SE	8	33 S	31 E
Total	320.00 acres.				

COPY

Page 2

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times. The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

Actual construction work shall begin on or before March 14, 1990, and shall be completed on or before October 1, 1990. Complete application of the water to the use shall be made on or before October 1, 1991.

This permit is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

Issued this date, March 14, 1989.

SUGGESTED METHODS OF INSTALLING ACCESS PORTS, PRESSURE GAUGES,
AND AIR LINES FOR MEASURING WATER LEVELS IN WELLS

AN AIR LINE INSTALLATION IS RECOMMENDED WHERE THE WATER LEVEL LIES AT A CONSIDERABLE DEPTH BELOW LAND SURFACE. THE AMOUNT OF AIR PRESSURE THAT CAN BE BUILT UP INSIDE THE AIR LINE WILL BE EQUAL TO THE DEPTH OF WATER STANDING ABOVE THE BOTTOM OF THE AIR LINE. THE EXACT DEPTH OF THE BOTTOM OF THE AIR LINE IS REQUIRED TO OBTAIN AN ACCURATE MEASUREMENT OF THE WATER LEVEL IN THE WELL. ONE POUND PER SQUARE INCH PRESSURE EQUALS 2.31 FEET OF WATER.

STATE OF OREGON

INTEROFFICE MEMO

TO: Jake Szramek

FROM: Donn Miller ^{DM}

SUBJECT: Applications G-11858 and G-11859

DATE: Nov. 16, 1988

These applications seek to divert water from two wells in northern Catlow Valley. Both wells are on the order of 500' deep and largely penetrate sediments/sedimentary rocks of the valley fill. Some "hard rock" units are also described in the well reports. The static water levels are about 90' below land surface. Since the water-bearing units are not defined on the reports, I believe that the sediments are the source of water and form an unconfined aquifer.

The wells are both located at elevations of about 4560' above sea level. They are both about 10 miles to the southwest of the Donner and Blitzen River near Frenchglen. The elevation of the river there is approximately 4200 feet. A reconnaissance study by the USGS in 1984 speculates that the ground water flow direction in the northern part of Catlow Valley is from the well area to the Frenchglen area. This means that ground water would flow under a low topographic divide. This notion is reasonable.

I conclude that the aquifer in the context of these applications is in hydraulic connection with the Donner and Blitzen River but that any affect would be greatly delayed. The potential for substantial interference with the river is inconsequential both for these uses and current cumulative uses in this area.

Wayne Overcash posed the additional question: does the well as described in G-11859 meet well standards? My only source of information is the well report that the application supplied. I am not knowledgeable as to the current status of the well. The well does not meet standards which were in effect at the time of well completion (Jan. 1979). It did not have at least 12" of casing sticking up above land surface and the sealing material was bentonite not cement grout. Unless either deficiency is posing a current resource protection problem, they are insufficient grounds under current office policy to require the landowner to bring the well up to standards.

STATE OF OREGON WATER RESOURCES DEPARTMENT

Application for a Permit to Appropriate Ground Water

ASSIGNED

Carl Thomas

2055 S. Spencer #124

Las Vegas, NV 89119

I, VALMONT INDUSTRIES, INC.

(Name of Applicant)

of W. Highway #275

(Mailing Address)

Valley,

(City)

State of Nebraska

68064

(Zip Code)

Phone No. (402) 359-2201

do hereby

make application for a permit to appropriate the following described ground waters of the State of Oregon:

1. The development will consist of One Well

(Give number of wells, tile lines, infiltration galleries, etc.)

having a diameter of 20 inches

450

and an estimated depth of 450 feet.2. The well or other source is to be located 2650 ft. South and 1320 ft. East

(N. or S.)

(E. or W.)

from the North 1/4 corner of Section 8, T.33S., R.31E., W.M., Harney

(Public Land Survey Corner)

County, Oregon

(If there is more than one well, each must be described)

being within the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ ofSec. 8 Tp. 33 South R. 31 East, W.M., in the county of Harney

3. Location of area to be irrigated, or place of use if use other than irrigation.

Township	Range	Section	List $\frac{1}{4}$ $\frac{1}{4}$ of Section	List use and/or number of acres to be irrigated
33 S.	31 E.	8	NW, NE	40.0
			NE, NE	40.0
			SE, NE	40.0
			SW, NE	40.0
			NW, SE	40.0
			NE, SE	40.0
			SE, SE	40.0
			SW, SE	40.0
			Total =	320.0 acres

4. It is estimated that 20 feet of the well will require 0.375" stl. casing.

(Kind)

5. Depth to water table is estimated 90 ft. Well drilled by Osborn Drilling

(Feet)

Pasco, WA

License No. 708

200"	24
100"	10
620"	310
920"	

6. The amount of water which the applicant intends to apply to beneficial use is ...4.00..... cubic feet per second or .1795..... gallons per minute.

7. The use to which the water is to be applied island...irrigation...of...alfalfa...and.....
...other...hay...crops.....

8. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

N/A

9. If the location of the well, or other development work is less than one-fourth mile from a natural stream channel, give the distance to the channel and the difference in elevation between the stream bed and the ground surface at the source of development.

N/A

10.

DESCRIPTION OF WORKS

Include length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

Development consists of an existing 20" well, drilled in 1979, which
supplies two 1320 ft. radius irrigation pivots located 1/4 miles North
and South of said well, and as shown on the attached Water Rights
Application Map.

11. Construction work will begin on or before..... Well was drilled as of Jan. 10, 1979.

12. Construction work will be completed on or before..... Jan. 10, 1979

13. The water will be completely applied to the proposed use on or before..... Fall 1988 or 1989 crop season

14. If the ground water supply is supplemental to an existing supply, identify the supply and existing water right. N/A

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 4.0 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from one well

The use to which this water is to be applied is irrigation of 320.0 acres

If for irrigation, this appropriation shall be limited to 1/20 of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year;

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is October 10, 1988

Actual construction work shall begin on or before and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19.....

Complete application of the water to the proposed use shall be made on or before October 1, 19.....

WITNESS my hand this day of....., 19.....
