In accordance with ORS 537.409, the Department shall conduct a public interest review of an application submitted to store water in a reservoir that has a storage capacity of less than 9.2 acre-feet or a dam or impoundment structure less than 10 feet in height.

The review shall be limited to issues pertaining to:

- (a) Water availability;
- (b) Potential detrimental impact to existing fishery resources; and

In addition, the Department will review ORS Chapter 538 to determine if the source of water has been withdrawn from further appropriation and will conduct a review consistent with ORS Chapter 390.835 – Oregon's Scenic Waterway laws – to determine whether the use is prohibited.

Following this review, the Department shall issue a final order granting or denying the permit or granting the permit with conditions.

5. On April 14, 2026, the applicant amended the application to remove groundwater as a source.
6. An assessment of water availability at 50% exceedance for the proposed use was completed using the Department's Water Availability Reporting System. The assessment established that water is available from December 1 through March 31 of each year for the proposed use.
7. The Department relies on the Oregon Department of Fish and Wildlife's review and recommendations in determining whether a proposed use would pose a significant detrimental impact to existing fishery resources. The Department has determined that, if limited to January 1 through February 28/29, and as conditioned, the proposed use will not pose a significant detrimental impact to existing fishery resources.
8. The Department has determined that the proposed use, as conditioned, will not injure other water rights.
9. The Department has determined that the proposed source has not been withdrawn from further appropriation under ORS Chapter 538.
10. The proposed reservoir is not prohibited under ORS 390.835.
