

Request for Reconsideration of the Contents of a Proposed Certificate

(1) A request for reconsideration of the contents of a proposed certificate may be prepared by the permittee or landowner and submitted to the Department. The requests shall describe any disagreement with the contents of the proposed certificate.

(2) The request for reconsideration may be in the form of a phone call or personal contact, unless the disagreement proposes a change to any of the following:

- (a) The source of water;
- (b) The purpose for which the water is used;
- (c) The quantity of water;
- (d) The location of the points of diversion;
- (e) The location of the use;
- (f) The extent of the use; and
- (g) Any conditions imposed upon the use.

(3) If the disagreement results in a change to any item listed in subsections (2)(a) through (g) of this rule, the request for reconsideration shall be completed in writing. The request shall set forth the changes to the proposed certificate or the final proof map, and shall include any facts which support the request. Maps, photographs, affidavits, receipts or other such evidence may be included to support the request.

(4) The Director may allow reasonable time beyond the time limit set under OAR 690-330-0010(2) for a permittee or landowner to complete and submit a written request for reconsideration.

(5) Upon receipt of a request for reconsideration, the Director shall:

- (a) Approve the request without verification and issue a certificate with the changes included;
- (b) Schedule field verification of the requested changes; or
- (c) Deny the request by letter from Department staff to the requesting party.

(6) If field verification is scheduled, a new proposed certificate shall be prepared and sent as prescribed by OAR 690-330-0010.

(7) A request for reconsideration resulting from section (6) of this rule shall be approved or denied. If denied, the denial shall be in the form of an Order of the Director. The order shall provide for either issuance of a certificate of water right in conformance with the Director's findings, or for the scheduling of a contested case hearing as provided under OAR Chapter 690, Division 2.

Reference: Application No. G-12177, Permit No. G-12561 & Exchange File T-7265

Dear Ladies and Gentlemen:

The above referenced files were recently brought to my attention for review. Permit No. G-12561 authorizes the use of water from two wells for the irrigation of 92.5 acres. A Claim of Beneficial Use and Site Report (Report) was received in this office On September 27, 1999.

In review of our records, it appears that water is being exchanged under an agreement with Crook County Improvement District. While correspondence indicates the use of water under Permit No. G-12561 was intended to replace surface water under an exchange agreement, the permit was issued to irrigate land in Section 5. The Report does not confirm that water was actually used to irrigate the land authorized under the permit. Therefore, the use of water from Well No. 1, for the irrigation of the land in Section 5 is excluded from the proposed certificate.

Our records do not indicate any approval of the exchange of water as proposed by Exchange Application T-7265. You should consider submitting a new application for permit for replacement water in conjunction with the exchange request or file a permit amendment application for Permit G-12561 and a request for an extension of the time limits of the permit.

Please feel free to contact me if you have any questions regarding the proposed certificate. If you have any questions regarding the exchange file or a request for a permit amendment please contact Bernadette Williams, extension 275. If you have any questions regarding an extension of the time limits of the permit, you may contact Lisa Juul, extension 272.

Sincerely,

Steve Brown

NOTICE

Enclosed is a proposed certificate of water right and a map which illustrates the location of the right. The map and proposed certificate represent the extent water was used within the terms of the permit based upon a survey and inspection.

If you do not agree with the proposed certificate or the map, Oregon Administrative Rule 690-330-010 (2) allows the permittee or landowner 60 days from the mailing date of this notice to request the Department to reconsider the contents of the proposed certificate.

If you agree with the proposed certificate and map no response to this notice is required. Sometime after the 60 day period, the recorded certificate of water right will be mailed to you.

If you have any questions please contact Steve Brown at (503) 378-8455, extension 263.

COUNTY OF CROOK

PROPOSED CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

Northwest Farm Credit SVCS
P.O. Box 607
Redmond, OR 97756

Thomas G. Strand
Route 1, Box 53
Redmond, OR 97756

confirms the right to use the waters of WELL NO. 2 in the CROOKED RIVER BASIN for IRRIGATION OF 6.5 ACRES.

This right was perfected under Permit G-12561. The date of priority is JULY 16, 1990. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.081 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the well. The period of use under this right is March 1 through October 31 of each year.

The well is located as follows:

SW 1/4 NW 1/4, SECTION 8, TOWNSHIP 14 SOUTH, RANGE 14 EAST, W.M.; 3116 FEET NORTH AND 267 FEET EAST FROM THE SW CORNER OF SECTION 8.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

NW 1/4 NW 1/4	0.9 ACRE
SW 1/4 NW 1/4	5.6 ACRES
SECTION 8	
TOWNSHIP 14 SOUTH, RANGE 14 EAST, W.M.	

PROP.
CCE T
excluding
Well No. 1

Measurement, recording and reporting conditions:

- A. The water user shall install a meter or other suitable measuring device as approved by the Director. The water user shall maintain the meter or measuring device in good working order.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

Use of water under authority of this right may be regulated if analysis of data available discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The Director may require water level or pump test results every ten years.

Failure to comply with any of the provision of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

The right to use water for the above purpose is restricted to beneficial use, without waste, on the lands or place of use described. The water user is advised that new regulations may require use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds the use of water described by this right, as conditioned, will not impair or be detrimental to the public interest.

Dear Mr. Brown:

I do not agree with the proposed certificate. I would like to convene a meeting between yourself, me, and Kyle Gorman. I would also like to know what the status of T-7265 is and why it has taken approximately 8 years to process it.

I've been supplying water to the Lone Pine district in an equal amount for the lands as proposed in permit G-12561 and have irrigated them every year since 1996.

Sincerely,

Tom Strand

Dear Mr. Strand:

The Department is in receipt of your letter of March 25, 2003. Your letter does not contain the requirements of our administrative rules to be accepted. I am enclosing a copy of our rules to assist you in describing your disagreement with the proposed certificate mailed to you on February 27, 2003.

Any written request for reconsideration must be filed within 60 days from the date of mailing of the proposed certificate or within any additional time allowed as may be granted by the Department.

My letter of February 27, 2003, describes the process available to you in order to legally facilitate your exchange agreement. At this time the Department has not approved your exchange request and any irrigation of land not having a valid right of record is subject to regulation.

Please feel free to contact me if you have any questions and I will be happy to address any concerns you may have.

Sincerely,

Steve Brown

Request for Reconsideration of the Contents of a Proposed Certificate

(1) A request for reconsideration of the contents of a proposed certificate may be prepared by the permittee or landowner and submitted to the Department. The requests shall describe any disagreement with the contents of the proposed certificate.

(2) The request for reconsideration may be in the form of a phone call or personal contact, unless the disagreement proposes a change to any of the following:

- (a) The source of water;
- (b) The purpose for which the water is used;
- (c) The quantity of water;
- (d) The location of the points of diversion;
- (e) The location of the use;
- (f) The extent of the use; and
- (g) Any conditions imposed upon the use.

(3) If the disagreement results in a change to any item listed in subsections (2)(a) through (g) of this rule, the request for reconsideration shall be completed in writing. The request shall set forth the changes to the proposed certificate or the final proof map, and shall include any facts which support the request. Maps, photographs, affidavits, receipts or other such evidence may be included to support the request.

(4) The Director may allow reasonable time beyond the time limit set under OAR 690-330-0010(2) for a permittee or landowner to complete and submit a written request for reconsideration.

(5) Upon receipt of a request for reconsideration, the Director shall:

- (a) Approve the request without verification and issue a certificate with the changes included;
- (b) Schedule field verification of the requested changes; or
- (c) Deny the request by letter from Department staff to the requesting party.

(6) If field verification is scheduled, a new proposed certificate shall be prepared and sent as prescribed by OAR 690-330-0010.

(7) A request for reconsideration resulting from section (6) of this rule shall be approved or denied. If denied, the denial shall be in the form of an Order of the Director. The order shall provide for either issuance of a certificate of water right in conformance with the Director's findings, or for the scheduling of a contested case hearing as provided under OAR Chapter 690, Division 2.

Oregon Water Resources Department
Water Rights Division

Assignment

Water Rights Application
Number G-12177

Final Order

Application History

On July 16, 1990, THOMAS G STRAND submitted an application to the Department for a water use permit. On May 12, 1993, the application was assigned to NORTHWEST FARM CREDIT SERVICES, ACA, AND THOMAS G STRAND. The Department issued a Proposed Final Order on April 9, 1996. The protest period closed May 24, 1996, and no protest was filed.

The proposed use would not impair or be detrimental to the public interest, but the Department's continuing evaluation reveals that the Proposed Final Order requires modification to correctly describe the maximum quantity of water allowed.

Order

Application G-12177 therefore is approved as modified above, and Permit Number G-12561 is issued as limited by the conditions contained therein.

DATED July 8, 1996

for 
Martha O. Pagel
Director

Hearing and Appeal Rights

Under the provisions of ORS 537.170, the applicant may request a contested case hearing by submitting the information required for a protest under ORS 527.153(6) to the Department within 14 days after the date of mailing of this order as shown below. If a contested case hearing is requested, the Department must schedule one. In the contested case hearing, however, only those issues based on the above modifications to the proposed final order may be addressed.

Under the provisions of ORS 183.484, the applicant or any person having standing may appeal this order by filing a petition for review in the Circuit Court for Marion County or the circuit court for the county in which the applicant resides or has a principal business office. The petition for review must be filed within 60 days after the date this order is served.

(a) The maximum economic development of this state, the attainment of the highest and best use of the waters of the Deschutes - Upper Crooked River Basin, and the attainment of an integrated and coordinated program for the benefit of the state as a whole will be furthered through utilization of the aforementioned waters only for domestic, livestock, municipal, irrigation, power development, industrial, mining, recreation, wildlife and fish life uses and the waters of the Deschutes - Upper Crooked River Basin are hereby so classified.

(b) Applications for the use of the waters of the Deschutes - Upper Crooked River Basin shall not be accepted by any state agency for any other use and the granting of applications for such other uses is declared to be prejudicial to the public interest and the granting of applications for such other uses would be contrary to the integrated and coordinated program for the use and control of the water resources of the state.

(c) Structures or works for the utilization of the waters in accordance with the aforementioned classifications are also declared to be prejudicial to the public interest unless planned, constructed, and operated in conformity with the applicable provisions of ORS 536.310 and any such structures or works are further declared to be prejudicial to the public interest which do not give proper cognizance to the multiple-purpose concept.

(2) Water Quality

Rights to use of water for industrial or mining purposes granted by any state agency shall be issued only on condition that any effluents or return flows from such uses shall not interfere with other beneficial uses of water.

Lower Crooked River Basin

690-505-005

(1) Classifications

(a) The maximum economic development of this state, the attainment of the highest and best use of the waters of the Deschutes - Lower Crooked River Basin, and the attainment of an integrated and coordinated program for the benefit of the state as a whole will be furthered through utilization of the aforementioned waters only for domestic, livestock, municipal, irrigation, power development, industrial, mining, recreation, wildlife and fish life uses and the waters of the Deschutes - Lower Crooked River Basin are hereby so classified with the following exceptions:

(A) OAR 690-505-006, Lower Main Stem Deschutes River, adopted April 3, 1964, as modified by the Water Policy Review Board.

(B) No further appropriations of water except for domestic or livestock uses shall be made or granted by any state agency for the waters of Ochoco Creek and its tributaries.

(b) Applications for the use of the waters of the Deschutes - Lower Crooked River Basin shall not be accepted by any state agency for any other use and the granting of applications for such uses is declared to be prejudicial to the public interest and the granting of applications for such other uses would be contrary to the integrated and coordinated program for the use and control of the water resources of the state.

(c) Structures or works for the utilization of the water in accordance with the aforementioned classifications are also declared to be prejudicial to the public interest unless planned, constructed and operated in conformity with the applicable provisions of ORS 536.310 and any such structures or works are further declared to be prejudicial to the public interest which do not give proper cognizance to the multiple-purpose concept.

(2) Water Quality

Rights to use water for industrial or mining purposes granted by any state agency shall be issued only on condition that any effluents or return flows from such uses shall not interfere with other beneficial uses of water.

Note: The Upper Deschutes River, Middle Deschutes River, Lower Deschutes River, Upper Crooked River and Lower Crooked River Basins are delineated on State Water Resources Board Map, File 5.7014, available from the Water Resources Department.

Lower Main Stem Deschutes River

690-505-006

(1) Classifications

(a) The maximum beneficial use of that portion of the main stem of the Deschutes River from its confluence with the Columbia River to and including river mile 100.0 is for recreation, fish and wildlife purposes and no appropriations of water in this area shall be permitted except for domestic, livestock, irrigation of lawn or noncommercial garden not to exceed one-half acre in area, recreation, fish and wildlife uses.

(b) The maximum economic development of the state and the attainment of the highest and best use of the waters of the lower main stem Deschutes River from river mile 100.0 to river mile 120.0 and the attainment of an integrated and balanced program for the benefit of the state as a whole will be achieved through utilization of the aforementioned waters for domestic, livestock, irrigation of lawn or noncommercial garden not to exceed one-half acre in area, hydroelectric power, fish, wildlife, and recreation purposes and the aforementioned waters of the main stem Deschutes River are hereby so classified.

I (We) make application for a permit to appropriate the following described ground waters of the State of Oregon:

1. THE DEVELOPMENT (number of wells, tile lines, infiltration galleries, etc.): 2

If development is less than one mile from a natural stream, give the following:

Distance from development to stream:

Elevation difference between streambed and development:

NOTE: Wells must be constructed according to standards set by the department for the construction and maintenance of water wells. If the well is already constructed, please enclose a copy of the well driller's log with this application, and skip to Section 2 below.

Diameter of well: well # 1 12" # 2 16" # 3 16" Depth in feet: # 1 240' # 2 324'

Type and size of well casing: # 1 12" 240' # 2 16" 165' 12" 159' Steel No. of feet: # 1 240' # 2 324'

Estimated depth to water: # 1 98' # 2 150'

Type of access port or measuring device: steel plug

Wells to be drilled by: # 1 ORVAL Buckner # 2 old well drilled by unknown

Address: Redmond, Oregon

If the water well is flowing artesian, describe your water control and conservation works:

2. TOTAL AMOUNT OF WATER to be applied to beneficial use: 134K cubic feet per second, OR 600 gallons per minute. If water is to be used from more than one ground water source, give the quantity of water from each: # 1 550 gpm 1.255 # 2 50 gpm .114

3. INTENDED USE(s) OF WATER: irrigation

If for more than one use, give the quantity of water from each source for each use; _____

If for DOMESTIC use, state the number of households to be supplied; _____

If for MUNICIPAL OR QUASI-MUNICIPAL use, state the present population to be served, and an estimate of the future requirements; (List population projections, water needs, anticipated areas to be provided water.)

If for MINING use, state the nature (gold, silver, etc.) of the mines to be served; _____

If for IRRIGATION, or other land area use, state the TOTAL number of acres to be developed under each use;

Irrigation	<u>well # 1 86 Acres</u>
	<u>well # 2 6.5 Acres</u>
Other (describe)	_____

4. DESCRIPTION OF WATER DELIVERY SYSTEM: Include dimensions and type of construction of diversion works, length and dimensions of supply ditches or pipelines, size and type of pump and motor. If for irrigation, describe the type of system (i.e., flood, wheel line, hand line, drip, other).

1 3 handlines 3"-2-1000', 1-1300', 1 Pivot 1180' - 1180' 6" mainline, 1000' 5" mainline
2 2 handlines - 1-1000', 1-320' - 600' 4" mainline

5. PROJECT SCHEDULE: (List month and year)

Proposed date construction work will begin # 1
2
Proposed date construction work will be completed # 1 7-12-90
2 7-12-90
Proposed date water use will be completed 7-12-90

NOTE: A map prepared by a Certified Water Right Examiner (CWRE) and a complete legal description of the subject property are required under ORS 537.140 and OAR 690 as a part of your application. The legal description may be copied from your deed, title insurance policy, or land sales contract.

6. a) In the event any deficiencies are noted involving the application map enclosed herein, please return the map with instructions for correction to (check one):

☒ Applicant ☐ CWRE ☐ Other (Identify in REMARKS section)

b) In the event any deficiencies are noted involving the application, please return the application with instructions for correction to (check one):

☒ Applicant ☐ CWRE ☐ Other (Identify in REMARKS section)

7. Are all lands involved (including the proposed diversion site, place of use, and access for conveying the water) under your ownership? yes. If not, list in the REMARKS section below, or on an attached sheet, the names and mailing addresses of the legal owners of all property involved in the proposed development.

NOTE: Prior to receiving a certificate of water right, the permit holder must submit to the Water Resources Department the results of a pump test meeting the department's standards. The Director will require water level or pump test results every ten years thereafter.

REMARKS: _____

I/We certify that the information I have provided in this application is an accurate representation of the proposed water use and is true and correct to the best of my knowledge.

NOTE: The permit, when issued, is for the beneficial use of water without waste. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible the land use you propose may not be allowed if it is not in keeping with the goals and acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

SW 1/4 NW 1/4	6.0 ACRES

SECTION 8

TOWNSHIP 14 SOUTH, RANGE 14 EAST, W.M.

Application G-12177 Water Resources Department

PERMIT G-12561

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the wells shall begin within one year from permit issuance and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

In the Matter of Transfer Application
T-7265, Crook County, Oregon

) ORDER WITHDRAWING A
) TRANSFER APPLICATION

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

Thomas G. Strand
18880 NW Lone Pine Lane
Terrebonne, OR 97760

Transfer Application T-7265, in the name of Thomas G. Strand, was filed September 30, 1994. On May 11, 2006, Thomas G. Strand requested that Transfer Application T-7265 be withdrawn.

Now, therefore, it is ORDERED:

Transfer Application T-7265, in the name of Thomas G. Strand, is withdrawn and of no further force or effect. Any unearned fees will be refunded.

Dated at Salem, Oregon this 15th day of May, 2006.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2).

Pursuant to ORS 536.075 and OAR 137-004-080 and OAR 690-01-005, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Attached:

Dear Jeremy,

Mr. Chuck Hegele was in this date to discuss the status of the above referenced file. Mr. Hegele stated, since the installation of a new pump in the Strand well, two of his wells and one of his neighbors wells have been influenced by Strand's well.

I am not asking you to do anything at this time, only to inform you of his visit and my advice to file any complaint with you or the groundwater/hydrology section and the Department would respond to his complaint and he would have the appropriate avenues to challenge any action or non-action taken.

As always, I asked he work through you with any issues regarding his neighbors well(s) and if he had any concerns about your actions to contact Kyle.

Steve

Oregon Water Resources Department
Water Rights Division

Water Rights Application
Number G-12177

Final Order
Extension of Time for Permit Number G-12561

Appeal Rights

This is a final order other than contested case. Pursuant to ORS 536.075 and OAR 137-004-080 and OAR 690-01-005 you may either petition the Director for reconsideration of this order or petition for judicial review of this order. As provided in ORS 536.075, this order is subject to judicial review under ORS 183.484. Any petition for judicial review of the order must be filed within the 60 day time period specified by ORS 183.484(2).

Application History

On SEPTEMBER 4, 2003, THOMAS G. STRAND submitted an application to the Department for an extension of time for permit number G-12561. The Department issued permit number G-12561 on JULY 8, 1996. The permit called for completion of construction of the water development project by OCTOBER 1, 1998, and complete application of water to the full beneficial use by OCTOBER 1, 1999. In accordance with OAR 690-315-0050(2), on OCTOBER 21, 2003, the Department issued a Proposed Final Order proposing to extend the time to complete construction of the water development project and the time to fully apply water to beneficial use to OCTOBER 1, 2004.

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.230, 537.248, 537.630, 539.010(5) and/or OAR 690-315-0040(2).

Order

The extension of time for Application Number G-12177, Permit Number G-12561, therefore, is approved. The deadline for completing construction is extended to OCTOBER 1, 2004. The deadline for applying water to full beneficial use is extended to OCTOBER 1, 2004.

DATED: March 16, 2004

Paul R. Cleary, Director

NOTE: *Include a copy of the "Important Notice" document along with the original copy of the Final Order being sent to the permit holder.*

RE: Protest to Permit G 12561; Application G 12177

Dear Mr. Hegele:

Thank you for visiting the Oregon Water Resources Department, I was glad to have had a chance to meet with you to discuss your protest of the above-captioned application. As we discussed at our impromptu meeting on February 10, the issues you raised in your letter are likely not within the Department's authority to resolve. After reading your letter carefully and considering the comments you provided, I will reiterate this conclusion and am now returning your \$250.00 fee to you.

With regard to the water quality concerns you raise, these issues are not within the scope of the Department's authority to consider when processing a water right extension request. I suggest that you contact the Oregon Department of Environmental Quality or the Oregon Department of Human Services, Drinking Water Program, if you continue to have concerns regarding water quality in the "canal." In addition, the issues you discuss in your letter with regard to possible injury you assert would be sustained as a result of this "exchange" or "transfer" are inapplicable to the Department's current actions on this application. In this case the Department is proposing to approve an extension of time so that Mr. Strand can continue to perfect his water right. No exchange of water or transfer is pending with this request. If you have concerns regarding possible injury to a water right you may have, please call the watermaster in your district, Jeremy Giffin (541) 388-6669. As I am sure you are aware, senior water rights are protected against junior water rights in Oregon.

Let me know if you have any further questions, I would be happy to discuss this further with you: (503) 986-0824.

Sincerely,

Renee Moulun

Protest Program Coordinator

REFERENCE: Application #G-12177 (Permit #G-12561)

Dear Permit Holder:

As you are aware, on October 21, 2003, the Department issued a proposed final order in accordance with Oregon Administrative Rule (OAR) Division 690, Chapter 315 to grant an extension of time in which to complete construction and accomplish full beneficial use of water under Permit #G-12561 through October 1, 2004.

The Department received a protest to the proposed final order for extension of Permit #G-12561 and the protest fee from Travis Hegele on December 5, 2003. I have enclosed a copy of the protest for your reference.

The Department will first try to reach an informal negotiated resolution with both participants. If this approach fails, the Department will then proceed with a formal hearing process.

If you have any questions or concerns regarding the protest, you may contact me by telephone at (503) 986-0824.

Sincerely,

Renee Moulun

Dear Mr. Hegele:

As you are aware, on October 21, 2003, the Department issued a proposed final order in accordance with Oregon Administrative Rule (OAR) Division 690, Chapter 315 to grant an extension of time in which to complete construction and accomplish full beneficial use of water under Permit #G-12561 through October 1, 2004.

The Department hereby acknowledges receipt of your protest to the proposed final order for extension of Permit #G-12561 issued on October 21, 2003. Your protest and the appropriate fee were received in the Salem office of the Water Resources Department on December 5, 2003. A copy of your receipt numbered 64684 is enclosed for your reference.

The Department will first try to reach an informal negotiated resolution with both participants. If this approach fails, the Department will then proceed with a formal hearing process.

If you have any questions, you may contact me by telephone at (503) 986-0824.

Sincerely,

Renee Moulun

Re: Permit # G-12561 and Application # G-12177

WATER RESOURCES DEPT
SALEM, OREGON

Renee,

I would like to take this opportunity to formally protest the above stated water transfer an/or exchange. I am submitting the following information and would like this information to be made into this applications permanent record. Please feel free to contact me if you have any questions.

Approximately 8 years ago Mr. Strand applied for a transfer and/or water exchange for the above subject property. On February 27, 2002 I questioned Mr. Strand, who is the chairman of the board, at a Crook County Improvement District #1 meeting if his water exchange had been completed. He stated that his exchange was in compliance. On October 30, 2001 Charles Hegele had previously expressed concern about the exchange being approved at a Crook County Improvement District #1 meeting. Kyle Gorman, of the Oregon Water Resources, attended this meeting. As we now know, the original exchange was never approved, and the Oregon Water Resources Department has sent Mr. Strand several letters stating that his exchange has never been approved. On March 25, 2003 Mr. Strand sent your department a letter regarding application # G-12177 Permit #G-12561 and Exchange File T-7265 stating that he has been using this water for approximately 8 years. According to my estimates, this would account for over 77 million gallons of water in which Mr. Strand has used without your departments approval. Mr. Strand has continually neglected to supply documentation as to how he has replaced this water. If needed, I can supply documentation of my requests for this information.

In the matter of the application for extension of time for Permit # G-12561, water right application #G-12177 please be advised of the following;

In respect to the 11 page proposed final order received from the Water Resources Department regarding this application we are questioning the following;

- 1) Page 3 of 11, Line Item 7 indicates that \$53,700 of capitol improvements have previously been made for the proposed water distribution system. However, no documentation has been provided in reference to this monetary amount. We are requesting that this information be supplied.
- 2) How is this exchange going to be monitored. Mr. Strand has not previously made this information available.

SAR

Environmental Consulting LLC
10818 NW St. Helens Hwy.
Portland, OR 97231
(503) 519-3604

- 3) The applicant has made no attempt to insure the water quality being exchanged meets the states requirements for surface water contaminants.
- 4) Mr. Strand is not in compliance of state regulations regarding mitigating the impacts on surrounding wells in the vicinity.
- 5) Within 3000 feet of Mr. Strands proposed exchange well, over the past 3 years 4 private wells have had to be extended to lower depths to maintain domestic demand.
- 6) It is my belief that 2003 was the first year in which Mr. Strand utilized his exchange well to irrigate the subject property. A residence is located approximately 100 feet from this exchange well and this year the private well located on this property failed to meet domestic demand. The existing well had been in operation for many years. This is the first time in which the well had failed to meet demand.

In closing I believe it is relevant to state that Mr. Strand is Chairman of the Board of Crook County Improvement District #1. I believe that this creates a conflict of interest regarding this water exchange. Mr. Strand has previously demonstrated that he has no intentions of following Water Resource regulations. He further has submitted documentation regarding his noncomplying water usage regarding the subject property. Mr. Strand has continuously neglected to respond to letters from your department over the last 5 years. I furthermore believe that this exchange could dramatically impact the water table in the Lone Pine vicinity and further research needs to be conducted to assess the groundwater impacts.

Respectfully submitted,

Travis Hegele BSEH 503-519-3604

Application for Extension of Time

In the Matter of the Application	)	
for an Extension of Time for	)	
Permit #G-12561, Water Right	)	PROPOSED FINAL ORDER
Application #G-12177	)	
(Thomas G. Strand)	)	

Permit Information

Application File #G-12177 / Permit #G-12561

Basin: #05 - Deschutes Basin / Watermaster District: #11

Date of Priority: July 16, 1990

Authorized Use of Water

Source of Water:	Two Wells in the Crooked River Basin
Purpose or Use:	Irrigation of 92.5 acres
Maximum Rate:	1.16 cubic foot per second (cfs)

This Extension of Time request is being processed in accordance
with Oregon Administrative Rule Chapter 690, Division 315.

Please read this Proposed Final Order in its entirety.

This Proposed Final Order applies only to Permit #G-12561, water right Application #G-12177. A copy of Permit #G-12561 is enclosed as Attachment 1.

Summary of Proposed Final Order for Extension of Time

The Department proposes to:

- grant the extension for complete construction of the water system from October 1, 1998, to October 1, 2004; and
- grant the extension for complete application of water from October 1, 1999, to October 1, 2004.

AUTHORITY

1. ORS 537.230 and ORS 537.630(1) provide in pertinent part that the Water Resources Department shall, for good cause shown, order an extension of time within which irrigation or other works shall be completed or the right perfected. In determining the extension, the Department shall give due weight to the considerations described under ORS 539.010(5).
2. OAR 690-315-0040 provides that the Department may approve an extension of time to complete construction and/or apply water to full beneficial use pursuant to ORS 537.230 and/or 537.630, or to begin construction pursuant to ORS 537.248.

FINDINGS OF FACT

Background

3. Permit #G-12561 was granted by the Water Resources Department on July 8, 1996. The permit authorizes the use of up to 1.16 cfs of water from two wells, in the Crooked River Basin, for irrigation of 92.5 acres. The permit specified that construction of the water development project was to be completed by October 1, 1998, and that complete application of water was to be made on or before October 1, 1999.

4. The permit holder submitted an "Application for Extension of Time" to the Department on September 4, 2003, requesting the time in which to complete construction of the water system be extended from October 1, 1998, to October 1, 2004, and the time in which to accomplish beneficial use of water to the full extent under the terms of Permit #G-12561 be extended from October 1, 1999, to October 1, 2004. This is the first permit extension requested for Permit #G-12561.
5. Notification of the extension of time request for Permit #G-12561 was published on the Department's Public Notice dated September 16, 2003. No public comment on the extension application was received.

Review Criteria [OAR 690-315-0040]

As set forth under OAR 690-315-0040, the time limits to complete construction or to apply the water to a beneficial use may be extended upon showing of good cause for the untimely completion. This determination shall consider the applicable requirements of ORS 537.230, 537.248¹, 537.630 and 539.010(5).

Start of Construction [ORS 537.630]

6. Construction of the wells and water system began within the time specified in the permit, being July 8, 1997.

Financial Investment and Cost to Appropriate and Apply Water to a Beneficial Purpose [ORS 539.010(5), OAR 690-315-0040(2)(b)]

7. As of September 4, 2003, the permit holder had invested a total of \$53,700 into the project, consisting of construction of two wells, installation of a meter on each well, and installation of the water distribution system including pumps and mainline pipe. An additional \$7,500 investment is anticipated for the completion of this project.

Reasonable Diligence and Good Faith of the Appropriator [ORS 537.230(1), 537.630(1) and 539.010(5)]

Reasonable diligence during the permit period constitutes a continuing test of whether and under what conditions to grant an extension [ORS 537.260, OAR 690-315-0040(3)].

¹ ORS 537.248 applies to reservoir permits only.

In accordance with OAR 690-315-0040(3), the Department shall consider, but is not limited to, the following factors when determining whether the applicant has demonstrated reasonable diligence in previous performance under the permit:

The amount of construction completed within the time allowed in the permit or previous extension; the amount of beneficial use made of the water during the permit or previous extension time limits; water right permit holder conformance with the permit or previous extension conditions; and financial investments made toward developing the beneficial water use.

8. Construction of the wells and water system began within the time specified in the permit, being July 8, 1997.
9. As of September 4, 2003, the following work was accomplished: complete construction of two wells, installation of a meter on each well, and installation of the water distribution system including pumps and mainline pipe.
10. Since the issuance of Permit #G-12561 on July 8, 1996, the permit holder has appropriated 270.0 gallons per minute (0.78 cfs) of water from the wells for irrigation of 60.0 acres of land.
11. Delay of full beneficial use of water under Permit #G-12561 was due, in part, to the Department's failure to take action on the permit holder exchange application (T-7265) in a timely manner. In order to resume development of Permit #G-12561, the permit holder recently decided to reconfigure the water delivery system in order to alleviate the need for approval of the exchange application.
12. Based upon information contained in the permit record, the permit holder is in compliance with all permit and previous extension conditions.
13. As of September 4, 2003, the permit holder had invested approximately 87 percent of the total projected cost for complete development of this project. A total of \$53,700 has been invested into the project, consisting of construction of two wells, installation of a meter on each well, and installation of the water distribution system including pumps and mainline pipe. An additional \$7,500 investment is anticipated for the completion of this project.

The Market and Present Demands for Water (ORS 539.010(5), OAR 690-315-0040(4))
In accordance with OAR 690-315-0040(4)(a)(b)(c), the Department shall consider, but is not limited to, the following factors when determining the market and the present demand for water or power to be supplied:

The amount of water available to satisfy other affected water rights and scenic waterway flows; special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d); and the habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife.

14. The authorized points of appropriation, under Permit #G-12561, are located within or above the Deschutes State Scenic Waterway and within the Deschutes Ground Water Study Area.
15. The points of appropriation are also above a portion of the Deschutes River that: contains instream water rights; has been identified by the Oregon Department of Fish and Wildlife as a "high" needs ranking area for streamflow restoration for fish; has been designated a sensitive, threatened or endangered species area for aquatic species utilizing surface water resources; has been identified by the Oregon Department of Environmental Quality as water quality limited; and has been designated a federal wild and scenic river.
16. When Permit #G-12561 was issued in July 1996, the Department concluded that the proposed use would not have the potential for substantial interference with surface water. However, pursuant to ORS 390.835(9)(g), the Department included a condition that provides for the regulation of the use of water upon finding a preponderance of evidence that the proposed use of ground water will "measurably reduce" the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife. Permit #G-12561 is also conditioned to provide for regulation for senior water rights.
17. Since the issuance of Permit #G-12561, the Department, in conjunction with the United States Geological Survey, completed a ground water study quantifying a hydraulic connection between ground water and surface water within the Deschutes Ground Water Study Area. Based in part on the study, in September 2002, the Water Resources Commission adopted rules under

OAR Chapter 690, Division 505 to implement the provisions of the Scenic Waterway Act regarding mitigation. [ORS 390.835(9) through (12)]

18. As part of the OAR Chapter 690, Division 505 rules, the Commission determined that the "measurably reduce" standard in ORS 390.835(12) had been triggered and that holders of existing ground water rights in the Deschutes Ground Water Study Area that were specifically conditioned to allow for regulation for scenic waterway flows may choose to provide mitigation (meeting the standards of the rules) in order to avoid future regulation.
19. The Commission's OAR Chapter 690, Division 505 rules also establish a comprehensive mitigation program monitoring structure. Under the rules, the Department shall evaluate ground water appropriations, streamflow, and mitigation activity in order to determine whether scenic waterway flows and instream water right flows in the Deschutes Basin continue to be met on at least an equivalent or more frequent basis as compared to long-term, representative base period flows.

If the evaluation described above indicates the mitigation program is resulting in scenic waterway flows and instream water right flows in the Deschutes Basin being met less frequently as compared to long-term, representative base period flows, then the Commission is required to initiate proceedings to designate all or portions of the Deschutes Ground Water Study Area as a critical ground water area(s) under ORS 537.730, immediately close certain areas of the Deschutes Basin to further ground water appropriations, or take other administrative action(s) to ensure scenic waterway flows and instream water right flows in the Deschutes Basin continue to be met on at least an equivalent or more frequent basis as compared to long-term, representative base period flows.

In accordance with OAR 690-315-0040(d)(e)(f), the Department shall also consider the following factors when determining the market and the present demand for water or power to be supplied:

The economic investments in the project to date; other economic interests dependant on completion of the project; and other factors relevant to the determination of the market and present demand for water and power.

20. As of September 4, 2003, the permit holder had invested approximately 87 percent of the total projected cost for complete development of this project. A total of \$53,700 has been invested into the project, consisting of

construction of two wells, installation of a meter on each well, and installation of the water distribution system including pumps and mainline pipe. An additional \$7,500 investment is anticipated for the completion of this project.

21. There is no evidence in the record regarding other economic interests dependent on completion of the project.
22. No other factors relevant to the determination of the market and present demand for water and power have been identified.

Fair Return Upon Investment *ORS 539.010(5), OAR 690-315-0040(2)(f)*

23. Use from the permitted water development will result in reasonable returns upon the investment made to date.

Duration of Extension *ORS 539.010(5), OAR 690-315-0040(1)(c)*

As set forth under OAR 690-315-0040(1)(c), time extensions granted shall be for the reasonable time period necessary to complete construction and application of water to beneficial use.

24. As of September 4, 2003, the remaining work to be accomplished consists of complete construction of the water distribution system and complete application of water to beneficial use.
25. Given the amount of development left to occur, the permit holder has requested to have until October 1, 2004, to complete construction of the water system and to complete the application of water to beneficial use under the terms of Permit #G-12561.

Other Governmental Requirements *ORS 537.230(2), OAR 690-315-0040(2)(g)*

26. Delay in the development of this project was not caused by any other governmental requirements.

Unforeseen Events *OAR 690-315-0040(2)(h)*

27. Unforeseen events extended the length of time needed to fully develop and perfect the permit, caused mainly by the Department's failure to take action

on the permit holder's exchange application (T-7265) in a timely manner. In order to resume development of Permit #G-12561, the permit holder recently decided to reconfigure the water delivery system in order to alleviate the need for approval of the exchange application.

Conclusions of Law

1. The applicant is entitled to apply for an extension of time to complete construction and/or completely apply water to the full beneficial use pursuant to ORS 537.230 and ORS 537.630.
2. The applicant has submitted a complete extension application form and the fee required by ORS 536.050(1)(k), as required by OAR 690-315-0040(1)(a).
3. The applicant demonstrated that actual construction on the project began within the time specified in the permit, as required by OAR 690-315-0040(1)(b).
4. Completion of construction and full application of water to beneficial use can be completed by October 1, 2004.² [OAR 690-315-0040(1)(c)]
5. The applicant has pursued perfection of the right in good faith and prosecuted construction with reasonable diligence.
6. The Department has considered the requirements of other governmental agencies, the financial investment made, the reasonable diligence and good faith of the appropriator, the market and present demands for water and the fair return upon the investment, and has determined that the applicant has shown good cause exists for an extension to complete construction and apply water to full beneficial use pursuant to ORS 537.630(1). [OAR 690-315-0040(1)(d)]

² Pursuant to ORS 537.630(3), upon the completion of beneficial use of water allowed under the permit, the permittee shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permittee shall submit a map of the survey and the claim of beneficial use.

Proposed Order

Based upon the foregoing findings of fact and conclusions of law, the Department proposes to issue an order to:

Extend the time for complete construction of the water system under Permit #G-12561 from October 1, 1998, to October 1, 2004; and

Extend the time for complete application of water to beneficial use under Permit #G-12561 from October 1, 1999, to October 1, 2004.

DATED: October 21, 2003

Dwight French
Water Rights Section Manager

Proposed Final Order Hearing Rights

1. Under the provisions of OAR 690-315-0060, the applicant or any other person adversely affected or aggrieved by the proposed final order may request a contested case hearing on the proposed final order. Your request for contested case hearing must be in writing and must be received by the Water Resources Department no later than Friday, December 5, 2003, being 45 days from the date of publication of the proposed final order in the Department's weekly public notice.
2. A written request for contested case hearing shall include:
 - a. The name, address and telephone number of the petitioner;
 - b. A description of the petitioner's interest in the final order and if the protestant claims to represent the public interest, a precise statement of the public interest represented;
 - c. A detailed description of how the action proposed in the final order would adversely affect or aggrieve the petitioner's interest;
 - d. A detailed description of how the final order is in error or deficient and how to correct the alleged error or deficiency;

- e. Any citation of legal authority supporting the petitioner, if known;
 - f. Proof of service of the petition upon the water right permit holder, if petitioner is other than the water right permit holder; and
 - g. The protest fee required under ORS 536.050.
3. Within 60 days after the close of the period for requesting a contested case hearing, the Director shall:
- a. Issue a final order on the extension request; or
 - b. Schedule a contested case hearing if a request for contested case hearing has been submitted, and:
 - A. Upon review of the issues, the Director finds there are significant disputes related to the proposed agency action; or
 - B. The applicant submitted a timely request for a contested case hearing.

RE: Deschutes Ground Water Mitigation Rules, Division 505
Deschutes Basin Mitigation Bank and Mitigation Credit Rules, Division 521

Dear Water Right Permit Holder:

Our records indicate that you are the holder of a ground water permit issued by the Department after July 17, 1995, in the Deschutes Basin Ground Water Study Area (Study Area). Your permit (or subsequent certificate) was issued with a condition allowing for regulation of use if it was later determined that the use would "measurably reduce" scenic waterway flows in the Deschutes River.

As you may be aware, the Department has been working over the last several years to develop administrative rules that address the impact of ground water use in the Study Area upon surface water flows—specifically those flows designated for the Deschutes Scenic Waterway and Instream Water Rights. Recently, the Department finalized the Deschutes Ground Water Mitigation Rules and Deschutes Basin Mitigation Bank and Mitigation Credit Rules. The rules were adopted by the Water Resources Commission (WRC) on September 13, 2002, and were effective on September 27, 2002. Copies of the rules can be obtained from the Department's web page at:

<http://www.wrd.state.or.us/law/oar1999.shtml>

The primary purpose of the rules is to provide a mechanism for those with pending ground water use applications in the Study Area to mitigate for the impact of their proposed ground water use on surface water flows. The rules do not require those with existing conditioned ground water permits (or subsequent certificates) in the Study Area to mitigate for their ground water uses.

While only those requesting new ground water uses from the Department are required to provide mitigation, the rules provide an opportunity for holders of existing conditioned permits to provide mitigation. Holders of existing conditioned permits that provide mitigation will no longer be subject to future regulation for scenic waterway flows.

Department staff are presently working internally to develop the processes and structure to implement the new rules. While you are not required to mitigate for your ground water use, we will be sending you a letter, sometime within the next several months, letting you know what you would need to do if you choose to mitigate for your ground water use. You may also receive additional information updates from the Department in our effort to keep you informed.

If you have any questions about the new administrative rules for the Deschutes Basin and the mitigation opportunity described in the rules; or would like to request a copy of the new rules, please contact Laura Snedaker at (503) 378-8455, extension 331, or by e-mail at Laura.K.Snedaker@wrd.state.or.us.

Sincerely,

Paul R. Cleary
Director

To: Oregon Water Resource Department
Att: Steve Brown
Re: Application # G-121177, Permit #G-12561 and Exchange File T-7265
CC: Lone Pine Irrigation District

Gentleman,

I am formally protesting the above applications and am requesting to be notified of the board meeting regarding this issue and wish to attend the meeting. I am also requesting the disciplinary action taken against Mr. Strand for irrigating without an approved permit.

- 1) I have previously stated at the COI and Lone Pine Irrigation districts board meeting that I felt it was unethical for Mr. Strand to flush his irrigation pivot into the irrigation canal after injecting agricultural chemicals into his pivot. He stated that he has been performing this action for "years." However, this information was not entered into the minutes of the board meeting. I believe this is in direct violation of the Resource Conservation and Recovery Act. (40 CFR)
- 2) It was recently brought to my attention by Mr. Russell, a Lone Pine Water User, at a public meeting that he is concerned about the water quality at the Lone Pine School. I share his concern regarding this issue. I have also received a letter from the Oregon Water Resource Department stating that Mr. Strand has applied to extend his water exchange permit application. The application states that Mr. Strand would like to pump ground water from a well into the irrigation canal for his water exchange. This canal flows throughout the Lone Pine Valley. There are numerous shallow domestic wells located in the surrounding area. I feel before the wells are allowed to discharge water into our irrigation canals the water should be tested for quality and regulatory compliance. I also believe that it is common practice to allow the districts irrigation tail water to enter into the Crooked River. Therefore, any potential contaminants generated by the water exchange could potentially enter the Crooked River. I have volunteered to induce nontoxic food grade dye into the canal to confirm if our tailwater actually entering into the Crooked River. However, Mr. Strand objected to this proposal.

*Tom P. & Garry
Wilson talked to
Mr. Hargrave
called, up phone
w/ Mr. Hargrave
10-29-03*

- 3) I have also requested the electric meter readings from Mr. Strand's exchange well and have been denied this request. I would like to again request this information under Oregon Public Records Laws. If Mr. Strand would like to presume his proposed water exchange I believe that he first needs to provide documentation of how he has replaced the water which he has already taken. I also believe that he needs to provide a method of monitoring the water quality of his exchange wells.

At a previous water board meeting I asked the board how much water we actually use a year and Mr. Strand replied 3.5 acre feet of water. This would mean, using Mr. Strand's figure, that he has irrigated 69 acres for 9 years using 3.5 acre feet of water. This is equivalent to approximately 77 million gallons of water. How can the water exchange be documented without the makeup wells meter reading? I personally live in Lone Pine and drive the road past Mr. Strand's makeup wells frequently and have not yet witnessed them operating.

I am interested in working with Mr. Strand and Mr. Russell to ensure that the quality and quantity of our water will be preserved for future generations.

Respectfully submitted,

Chuck Hegele

To: Oregon Water Resources Department
At: Renee Moulon
Re: Permit # G-12561 and Application # G-12177

Renee,

I would like to take this opportunity to formally protest the above stated water transfer an/or exchange. I am submitting the following information and would like this information to be made into this applications permanent record. Please feel free to contact me if you have any questions.

Approximately 8 years ago Mr. Strand applied for a transfer and/or water exchange for the above subject property. On February 27, 2002 I questioned Mr. Strand, who is the chairman of the board, at a Crook County Improvement District #1 meeting if his water exchange had been completed. He stated that his exchange was in compliance. On October 30, 2001 Charles Hegele had previously expressed concern about the exchange being approved at a Crook County Improvement District #1 meeting. Kyle Gorman, of the Oregon Water Resources, attended this meeting. As we now know, the original exchange was never approved, and the Oregon Water Resources Department has sent Mr. Strand several letters stating that his exchange has never been approved. On March 25, 2003 Mr. Strand sent your department a letter regarding application # G-12177 Permit #G-12561 and Exchange File T-7265 stating that he has been using this water for approximately 8 years. According to my estimates, this would account for over 77 million gallons of water in which Mr. Strand has used without your departments approval. Mr. Strand has continually neglected to supply documentation as to how he has replaced this water. If needed, I can supply documentation of my requests for this information.

In the matter of the application for extension of time for Permit # G-12561, water right application #G-12177 please be advised of the following;

In respect to the 11 page proposed final order received from the Water Resources Department regarding this application we are questioning the following;

- 1) Page 3 of 11, Line Item 7 indicates that \$53,700 of capitol improvements have previously been made for the proposed water distribution system. However, no documentation has been provided in reference to this monetary amount. We are requesting that this information be supplied.
- 2) How is this exchange going to be monitored. Mr. Strand has not previously made this information available.

SAR

Environmental Consulting LLC
10818 NW St. Helens Hwy.
Portland, OR 97231
(503) 519-3604

- 3) The applicant has made no attempt to insure the water quality being exchanged meets the states requirements for surface water contaminants.
- 4) Mr. Strand is not in compliance of state regulations regarding mitigating the impacts on surrounding wells in the vicinity.
- 5) Within 3000 feet of Mr. Strands proposed exchange well, over the past 3 years 4 private wells have had to be extended to lower depths to maintain domestic demand.
- 6) It is my belief that 2003 was the first year in which Mr. Strand utilized his exchange well to irrigate the subject property. A residence is located approximately 100 feet from this exchange well and this year the private well located on this property failed to meet domestic demand. The existing well had been in operation for many years. This is the first time in which the well had failed to meet demand.

In closing I believe it is relevant to state that Mr. Strand is Chairman of the Board of Crook County Improvement District #1. I believe that this creates a conflict of interest regarding this water exchange. Mr. Strand has previously demonstrated that he has no intentions of following Water Resource regulations. He further has submitted documentation regarding his noncomplying water usage regarding the subject property. Mr. Strand has continuously neglected to respond to letters from your department over the last 5 years. I furthermore believe that this exchange could dramatically impact the water table in the Lone Pine vicinity and further research needs to be conducted to assess the groundwater impacts.

Respectfully submitted,

Travis Hegele BSEH 503-519-3604

✓ 8. Conditions of Permit: Original "A" Date: 7-8-97

• Before Use begins → shall install a meter or other suitable meas. device.
• "Fj" condition - SWW.

✓ 9. Extension request received: 9-4-03 Request Number (...1st 2nd, 3rd): 1st

✓ 10. Last Authorized "B" Date: 10-1-98 Last Authorized "C" Date: 10-1-99

✓ 11. Proposed "B" Date: 10-1-2004 Proposed C Date: 10-1-2004

✓ 12. Amount Invested to date: \$53,700.⁰⁰ Estimated Total Cost: \$61,200.⁰⁰

(***Estimated Remaining Cost: \$7,500.⁰⁰)

✓ 13. The water project development made to date has been accomplished in accordance with the terms and conditions contained in the permit. Yes / No ***If "No"..... What permit terms and/or conditions have not been met?

• Meter has been installed on well.

• "A" Date = met.

#1 Well drilled 5-20-88 (See Pump Test Report) received 9-27-99

✓ 14. Work on the water development project completed to date includes: See ALSO COBU received 9-27-99

• Constructed wells • meter installed on each well • installation of the main line to water distribution system for irrigation installed.
• Used 350 gpm (0.78 cfs) • Irrigated 60.0 ac • pumps installed on each well

✓ 15. The work remaining to be completed consists of:

• Completion of construction • Full beneficial use of water.

✓ 16. Progress in perfecting the permit is being held up by:

• Have been held up by WRD not yet taking action on Mr. Strand's "exchange" application.

✓ 17. Has the applicant pursued perfection of the right in good faith and with reasonable diligence? Yes / No

Some Factors that may be considered in determining "Reasonable Diligence" [OAR 690-315-040(3)]

- The amount of construction completed within the time allowed in the permit or previous extension;
- The amount of beneficial use made of the water during the permit or previous extension time limits;
- Water right permit holder conformance with the permit or previous extension conditions; and
- Financial investments made toward developing the beneficial water use.

• Have invested approx 87% of total proj. cost
• Have used approx. 68% of total allowed "Q."
• Have irrigated approx. 65% of permitted lands
• Have complied with conditions.

✓ 18. Determination of the market and the present demand for water or power to be supplied:

Some factors to consider in determining the Market and the Present Demand for water or power [OAR 690-315-040(4)]:

- The amount of water available to satisfy other affected water rights and scenic waterway flows;
- Special water use designations established since permit issuance (such as...state scenic waterways, federal wild and scenic rivers, serious water management problem areas, water quality limited sources, etc.);
- The habitat needs of sensitive, threatened or endangered species, in consultation with ODFW;
- Economic investment in the project to date;
- Other economic interests dependent on completion of the project; and
- Other factors relevant to the determination of the market and the present demand for water or power.

• Within a "HIGH" needs ranking area (ODFW) for flow restoration for fish
• Is within an ODFW ST&E Area
• Is within a SWW
• Is a federal wild & scenic river.
• Is within the DESC GW Study Area
• Is within a DEC water quality limited area.

✓ 19. Based on the Written record, can the Department make a finding of "Good Cause" to approve the extension request?

Yes... "Good Cause" can be found. → Approval of Extension Request

No ... "Good Cause" cannot be found. → Denial of Extension Request

✓ 20. Conditions to be included on Extension PFO:

~~Desc GW Study Area language~~ No Conditions Not a condition

Extension "PFO" Dates

OREGON WATER RESOURCES DEPARTMENT

Commerce Building
158 12th Street NE
Salem OR 97301-4172

PUBLIC NOTICE OF WATER USE REQUESTS September 16, 2003

*This notice is also available on our web page at the following address:
http://www.wrd.state.or.us/cgi-bin/notices.pl?water_rights*

This publication lists agency activities requiring public notice. It also describes public comment processes and deadlines. Types of water use requests in this week's Public Notice include:

- * **Permit Application Initial Reviews, Proposed Final Orders, and Final Orders**
Applications for permits to use, store, divert or pump surface water or groundwater. Includes applications by the state Departments of Fish & Wildlife, Environmental Quality or Parks and Recreation for water to be used and kept in-channel.
- * **Applications for Extensions of Time to Perfect Water Right Permits**
New applications received and proposed final orders regarding requests to extend time limits to fully develop water use projects and beneficially apply water.
- * **Extension of Time Checkpoint Progress Reports filed pursuant to OAR Chapter 690, Division 320**
- * **Proposed Final Orders Regarding Applications for Extensions of Time for Water Right Permits**
- * **Applications for Limited Licenses**
Requests to use water for 5 years or less. Licenses are subordinate to other rights and may be revoked if a use is found to injure other water right holders.

The Public Notice is published each week on the Department's web site at <http://www.wrd.state.or.us/>. If you would like to receive a *free* weekly notification when it is published, please send your request to "Jonnine.L.FUSS@ wrd.state.or.us".

Permit Application Initial Reviews and Proposed Final Orders

The following pages of this notice list permit applications that the Oregon Water Resources Department is evaluating for compliance with state water laws and regulations. Public participation and comment is encouraged. Opportunities for public involvement vary according to the stage of the permit evaluation.

Initial Review Stage (IR in the "Stage" column of the permit listing)

The Department has given the applicant the results of an initial review of water use restrictions, water availability and other limits that affect the agency's decision on whether to issue a permit. The applicant has asked the agency to proceed to the next stage of evaluation. The Department welcomes comments from interested persons, agencies and organizations on the proposed water use.

The comment deadline for initial reviews appearing in this public notice is 5pm, Thursday, October 16, 2003.

Although we cannot respond individually to all comments, each will be considered as the agency makes its permit decision.

Proposed Final Order Stage (PFO in the "Stage" column of the permit listing)

The proposed final order is the Department's preliminary decision on the water use request. It will indicate how the comments received on the application in the first stage were considered. The PFO documents the agency's decision through specific findings. If appropriate, it includes a draft permit specifying any conditions or restrictions on the use.

Persons interested in receiving a mailed copy of a PFO must pay a statutorily-required fee of \$10. (Any person paying \$10 to receive a PFO by mail will also receive a copy of the Final Order when it is issued.) PFO's may be viewed for free at the Department's Salem Office or at the district watermaster office nearest the proposed use.

Those disagreeing with the Department's decision as expressed in the PFO have 45 days to file a protest.

The protest deadline for proposed final orders appearing in this public notice is 5pm, Friday, October 31, 2003.

The protest filing fee is \$200 for everyone except the applicant. Detailed requirements for filing a protest will be sent with copies of the PFO. Persons who support the PFO may file a "standing" fee of \$50 to retain the ability to participate in future proceedings relating to an application. Before participation is allowed, an additional \$150 will be required at the time of the proceeding.

How to Read the Listing

Applications on the next page are sorted by application number in the following format:

App#	Basin	Source	Township/Range	County	Priority	Quantity	Stage	Status

**Applications for Extensions of Time
to Perfect Water Right Permits filed pursuant to OAR 690-315**

Consistent with OAR 690-315-0050, the Department will accept public comment on the following extension applications until October 16, 2003. Following the comment period, the Department will prepare and issue a proposed final order. Individuals who would like a copy of the proposed final order may request copies by sending a request and \$7.00 (the estimated copy fee charge). Please indicate the file number. Copies of the proposed final order may be viewed at the Department and/or self copied for a lesser charge. Individuals wishing to obtain a copy of the extension application should contact the Department by phone or in person as extension application materials can range between four to fifty pages.

Extension file information is included in the following format:

- (a) Applicant name and address;
- (b) County of application
- (c) Amount of water use permitted in gallons per minute (gpm), cubic feet per second (cfs) or acre feet (af) of storage;
- (d) Common name of water source(s) listed in the permit;
- (e) Application Number - Permit number;
- (f) Use allowed in the permit;
- (g) Proposed extended date of completion as requested by the extension applicant

**Extension of Time Checkpoint Progress Reports filed pursuant to OAR
Chapter 690, Division 320**

Consistent with OAR 690-320-0010(10), the Department will accept public comment on the following Extension of Time Checkpoint Progress Reports for 30 days from the date of this notice. Comments must be in writing and must indicate the application file and permit numbers. Following the comment period, the Department shall review evidence to determine whether or not the permit holder has been diligent in developing and perfecting the water use permit and has complied with all terms and conditions of the permit and/ or extension of time. Additionally, the Department will provide notice of its determination to anyone who has submitted comments.

Extension file information is included in the following format:

- (a) Permit holder's name and mailing address
- (b) Application File Number / Permit Number
- (c) County of use
- (d) Quantity of permitted water use in gallons per minute (gpm), cubic feet per second (cfs) or acre-feet (af)
- (e) Common name of water source(s) listed in the permit;
- (f) Use of water allowed under the permit;
- (g) Current authorized extension date ("C" Date)

Proposed Final Orders Regarding Applications for Extensions of Time for Water Right Permits

ORS 537.320, 537.248 and 537.630 authorize the Water Resources Department to extend time limits contained in water rights permits for completing construction of water development projects and applying water to full beneficial use. Procedures for permit holders to apply for extensions and for the Department to evaluate and determine whether or not to approve extensions of time are contained in OAR 690-320-0010 for extensions filed before July 1, 2001, and in OAR 690-315-0010 for extensions filed on or after July 1, 2001.

Proposed Final Orders (PFOs) are the Department's preliminary decision on extension requests. They document the agency's decision through specific findings. Persons interested in receiving a mailed copy of a PFO must pay a statutorily-required fee of \$2 for the first page and 50 cents for each additional page. These proposed orders are generally seven pages in length. (Any person paying \$10 to receive a PFO by mail will also receive a copy of the Final Order when it is issued.) PFO's may be viewed for free at the Department's Salem Office or at the appropriate district watermaster office.

Extension of Time Public Notice and Comment Procedures

Written comments on or written protests against a PFO must be submitted on or before October 31, 2003. There is no fee for submission of comments. However, protests shall include the \$25 fee as required by ORS 536.050 (1)(j) and raise all reasonably ascertainable issues and available arguments supporting the person's position by the close of the comment period.

1.) OAR-690-320

County of Use:	YAMHILL
Application File Number:	R-80297
Permit Number:	R-11739
Applicant:	MICHAEL W HINTERMEYER
Address:	13501 FORD RD, GASTON, OR 97119
River Basin:	WILLAMETTE BASIN
Water Source:	SPRINGS & HAY CREEK, TRIBUTARIES OF TURNER CREEK
Authorized Use of Water:	STORED WATER TO BE APPROPRIATED UNDER PERMIT # S-52053 FOR IRRIGATION OF 12.0 ACRES & LIVESTOCK WATERING
Maximum Diversion/ Appropriation Rate:	1.4 ACRE-FEET, BEING 0.2 AF IN POND #1, 1.0 AF IN POND #2, & 0.2 AF IN POND #3
Recommendation:	The Department proposes to issue an order to approve the extension for complete construction of the water system from October 1, 1998, to October 1, 2005; and approve the extension for complete application of water from October 1, 1999 to October 1, 2005.

County of Use: YAMHILL
Application File Number: R-80298
Permit Number: R-52053
Applicant: MICHAEL W HINTERMEYER
Address: 13501 FORD RD, GASTON, OR 97119
River Basin: WILLAMETTE BASIN
Water Source: THREE RESERVOIRS (BEING PONDS
#1, #2, & #3), TO BE CONSTRUCTED
UNDER PERMIT #R-11739,

LIVESTOCK WATERING
Maximum Diversion/
Appropriation Rate: 1.4 ACRE-FEET, BEING 0.2 AF IN
POND #1, 1.0 AF IN POND #2, & 0.2
AF IN POND #3
Recommendation: The Department proposes to issue an order to
approve the extension for complete construction of the water
system from October 1, 1998, to October 1, 2005; and approve the
extension for complete application of water from October 1, 1999
to October 1, 2005.

Applications for Limited Licenses

A limited license allows the right to use or store water for no more than 5 consecutive years. Use of water under a limited license is subordinate to all other authorized uses and may be shut-off at any time to satisfy those other uses. In addition, the Department may revoke a limited license if its use causes injury to any other water right or minimum perennial streamflow.

Licensees must maintain a record of how much water they are using (ORS 537.143). The Department may approve a license after September 30, 2003, upon finding that the proposed water use will not impair or be detrimental to the public interest (OAR 690-340-030). The public may comment on injury to existing water rights caused by allowing use of water under the terms of a limited license.

PHONE

owner of record, or duly authorized agent, of Application No. G-12177, Permit No. G-12561,
do hereby request that the time in which to:

- • complete the construction of diversion/appropriation works and/or purchase and installation of the equipment necessary to the use of water, which time now expires on October 1, 1998, be extended to October 1, 2004,

and/or the time in which to:

- • accomplish beneficial use of water to the full extent under the terms of the permit, which time now expires on October 1, 1999, be extended to October 1, 2004.

NOTE:

The extension of time requested should be long enough to finish the project. Should this request be approved, it will be the Department's expectation that you will complete your project within the new time period allowed. Future extensions may not be granted.

Attached is an instruction sheet to assist you in completing the information on the permit extension application form. Oregon Water Law and Administrative Rules requires this information to be considered by the Water Resources Department when reviewing a permit extension application. All items must be completed or the application will be returned. Please feel free to provide the Department with any additional information that would aid us in making our decision. Please use additional sheets of paper as needed to fully respond to the questions.

After reviewing the application form and the instruction sheet, if you have any questions, you may contact the Department at (503) 378-3739, and request assistance from the Water Rights Division, permit extensions personnel.

1. Did water system construction/well drilling begin within the time specified in the permit [yes/no]?
yes
2. Has construction of diversion/appropriation works, distribution system, and use of water, if any, been accomplished consistent with the limitations and conditions of this permit [yes/no]?
yes

- A) Please describe how you have complied with each applicable permit condition (**NOTE: the instruction sheet for permit extension applications provides some direction as to what is an "applicable" condition at time of permit extension review**).

A meter has been installed on the well.
The conditions have been complied with.

- B) If you have not complied with all applicable conditions, please explain the reasons why and indicate a date certain, in the near future, by which time you will be in compliance with applicable conditions.

3. I have accomplished the following described works, purchases and installation of equipment necessary to the use of water under said permit:

- A) Within the past year or, if a prior extension was authorized, during the last permit extension period:

Installed all necessary equipment to irrigate
the property, just waiting for the exchange
approval from the Water Resources Dept.

- B) Prior to the past year or, if a prior extension was authorized, prior to the last extension period:

4. I have accomplished beneficial use of water under the permit to the extent of (amount of water used and acres irrigated):

A) Quantity of Water Used [in cubic feet per second (cfs) or gallons per minute (gpm) if using surface water or ground water.....and/or..... in acre-feet (af) if using stored water]:

ability to irrigate 60 acres
350 gallons per minute and up to 3 af/acre
on the acres irrigated.

B) Number of Acres Irrigated (if an irrigation permit):

60 acres

7
0 5. Cost of project to date \$53,700. Estimated remaining cost to complete the project \$7500.00.

6. Please list the reasons why the project was not constructed, and/or water not beneficially used within permit time limits under the appropriate categories below. Please provide supporting information for each reason identified:

A) The project is of a size and scope that the original intent was to phase it in over a period longer than the timeframes allowed in the permit.

The project was on schedule. I have been delayed by the Department's failure to decide or take action on my exchange application. I'm therefore re configuring the delivery system to alleviate the need for an exchange and is doing so, I will need 1 more year to complete.

- B) Financing and/or cash-flow needs to develop the project precluded completion of the project within authorized timeframes.

N/A

- C) Good faith attempts to comply with permit conditions and/or to acquire permits from other agencies, or otherwise comply with government regulations, delayed completion of the project.

N/A

- D) Acts of God or other unforeseen events delayed full development of the water system and use of water.

N/A

I am the permittee, or have authorization from the permittee, to apply for an extension of time under this permit. I understand that false or misleading statements in this extension application are grounds for the Department to suspend processing of the request and/or reason to deny the extension.

WATER RIGHT PERMIT EXTENSIONS
WATER RESOURCES DEPARTMENT
158 12th STREET NE
SALEM, OREGON 97301-4172

STATE OF OREGON

COUNTY OF CROOK

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

THOMAS G STRAND
RT 1 BOX 53
TERREBONNE, OREGON 97760

(541) 548-5747

NORTHWEST FARM CREDIT SERVICES, ACA
PO BOX 607
REDMOND, OREGON 97756

(541) 548-2126

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-12177

SOURCE OF WATER: TWO WELLS WITHIN THE CROOKED RIVER BASIN

PURPOSE OR USE: IRRIGATION OF 92.5 ACRES

VOLUME OF USE: 1.16 CUBIC FOOT PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: JULY 16, 1990

POINT OF DIVERSION LOCATION: SW 1/4 NW 1/4, NW 1/4 SW 1/4, SECTION 8, T14S, R14E, W.M.; WELL 1 - 1348 FEET NORTH AND 33 FEET EAST; WELL 2 - 3116 FEET NORTH AND 267 FEET EAST, BOTH FROM THE SW CORNER OF SECTION 8

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SE 1/4 NW 1/4	20.0 ACRES
NE 1/4 SW 1/4	23.5 ACRES
SW 1/4 SW 1/4	28.5 ACRES
SE 1/4 SW 1/4	14.0 ACRES
SECTION 5	

NW 1/4 NW 1/4	0.5 ACRE
SW 1/4 NW 1/4	6.0 ACRES

SECTION 8

TOWNSHIP 14 SOUTH, RANGE 14 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

WATER RESOURCES DEPT
SALEM, OREGON

PAGE 3

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the wells shall begin within one year from permit issuance and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

RE: Transfer Application T-7265

Dear Mr. Hegele:

Enclosed is the Department's September 16, 2003, public notice of water use requests. Please note that Mr. Strand has applied for an extension of time to perfect Permit G-12561. Mr. Strand's development of water use under the permit will lead to withdrawal of transfer application T-7265.

Sincerely,

Greg Nelson

MEMORANDUM

Date: October 15, 2003
To: Application #G-12177 (Permit #G-12561)
From: Lisa Juul, Permit Extension Review
Subject: Third party complaint

On April 24, 2003, Chuck Hegele (third party) sent a letter raising issues that Application #G-12177 (Permit #G-12561) and exchange file #T-7265 do not follow ORS 536, 537, 540, 545 and OAR 690-330-0010 requirements. It does not appear that the Department responded to this letter.

Per Renee Moulun (WRD Protest Coordinator), if a complaint or request for reconsideration (under OAR 690-320) goes longer than 60 days with no action, the request is deemed denied.

Further, the third party complaint does not address the Extension of Time application for Permit #G-12561 (Application #G-12177).

Re: Formal Protest

Dear Mr. Brown:

I am registering a formal complaint against application #G-12177 permit No. 6-12561 and exchange file No. T-7265. I believe that some of information in these files is wrong, and I also believe that they do not follow ORS-536, 537,540,545, and OAR 690-330-0010 requirements. In my opinion they should not be allowed as submitted.

Thank you.

REFERENCE: File G-12177

This letter is in regard to your water use Permit g-12561. As we pointed out to you in our letter of January 16, 1999, your claim of beneficial use must be received in this office by **September 28, 1999.**

Oregon Administrative Rule 690-14-190 states: "The claim of beneficial use shall be submitted to the Department within one year after the use was reported..as being complete...Failure to comply with this section shall cause the Director to initiate permit cancellation proceedings as provided by ORS 537.260."

The "claim" consists of a site report and map of the developed use prepared by a Certified Water Rights Examiner, which accompany a request from the permittee for issuance of a certificate of water right.

You are hereby notified that unless your claim is received on or before **September 28, 1999**, your permit will be canceled without further notice.

If you have any questions, please contact the Water Rights Section.

Sincerely,

DALLAS MILLER

Reference: Files G-12177

Dear Mr. Strand:

I have had the opportunity to review your application file with Bruce Estes. Please let me know if Mr. Estes is authorized to act on your behalf and I will work with him to complete the necessary requirements for your proposed use of water.

It appears that your groundwater application, in part, proposes to exchange the use of groundwater for surface water. If this is the case, it will be necessary to submit an application for exchange of water, in addition to Application G-12177. I am enclosing forms for your use to submit such a request.

After completion of the technical requirements of the exchange application, it will need to be reviewed by the Water Resources Commission prior to approval.

I apologize for the delay in response to your request. Please feel free to contact me if you have any questions and I will be happy to address any concerns you may have.

Respectfully,

Steve Brown
Water Rights Program Analyst

N/A The applicant has certified that the information provided in the application is an accurate representation of the proposed use and is true and correct to the best of their knowledge.

S No oath is required because application was filed before June 5, 1992.

S Application fees:

Examination fee:	\$ 200	10-100
Recording fee:	\$ 266	83-166
TOTAL REQUIRED	\$ 466	
TOTAL SUBMITTED	\$ 466	
AMOUNT DUE prior to issuance of permit	\$ —	
AMOUNT OVERPAID	\$ —	
refund due applicant	\$ —	

S Proposed dates of beginning and completion of construction, and complete application of water.

S A satisfactory map of the proposed place of water use prepared by a certified water right examiner, unless exempt under OAR 690-14-150(3).

N/A A CWRE map is not required for applications filed before November 9, 1987.

- U A written copy of the legal description of the property on which the water is to be used.
- A copy of written authorization, contract or easement permitting access to the land or reservoir not owned by the applicant.
- N/A No statement of ownership was required for applications filed before August, 1990.
- N/A The report from watermaster has been received.
- S The proposed use is not restricted or prohibited by statute.
- S The source of water is not withdrawn from appropriation by order of the State Engineer or Water Resources Commission, or legislatively withdrawn under ORS Chapter 538.
- S IRRIGATION use⁹ is/are classified uses⁹ under the LOWER CROOKED RIVER Basin Program, OAR 690 - 505-005 (1)(a)
- U The application, map and supporting data are complete and free of defects.

Land Use Compatibility:

As expressed by the Planning Department of CROOK COUNTY

- N/A The land uses to be served by proposed water uses (including proposed construction) are allowed or are not regulated by the local comprehensive plan (ordinance section _____).
- N/A The land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals which have been obtained.
- S The local government was notified, and sent no comment pursuant to the rules at the time; land use was presumed in compliance per such statement printed on the application.

For ground water applications:

- S A copy of the constructor's log, if available, for any well already constructed, or required information regarding actual or anticipated construction.
- S The report from groundwater section has been received.

For reservoir applications:

- N/A Plans, specifications and supporting information for the dam and impoundment area.

STATE OF OREGON
WATER RESOURCES DEPARTMENT
WATER RIGHTS DIVISION

Before the Director of the Water Resources Department

In the matter of	)	PROPOSED
Groundwater Application	)	FINAL
G-12177 submitted by	)	ORDER
THOMAS G STRAND AND		
NORTHWEST FARM CREDIT		
SERVICES, ACA		

FINDINGS OF FACT

Water Use Request

1. THOMAS G STRAND AND NORTHWEST FARM CREDIT SERVICES, ACA requested use of 1.34 CUBIC FEET PER SECOND (CFS), BEING 1.123 CFS FROM WELL #1 FOR IRRIGATION OF 86.0 ACRES AND 0.11 CFS FROM WELL 2 FOR IRRIGATION OF 6.5 ACRES, of water from TWO WELLS LOCATED IN THE CROOKED RIVER BASIN within the Deschutes basin.
2. The area of proposed use is in Crook County within SECTIONS 5 AND 8, TOWNSHIP 14 SOUTH, RANGE 14 EAST, W.M.
3. The water delivery system is described by the applicant as follows: Well #1 contains three 3 inch handlines, two of which are 1000 feet long and 1 that is 1300 feet long. There is one pivot being 1180 feet. It also consists of 1180 feet of 6 inch mainline and 1000 feet of 5 inch mainline. Well #2 contains two handlines. One is 1000 feet long and the other is 320 feet long. There is also 600 feet of 4 inch mainline.
4. The request was made in Application G-12177 which was received by the Water Resources Department on July 16, 1990.

Affected Waters

1. This proposed use of groundwater is above a State Scenic Waterway.
2. There are no senior water rights from this point of appropriation.

Department Actions

1. The application was determined to be complete and not defective.
2. The Department determined, based upon OAR 690-09, that the proposed groundwater use will not have the potential for substantial interference with the nearest surface water source, namely CROOKED RIVER.
3. An Initial Review of the application was completed and a report of the results of that review was mailed to the applicant on JANUARY 9, 1996.

4. The Initial Review determined:
 - a. IRRIGATION OF 92.5 ACRES is allowed under the Deschutes Basin Program, [OAR 690-505-005(1)(a)].
 - b. The use is not prohibited by Statute.
 - c. Water for the proposed use is likely available in the amounts requested for the period MARCH 1 through OCTOBER 31.
 - d. The use would not injure existing water rights.
5. The report of Initial Review listed these determinations and disclosed a number of conditions and restrictions that would likely be included in the permit if issued. These conditions and restrictions are listed in the attached draft permit.
6. The applicant did not notify the Department to stop processing this application within 14 days after the report was mailed as provided in ORS 537.150(5).
7. The Department proceeded with processing the application and on JANUARY 23, 1996, published notice of the application in its weekly Public Notice of Water Rights.
8. At the close of the 30 day comment period provided in ORS 537.150(7), the Department had not received comments on the application.

Assessment

1. In proceeding with evaluation of Application G-12177, the following criteria were found to be relevant by the Department.
 - a. The Deschutes Basin Program (OAR Chapter 690, Division 505)
 - b. The Crook County Comprehensive Plan and Zoning Ordinance
 - c. Groundwater availability as determined by the Groundwater/Hydrology staff (OAR Chapter 690, Division 9)
 - d. The Scenic Waterway Act ORS 390.835 (8) Groundwater related applications
 - e. The established rate and duty for the proposed use
 - f. Pending, senior applications and existing water rights of record
 - g. An application for Exchange of Water and the required fees must be completed

CONCLUSIONS OF LAW

1. Based upon continued evaluation, the Department finds the determinations of the Initial Review remain valid.
2. Based on data received, the Department has determined that at this time the Department is unable to find that there is a preponderance of evidence that the proposed use of ground water will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife. The Department has further determined that, to protect the resource, an additional condition(s) on the proposed water use is necessary.

The condition, as further described on the attached draft permit, would require that the use may be regulated if analysis of data available after the permit or certificate is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

3. Water may be appropriated for irrigation from March 1 through October 31.
4. The Department finds that no more than 1.34 CFS would be necessary for the proposed use. The amount of water requested, 1.34 CFS, BEING 1.123 CFS FROM WELL #1 FOR IRRIGATION OF 86.0 ACRES AND 0.11 CFS FROM WELL #2 FOR IRRIGATION OF 6.5 ACRES, is allowed for the proposed use.
5. The application was filed prior to the adoption of OAR 690-05, therefore the submission of land use information with the application is not required.
6. The proposed use would not conflict with existing water rights, and, if exercised in accordance with law, rule, and the proposed conditions would not result in injury to existing water users.
7. The proposed use complies with all other rules of the Commission.
8. Pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly, and given the findings listed above, a rebuttable presumption has been established that the use will not impair or be detrimental to the public interest if exercised in the manner described in the attached draft permit.
9. Therefore, the proposed use, as conditioned, and described in the attached draft permit, would not impair or be detrimental to the public interest.

PROPOSED ORDER

IT IS PROPOSED that Application G-12177 in the name of THOMAS G STRAND AND NORTHWEST FARM CREDIT SERVICES, ACA be approved for the use of 1.34 CUBIC FOOT PER SECOND, BEING 1.123 CFS FROM WELL #1 FOR IRRIGATION OF 86.0 ACRES AND 0.11 CFS FOR IRRIGATION OF 6.5 ACRES, from two wells located within the Deschutes Basin as provided in the attached draft permit.

DATED April 9, 1996

Steven P. Applegate
Administrator

Water Rights and Adjudications Division

NOTICE:

This Proposed Final Order is issued by the Department pursuant to Chapter 416, Oregon laws, 1995, enacted by the 68th Oregon Legislative Assembly.

To seek changes in this proposed final order, you must file a formal protest.

Formal protests to this proposed final order must be made in proper form and accompanied by the statutory fee in the amount of \$200. Note: The applicant is not subject to this fee.

For other than the applicant, if you agree with the findings in this proposed order, but wish to maintain your right to participate in any contested case proceeding or judicial review, you must file a written request for standing. Requests for standing in proceedings relating to this application must be made in the proper form and accompanied by the statutory fee in the amount of \$50.

Protests or requests for standing, along with the appropriate fees must be received by the Water Resources Department in Salem, Oregon by 5:00 pm on May 24, 1996.

Only the applicant and any persons who timely file a protest or request for standing may participate in further proceedings before the Department or the Commission which deal with this Application.

DRAFT
STATE OF OREGON

COUNTY OF CROOK

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

THOMAS G STRAND
RT 1 BOX 53
TERREBONNE, OREGON 97760

(541) 548-5747

NORTHWEST FARM CREDIT SERVICES, ACA
PO BOX 607
REDMOND, OREGON 97756

(541) 548-2126

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-12177

SOURCE OF WATER: TWO WELLS WITHIN THE DESCHUTES BASIN

PURPOSE OR USE: IRRIGATION OF 92.5 ACRES

VOLUME OF USE: 1.34 CUBIC FOOT PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: JULY 16, 1990

POINT OF DIVERSION LOCATION: WELL #1 - NW 1/4 SW 1/4, SECTION 8, T14S, R14E, W.M.; 1348 FEET NORTH AND 33 FEET EAST FROM SW CORNER, SECTION 8, WELL #2 - SW 1/4 NW 1/4, SECTION 8, T14S, R14E, W.M.; 3116 FEET NORTH AND 267 FEET EAST FROM SW CORNER, SECTION 8

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SE 1/4 NW 1/4 20.0 ACRES
NE 1/4 SW 1/4 23.5 ACRES
SW 1/4 SW 1/4 28.5 ACRES
SE 1/4 SW 1/4 14.0 ACRES
SECTION 5

NW 1/4 NW 1/4 0.5 ACRE
SW 1/4 NW 1/4 6.0 ACRES
SECTION 8
TOWNSHIP 14 SOUTH, RANGE 14 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance, and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

Issued _____, 199__

DRAFT

Water Resources Department
Director

CONTRACT OF SALE

THIS AGREEMENT, made this 1st day of December, 1976,
by W. A. BUCKNER and DORIS BUCKNER, husband and wife, herein called SELLER,
and THOMAS G. STRAND and CAROL J. STRAND, husband and wife, herein called
BUYER.

WITNESSETH:

Seller agrees to sell to buyer and buyer agrees to purchase
that certain land, and all improvements thereon, situated in Crook
County, State of Oregon, as described on EXHIBIT "A" attached hereto
and made a part hereof.

1. PURCHASE PRICE AND TERMS:

The purchase price of the property which buyer agrees to
pay, shall be the sum of FIVE HUNDRED THOUSAND and no/100 DOLLARS
(\$500,000.00) payable as follows:

- (a) The sum of \$120,000.00 which is paid upon
execution hereof.
- (b) The remaining balance of \$380,000.00 shall
be paid in annual installments of not less
than \$37,278.00 each including interest at the
rate of 7 1/2 percent per annum on the
unpaid balances, the first of such install-
ments to be paid on or before the 5th day of
January, 1978, and subsequent installments
to be paid on or before the 5th day of each
January thereafter until the entire
purchase price, including both principal and
interest is paid in full.

Interest on all unpaid balances shall commence
on the 1st day of January, 1977.

MENT PRIVILEGES:

Prior to January 5, 1980 buyer may not make any additional
payment on this contract without prior written consent of seller.

RECEIVED

APR 28 1993

WATER RESOURCES DEPT.
SALEM, OREGON

Thereafter, buyer shall have the privilege of increasing any annual payment or prepaying the whole consideration, or any part thereof, at any time; provided that no additional payments shall be credited as regular annual payments provided for in this agreement.

3. POSSESSION:

Buyer shall be entitled to possession of the premises as of December 15, 1976. Seller shall have until January 5, 1977, to remove his possessions therefrom.

4. TAXES:

All taxes levied against the above described property for the current year shall be prorated between seller and buyer as of January 1, 1977. Buyer agrees to pay when due all taxes which are hereafter levied against the property and all public, municipal and statutory liens which may be hereafter lawfully imposed upon the premises. Until a change is requested, all tax statements shall be sent to the following address: Thomas G. & Carol J. Strand, Lone Pine, Oregon.

5. INSURANCE:

Buyer agrees to keep the buildings on said premises insured against loss by fire or other casualty in not less than the following amounts:

1. Dwelling House	\$15,000.00
2. Garage and Shop	\$ 1,500.00
3. Potato Cellar	\$15,000.00
4. Hay Shed	\$15,000.00
5. 1965 Van Dyke trailer	\$ 3,000.00
6. 1969 Chevrolet feed truck	\$ 3,000.00

All policies shall be issued with loss payable to the parties hereto as their interests appear at the time of loss with priority in payment to seller. Any amount received by seller under the insurance in payment of a loss shall be applied upon the unpaid balance of the purchase price and shall reduce said unpaid balance to the extent of the amount of the insurance payment received by seller. All uninsured losses shall be borne by buyer, on or after the date buyer becomes entitled to possession.

In the event buyer fails to pay, when due, any amounts required of him to be paid hereunder, by the terms of this contract, seller may pay any or all such amounts. If seller makes any such payments, the amounts thereof shall be added to the purchase price of the property on the date such payments are made by seller and such amounts shall bear interest at the rate of 10% per annum.

6. IMPROVEMENTS, ALTERATIONS AND REPAIRS:

Buyer agrees that all improvements now located or which shall hereafter be placed on the premises, shall remain a part of the real property and shall not be removed at any time prior to the expiration of this agreement without the written consent of seller. Buyer shall not commit or suffer any waste of the property, or any improvements thereof, or alterations thereof, and shall maintain the property, and all improvements thereon and all alterations thereof, in good condition and repair.

7. TITLE INSURANCE:

Seller shall furnish at his expense a Purchaser's title

insurance policy in the amount of \$500,000.00 within a reasonable time from the date hereof insuring buyer against loss or damage sustained by him by reason of the unmarketability of seller's title, or liens or encumbrances thereon, excepting matters contained in usual printed exceptions in such title insurance policies, easements, conditions and restrictions of record and encumbrances herein specified, if any.

8. COVENANTS OF TITLE:

Seller covenants that he is the owner of the above described property free of all encumbrances except as set forth on EXHIBIT "A". The Parties specifically understand and agree that the premises is presently mortgaged as set forth in paragraphs 5, 6 and 7 of the preliminary title report No. 30416 issued by the Central Oregon Title & Loan Company. Seller agrees to keep the mortgages in good standing and not to permit the same to become in default. In the event seller neglects to make any payments required by said mortgages, buyer may do so and claim such payment as a credit against the next succeeding annual payment due under the terms of this contract.

9. DELIVERY OF DEED:

Upon payment of the entire purchase price for the property, as provided herein, and performance by buyer of all other terms, conditions and provisions hereof, seller shall forthwith execute and deliver to buyer a good and sufficient deed conveying said property free and clear of all liens and encumbrances, except as above provided and those placed upon the property or suffered by buyer subsequent to the date of this agreement.

10. DEFAULT PROVISIONS:

In the event buyer shall fail to perform any of the terms of this agreement, time of payment and performance being of the essence, seller shall, at his option, subject to the requirements of notice as herein provided, have the following rights:

- (a) To foreclose this contract by strict foreclosure in equity.
- (b) To declare the full unpaid balance of the purchase price immediately due and payable.
- (c) To specifically enforce the terms of this agreement by suit in equity.
- (d) To declare this agreement null and void as of the date of the breach and to retain as liquidated damages the amount of the payment theretofore made upon said premises. Under this option all of the right, title and interest of the buyer shall revert and revest in seller without any act of re-entry or without any other act by seller to be performed, and buyer agrees to peaceably surrender the premises to seller, or in default thereof buyer may, at the option of seller, be treated as a tenant holding over unlawfully after the expiration of a lease and may be ousted and removed as such.

11. NOTICE:

Buyer shall not be deemed in default for failure to perform any covenant or condition of this contract, other than the failure to make payments as provided for herein, until notice of said default has been given by seller to buyer and buyer shall have failed to remedy said default within thirty (30) days after the giving of the notice. Notice for this purpose shall be deemed to have been given by the deposit in the mails of a certified letter containing said

notice and addressed to buyer at Lone Pine, OR

12. ATTORNEY FEES:

In case litigation is instituted arising directly or indirectly out of this contract, the losing party shall pay to the prevailing party his reasonable attorney fees.

13. REPRESENTATIONS:

Buyer certifies that this contract of purchase is accepted and executed on the basis of his own examination and personal knowledge of the premises and opinion of the value thereof; that no attempt has been made to influence his judgment; that no representations as to the condition or repair of said premises have been made by seller or by any agent of seller; that no agreement or promise to alter, repair, or improve said premises has been made by seller or by any agent of seller; and that buyer takes said property and the improvements thereon in the condition existing at the time of this agreement.

14. WAIVER:

Failure by seller at any time to require performance by buyer of any of the provisions hereof shall in no way affect seller's rights hereunder to enforce the same, nor shall any waiver by seller of any breach hereof be held to be a waiver of any succeeding breach, or a waiver of this non-waiver clause.

15. ASSIGNMENT:

Buyer shall not assign this agreement, his rights thereunder or in the property covered thereby without the written consent of

seller. Seller will not unreasonably withhold such consent.

16. SUCCESSOR INTERESTS:

The covenants, conditions and terms of this agreement shall extend to and be binding upon and inure to the benefit of the heirs, administrators, executors and assigns of the parties hereto, provided, however, that nothing contained in this paragraph shall alter the restrictions hereinabove contained relating to assignment.

17. ESCROW:

After closing an executed copy of this contract and a deed from seller to buyer, along with appropriate escrow instructions will be delivered to the United States National Bank, Redmond, Oregon, which bank is hereby designated escrow agent to collect the moneys due on this contract and to deliver the deed upon full payment of this contract.

18. MISCELLANEOUS:

The parties understand and agree that the seller is the owner of additional handline irrigation pipe which is not a part of this sale. Seller agrees that the buyer may use such additional handlines to irrigate the new seeding of alfalfa through the 1977 crop year.

Seller represents that there are 336 acres of water rights County Improvement District #1 which are included as

Additional consideration for this sale, seller agrees to install an irrigation well on the premises as follows:

- (1) The well will be a 12 inch cased well.
- (2) It will be drilled at seller's cost and at a location as agreed upon by the parties.

- (3) Seller will furnish the casing at seller's cost.
- (4) The pump and related equipment including all electrical installation will be the obligation of the buyer.
- (5) Said well will be drilled by April 1, 1977.
- (6) Seller makes no guarantee as to the quantity or quality of the water to be obtained from said well, but agrees only to drill the well as herein provided to a depth reasonable for the area.

The parties agree that the office of Bodie, Minturn, Van Voorhees, Larson & Dixon has been retained to prepare the documents in this transaction and that said attorneys are representing the seller.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed the day and year first above written.

EXHIBIT "A"

BUCKNER - STRAND

IN TOWNSHIP 14 SOUTH, RANGE 14 EAST OF THE WILLAMETTE MERIDIAN
CROOK COUNTY, OREGON:

Section 8: NW $\frac{1}{4}$, NW $\frac{1}{4}$ SW $\frac{1}{4}$.

Section 5: All that portion of the S $\frac{1}{2}$ NE $\frac{1}{4}$ and Lot 1 lying and being South and East of the South bank of the Pump Ditch of Crook County Improvement District No. 1, as located and constructed.

All that portion of the E $\frac{1}{2}$ SE $\frac{1}{4}$ lying and being North of the Main Gravity Canal of Crook County Improvement District No. 1, as located and constructed.

All that portion of the W $\frac{1}{2}$ SE $\frac{1}{4}$ and the E $\frac{1}{2}$ SW $\frac{1}{4}$ lying and being South and East of the South bank of the pump ditch of Crook County Improvement District No. 1 and North and West of the Main Gravity Canal of said District, as located and constructed.

All that portion of the S $\frac{1}{2}$ SW $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, and SE $\frac{1}{4}$ NW $\frac{1}{4}$ lying and being North and West of the right of way of the Pump Ditch of Crook County Improvement District No. 1, as located and constructed.

SUBJECT TO:

1. Existing rights of way for roads, highways, irrigation ditches, canals, and pole lines; and assessments of the Crook County Improvement District No. 1, within which said lands are situated.
2. Rights of way reserved in deed from Denton G. Burdick and wife, to E. O. Reed dated June 28, 1928 and recorded July 20, 1928 in Book 46 of Deeds at page 438, Records of Crook County, Oregon.
3. Reservation of rights of way for irrigation ditches and water rights as set out in deed from L. R. Lynam and wife, to Monroe N. Walker and wife, dated August 20, 1945 and recorded in Book 55 of Deeds at page 310, Records of Crook County, Oregon.
4. Rights of way reserved in deed from Minnie Snapp and husband, to E. J. Stringer, as recorded in Book 45 of Deeds at page 16, Records of Crook County, Oregon.
5. A Mortgage executed according to its terms by W. A. Buckner and Doris Buckner, husband and wife, to The Federal Land Bank of Spokane, a corporation, dated June 23, 1970 and recorded July 6, 1970 in Book 81 of Mortgages at page 238, Records of

Crook County, Oregon, for the sum of \$150,000.00. (Covers other lands also.)

6. A Mortgage executed according to its terms by W. A. Buckner and Doris Buckner, husband and wife, to Central Oregon Production Credit Association, a corporation, dated July 2, 1970 and recorded July 7, 1970 in Book 81 of Mortgages at page 246, Records of Crook County, Oregon, for the sum of \$265,970.00. (Covers other lands also)

7. A Mortgage executed according to its terms by W. A. Buckner and Doris Buckner, husband and wife, to Central Oregon Production Credit Association, dated February 11, 1976 and recorded February 20, 1976 in Mortgages No. 34282, Records of Crook County, Oregon, for the sum of \$142,681.00. (Covers other lands also)

8. The assessment roll and the tax roll disclose that the within described premises were specially assessed as farm land. If the land has become or becomes disqualified for the special assessment under the statute, an additional tax may be levied for the years since October 5, 1968, in which the land was subject to the special land use assessment.

9. Restrictions, easements, rights of way and reservations of record together with all existing rights of way and easements.

TOGETHER WITH the following described personal personal:

1. Irrigation equipment consisting of:

(a) 1000 feet of 6 inch mainline.

(b) 900 feet of 5 inch mainline.

(c) 100 40 foot hand lines.

3. ^{Reserve} water right ^(d) All irrigation pumps and related electrical equipment to Monitor as now installed and located on said premises.
recorded in

2. Feedlot equipment consisting of:

(a) 1 feed truck

(b) 1 hay shredder.

Re: Thomas G. Strand and Crook County Improvement District #1
Irrigation Water Exchange

The Board of Directors and Crook County Improvement District #1 approved at its regular meeting on April 26, 1989 the exchange of irrigation water with Thomas G. Strand as follows: The district will furnish water to land owned by Mr. Strand and in exchange Mr. Strand will return water to the district in its canals. The same amount of water is to be returned by the end of the irrigation season. Mr. Strand has agreed to furnish and maintain Totalizing Flow meters and make them available to a representative of the district at all times.

This agreement is for a maximum of 86 acres.

Dear Senator Cooley:

Reed Marbut has asked me to respond to your letter of April 17, 1994, requesting the status of the above referenced applications. In addition, he asked me to describe the application processing status throughout the state. I apologize for the delay in responding to your letter in a more timely fashion, however the demands on my time seem to exceed my ability to preform tasks as promptly as I would like.

Currently, staff are working on completing technical review reports in the coastal basins of the state. We plan to review applications in the Rogue River Basin next and then concentrating our efforts in the greater Columbia Basin as well as the basins in the south central portion of the state. In addition, we are processing groundwater applications statewide where staff have determined the proposed use of groundwater will not have the potential to interfere with surface water.

Mr. Fehrenbachers' application (G-12661), has received a satisfactory report of technical review. WaterWatch of Oregon raised objections to our Report. Staff currently are preparing a response to the objections and will be completed within a short period of time. I am enclosing a copy of the report and objections so you will understand the issues that we are attempting to address. Hopefully, this will give you an understanding of the complexity of the issues and why dealing with the issues is a time consuming process.

Mr. Strands' application (G-12177), has yet to undergo a complete review. Upon a cursory review of the application, it appears that we need to work out some technical issues with Mr. Strands' to insure what he proposes to accomplish is in compliance with the law.

Commerce Building

FAX (503) 378-8130

Wes Cooley, State Senator
Application File G-12661 - Mr. Fehrenbacher and
Application File G-12177 - Mr. Strands
Page Two

I realize I am being a bit ambiguous about the status of his request, however his proposed use of water is not as straight forward of a request as a regular application. The application proposes to exchange the use of ground water for surface water which can not be accomplished without following the process outlined in ORS 540.520 through 540.539.

I will be contacting Mr. Strands to discuss my concerns and to address the requirements for completing his application.

Again I apologize for the delay in responding to your request. Please feel free to contact me if you have any questions and I will be happy to address any concerns you may have.

Respectfully,

Steve Brown

Dear Mr. Marbut:

Thank you for taking the time to review the following letter. As a state senator, I have made it a priority to accurately and expeditiously facilitate any questions my constituents may have regarding issues of particular concern. This case is no exception.

Mr. Ted Ferenbacher and Mr. Tom Strand, both of Crook County, have asked if I might inquire as to the current status of their water rights applications. The specific questions are as follows:

- 1.) What Basin is the Water Rights Division currently working on?
- 2.) What is the status of Mr. Fehrenbachers' application (#G-12661)?
- 3.) What is the status of Mr. Strands' application (#G-12177)?

Any assistance your office may be able to provide would be greatly appreciated. If I can provide any more information, please do not hesitate to contact my office.

Sincerely,

Wes Cooley
State Senator

Reviewer's Name

SUBJECT: Application G- 12177

1. **PER THE** _____ Basin rules, one or more of the proposed POA's is within _____ mile of a surface water source and taps a groundwater source hydraulically connected to the surface water.

2. **BASED UPON** OAR 690-09 currently in effect, I have determined that the proposed groundwater use
 - a. _____ will, or } have the potential for substantial interference with the nearest surface water
 - b. ☒ will not } source, namely Crooked River; or
 - c. _____ will, if properly conditioned, adequately protect the surface water from interference:
 - i. ☒ The permit should contain condition #(s) 7B; KEZ 12/18/95
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below; or
 - d. _____ will, with repair of well construction deficiency, adequately protect the surface water from substantial interference.

3. **BASED UPON** available data, I have determined that groundwater for the proposed use
 - a. ☒ will, or }
 - b. _____ will not } likely be available in the amounts requested without injury to prior rights; or
 - c. _____ can, if properly conditioned, be made without injury to existing rights or to the groundwater resource contrary to statute:
 - i. _____ The permit should contain condition #(s) _____;
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below.

4.
 - a. _____ **THE PERMIT** should allow groundwater production from no deeper than _____ ft. below land surface;
 - b. _____ The permit should allow groundwater production from no shallower than _____ ft. below land surface;
 - c. _____ The permit should allow groundwater production only from the _____ groundwater reservoir between approximately _____ ft. and _____ ft. below land surface;
 - d. _____ Well reconstruction is necessary to accomplish one or more of the above conditions.
 - e. _____ One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS:

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)

5. **THE WELL** which is the point of appropriation for this application does not meet current well construction standards based upon:
- a. ☐ review of the well log;
 - b. ☐ field inspection by _____;
 - c. ☐ report of CWRE _____;
 - d. ☐ other: (specify) _____.
6. **THE WELL** construction deficiency:
- a. ☐ constitutes a health threat under Division 200 rules;
 - b. ☐ commingles water from more than one groundwater reservoir;
 - c. ☐ permits the loss of artesian head;
 - d. ☐ permits the de-watering of one or more groundwater reservoirs;
 - e. ☐ other: (specify) _____.
7. **THE WELL** construction deficiency is described as follows: _____

_____.
8. **THE WELL**
- | | | |
|---|---|--|
| a. ☐ was, or | } | constructed according to the standards in effect at the time of original construction or most recent modification. |
| b. ☐ was not | | |
| c. ☐ I don't know if it met standards at the time of construction. | | |

RECOMMENDATION:

- A. ☐ I recommend including the following condition in the permit:
"No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department."
- B. ☐ I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department.
- C. ☐ **REFER** this review to Enforcement Section for concurrence.

THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL

I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit.
_____, 1991.

(Signature)

I do not concur in G/H's recommendation A or B above relating to conditioning or withholding the permit for the following reasons: _____

WATER
RESOURCES
DEPARTMENT

THOMAS G STRAND
RT 1 BOX 53
TERREBONNE, OREGON 97760

Reference: File G-12177

Dear Applicant:

**THIS IS NOT A PERMIT AND IS
SUBJECT TO CHANGE AT NEXT PHASE OF PROCESS**

This letter is to inform you of the potential limitations to your proposed use of water and to describe some of your options. Based on the information you have supplied, the Water Resources Department has reached the following conclusions:

Initial Review Determinations:

1. Your application is complete and not defective.
2. The proposed use is not prohibited by law or rule.
3. The use of water for IRRIGATION OF 92.5 ACRES is allowed under OAR 505, the Deschutes Basin Program.
4. The use of 1.34 cubic foot per second, being 1.123 cfs from Well #1 for Irrigation of 86.0 acres and 0.11 cfs from Well #2 for Irrigation of 6.5 acres, is available year round.
5. The irrigation season is March 1 through October 31 set by Department policy.

Summary of Initial Determinations

The use of 1.34 cfs, being 1.123 cfs from Well #1 for Irrigation of 86.0 acres and 0.11 cfs from Well #2 for Irrigation of 6.5 acres, from March 1 through October 31 of each year may be allowed.

Commerce Building
158 12th Street NE
Salem, OR 97310-0210
(503) 378-3739
FAX (503) 378-8130

Because of the Department's determination, your application can be moved to the next phase of the water rights application review process. However, due to #5 above your application will likely be limited as summarized above.

Please reference the application number when sending any correspondence regarding the conclusions of this initial review. Comments received within the comment period, will be evaluated at the next phase of the process.

At this time, you must decide whether to proceed or to withdraw your application as described below.

Withdrawal Refunds:

If you choose not to proceed, you may withdraw your application and receive a refund (minus a \$50 processing charge per application.) To accomplish this you must notify the Department in writing by January 23, 1996. For your convenience you may use the enclosed "STOP PROCESSING" form.

To Proceed With Your Application:

If you choose to proceed with your application, you do not have to notify the Department. Your application will automatically be placed on the Department's Public Notice to allow others the opportunity to comment. After the comment period the Department will complete a public interest review and issue a proposed final order.

If A Permit Is Issued It Will Likely Include The Following Conditions:

1. You may be required to measure the amount of water used and report that use annually.
2. The priority date for this application is July 16, 1990.
3. If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

G-12177

January 9, 1996

Page 3

4. Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

If you have any questions:

Feel free to call me at (503) 378-8455 ext. 454 or 1 (800) 624-3199 if you have any questions. Please have your application number available if you call.

Sincerely,

Gary Holliday

I. PIPING: A total of 62.9 acres of land are irrigated in section 5 at a rate of 353 gpm. A gate valve on well #1 is set to replace 353 gpm through a meter to the canal system.

The 29.8 acres of land irrigated in the Southwest 1/4 of the Southwest 1/4 of section 5 is irrigated by a separate 20 HP pump and a 4" meter. The land is irrigated by a 1/4 mile of buried main line with hydrants at 60'. The land is irrigated by a 900' wheel line and 3" of hand lines.

The 21.6 acres in the Southeast 1/4 of the Northwest 1/4, and the 1.8 acres in the Northeast 1/4 of the Southwest 1/4 of section 5, is irrigated by a 40 HP pump that also irrigates other land in section 5. A 4" meter is installed at the canal to measure the water usage. The land is irrigated by a buried main line and hand lines.

The 8.6 acres of land irrigated in the Southeast 1/4 of the Southwest 1/4, and the 1.1 acres in the Northeast 1/4 of the Southwest 1/4 of section 5, is irrigated by center pivot which also irrigates an additional 90 acres or 10% of the total area.

In section 8, well #2 irrigates 6.5 acres by a 4" buried main line and a 3" hand line.

The final proof survey and inspection of the use as found to be completed under the terms and conditions of Permit No. 12561 were completed by me on Sept. 23, 1999 and the facts contained in this report and accompanying final proof map are correct to the best of my knowledge.

I, Thomas Strand, agree to the findings of the C.W.R.E. and do submit this report and map as my claim of Beneficial Use of the water as provided under the terms and conditions of my Permit No. G 12561.
