Form C (690—9-77)

IMPORTANT—This form is a notice to the Water Resources Director that permittee is ready to make **final proof** to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the **final proof** inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.

Application for Permit to Appropriate Surface Water

I, Jacqueline L. Hall (Name of Applicant)

of Gen. Del (Mailing Address), Fields (City)

State of Oregon, 97710 (Zip Code) Phone No. 503-495-2287 do hereby make application for a permit to appropriate the following described waters of the State of Oregon:

1. The source of the proposed appropriation is ~~MAPES Springs~~ UNNamed Creek, a tributary of

2. The point of diversion is to be located ~~900~~ 635 ft. N (N. or S.) and ~~1800~~ 1525 ft. W (E. or W.) from the SE corner of SEC. 8 (Public Land Survey Corner)

(If there is more than one point of diversion, each must be described)

being within the SW ¼ of the SE ¼ of Sec. 8 Tp. 41-S (N. or S.) R. 35-E (E. or W.), W. M., in the county of HARNEY

3. Location of area to be irrigated, or place of use if other than irrigation.

Township	Range	Section	List ¼ ¼ of Section	List use and/or number of acres to be irrigated
41-S	35-E	8	SW¼ SE ¼	.6 ac Supp.
41-S	35-E	8	SE ¼ SE ¼	10.0 ac Supp.
41-S	35-E	8	SE ¼ SE ¼	4.0 ac Prim.
				14.6

Form 690-1-0-1-77

38549

4. The amount of water which the applicant intends to apply to beneficial use is .18

cubic feet per second

(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is IRRIGATION - ~~Dom~~

6. DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

Gravity flow through 3" Pipe for 500' 2" Pipe for 200' then into 2" Hand line sprinklers. 11 7 G.P.M. Heads

If for domestic use state number of families to be supplied

7. Construction work will begin on or before 15 Complete

8. Construction work will be completed on or before 15 complete

9. The water will be completely applied to the proposed use on or before April 1986

Application No. 68492 Permit No.

Remarks: Permit G-7638 by Leo Barclay was never initiated for 20 acres in E½ of SE¼ SE¼ of Sec. 8 + should be cancelled

Domestic use was set up and used under Permit U-703 + was not filed on because the use was exempt for domestic + stock using less than 15000 Gallons/day for 3 domestic.

G-8199

U-799

This permit, when issued, is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your area.

Signature of Applicant

This is to acknowledge your amended Application 68492 along with the supporting map and another copy of the tax assessor's records of your property.

The application now describes the proposed use of 0.18 cubic foot of water per second from an unnamed creek for the irrigation of 4.0 acres and supplemental irrigation of 10.6 acres. The additional 0.08 cfs added to the application has received a date of priority of January 24, 1986, being the date the amended application was received.

The application is now in satisfactory form and will be placed with the group to be considered for approval.

Sincerely,

WAYNE J. OVERCASH
Senior Water Rights Examiner

2999D

Dear Mr. Overcash,

Thank you for your patience. Hopefully I finally have all the information you need.

Jackie Hall

378-3066

December 9, 1985

Jacqueline L. Hall
General Delivery
Fields, OR 97710

REFERENCE: File 68492

This is to acknowledge your amended Application 68492 and new supporting map along with the description of spring sheet and the copy of the county assessor's record.

The application now describes the proposed use of 0.1 cubic foot of water per second from Mapes Springs for the primary irrigation of 4.0 acres and supplemental irrigation of 10.6 acres.

According to the information supplied on the Spring Description Sheet, you do not intend to divert water directly from the springs but at some point downstream in the channel of the creek. If so, the creek or stream should be identified as the source of water in Item 1 of your application instead of Mapes Springs. A spring is considered the point at which the water naturally arises from the ground and any point downstream from the spring or spring area would be considered and unnamed stream or creek.

If you are actually diverting water downstream from Mapes Springs, your supporting map will need to show the point water is diverted from the stream along with noting the distances from the reference corner to the point of diversion. Also, Item 2 on the application will need to be completed by locating the point on the stream by distances from the reference corner instead of locating the point at Mapes Springs.

As mentioned in my earlier correspondence, it will be necessary for you to advise us of your intention regarding Mr. Barclay's Permit G-7638. If you do not intend to make proof of use of water from the well described in the Permit G-7638 for any lands described in your application, we will need a statement to this effect. This may be noted in the remarks section of your application or on a separate sheet.

Item 7, 8, and 9 on your application will need to be completed. If the construction work has all been completed and you have beneficially used all the water for the irrigation of the 14.6 acres, a statement to this effect may be noted.

You may wish to review the amount of water requested. According to the Spring Description Sheet you submitted, there may be more than 0.1 cfs available. Also, an amount of 0.18 could be allowed without exceeding the duty of water for the area. Therefore, if you do have additional water available and you have facilities for delivering it, you may amend Item 4 to request the greater amount of water.

The copy of the tax assessor's records you submitted appears to describe a tract of land, then it appears to have several exceptions without descriptions. Do you have a legal description of your property that does not include the exceptions or do you have a legal description of the property that also describes the exceptions? If so, one or the other should be submitted.

I am returning your application and map for correction and completion. The application is endorsed so that in order to retain its priority date it must be received in this office on or before February 5, 1986.

Sincerely,

WAYNE J. OVERCASH
Senior Water Rights Examiner

September 25, 1985

Jacqueline L. Hall
General Delivery
Fields, OR 97710

REFERENCE: File 68492

Your Application 68492 describing the proposed use of 0.1 cubic foot of water per second from Mapes Springs for irrigation of 14.6 acres and domestic use for an unspecified number of families, together with the supporting map, has been reviewed.

We will need a few matters clarified before we can continue with the processing of your application. Also, a legal description of the property upon which the water will be used is needed and we may also need additional permit recording fees.

The legal description is needed to verify the place of use of water and may be copied from your deed, title insurance policy, or sales contract.

If you wish to use water for domestic purposes (household uses), Item 5 will need to be further completed to state the amount of water to be appropriated for irrigation use and the amount of water to be appropriated for the domestic supplies. Also, the number of families to be supplied water will need to be noted above Item 7 and the house site or sites to be supplied will need to be illustrated on your supporting map. If only one family is to be supplied, your application will require an additional permit recording fee in the amount of $100.

The area you have illustrated on your supporting map as being the area to receive water for a supplemental supply is not in agreement with the area found irrigated from the well under the earlier right perfected under the terms of the Permit U-703. I am enclosing a print of the Final Proof Survey Map made in connection with the earlier permit which shows the lands found irrigated. The existing water right perfected under the terms of Permit U-703 would be appurtenant to 0.6 acre in SW 1/4 SE 1/4 and 17.2 acres in the SE 1/4 SE 1/4 of Section 8 within the area hachured on the Final Proof Survey map. A supplemental right can only exist where there is an existing valid primary right. Therefore, it will be necessary for you to either correct your map or apply for the appropriate changes under the existing right. To assist you, I have roughed in the location of the existing right on the enclosed copy of your supporting map.

A permit approving your application for supplemental use of water from the Mapes Springs will only provide for the use of water on the lands listed as supplemental at times there is a deficiency in supply at the well covered by the existing water right.

Our records show another Permit G-7638, being issued to Leo R. Barclay which provides for the use of water from another well for the irrigation of among other lands, 20.0 acres in the E 1/2 of the SE 1/4 SE 1/4 of Section 8, Township 41 South, Range 35 East. Will you please advise us of your intention regarding Mr. Barclay's Permit G-7638. If you do not intend to make proof on the use of water under the terms of the Permit G-7638 for any lands described in your application, a statement to this effect may be included in the remarks section of your application or on a separate sheet.

The enclosed Spring Description Sheet will need to be properly completed and submitted. You should also note in the remarks section on this Spring Description Sheet whether Mapes Springs is merely a large spring area or if there are several different springs involved.

I am returning your application and map for completion. The application is endorsed so that in order to retain its priority date it must be received in this office on or before November 25, 1985.

Sincerely,

WAYNE J. OVERCASH
Senior Water Rights Examiner

We have received your application for use of water for irrigation and domestic use along with the supporting data and fees. Our Receipt 47265 is enclosed. Your application has been filed and assigned number 68492.

Applications which are received in proper form for a permit, including maps, supporting data and fees, will be considered for approval shortly after the mandatory 30-day waiting period. Applications which are defective, conflict with existing rights or require additional information will be reviewed in detail and will be returned for completion or correction within 45 days.

If your application is approved, the project described in the application will be subject to the Water Policy Review Board's Basin Program statements, existing minimum flows and demands of prior rights during periods of low water.

Sincerely,

RALPH H. JACKSON, Supervisor

SALEM, OREGON

Application No. 68492

DESCRIPTION OF SPRING

1. Is spring on property of applicant? No

2. If not, give name and address of legal owner. BLM
South Alvord Burns Oregon

3. Have you secured consent of owner to appropriate water from this spring and for construction of pipeline or other works? Yes By previous owner Irwin E. Smith 1960 Permit 4.703

4. If you do not have such consent, do you expect to secure right of way through condemnation?

5. What is the maximum flow from spring? 80 G.P.M.
(Gallons per minute or cubic feet per second)

What is the minimum flow? 40 G.P.M.

Is flow measured or estimated? Estimated

6. Does the stream flowing from spring form a well defined natural channel? Yes + collected for use

7. Does the water flow off the lands on which it first arises? Yes

8. Give the name of the stream or other body of water into which water from the spring flows. None

9. If the water from the spring sinks or evaporates before reaching other water, give distance water flows from spring before vanishing.
3/8 mile

10. Remarks Stream sinks on my property, this is a small spring area + flows into a defined channel + collected for use. We are using from the the channel not from the spring source so that is why we didn't send a spring form before.
