The Department has reviewed the status of your pump test and any requests for extension(s) or exemption(s) for the following permitted well(s). The results are summarized in the table below:

Application	Water Right	Permitted Well	Pumped Well	Test Date	Request Status	Problems	Exemption	Well Name
G 14297	Permit: G 13194 *	MARI0005330	MARI0005335	09/05/1990	APPROVED	0	Multiple Well	WEATHERS 3
G 14297	Permit: G 13194 *	MARI0005310	MARI0005335	09/05/1990	APPROVED	0	Multiple Well	WELL 2A
G 14297	Permit: G 13194 *	MARI0005307	MARI0005335	09/05/1990	APPROVED	0	Multiple Well	WELL 3
G 14297	Permit: G 13194 *	MARI0005309	MARI0005335	09/05/1990	APPROVED	0	Multiple Well	

Although this test is being approved for the wells on the above listed permit(s), it is unlikely that the approval will carry forward onto any new permits or future multiple-well exemption requests. If a new permit is issued for these particular wells that requires a pump test or if you wish to request a multiple-well exemption on any other wells using this approved test, you may be denied and will need to perform a new test. This is due to the items listed below:

o In accordance with OAR 690-217-0020 (3), "Requests for exemptions shall be in writing and include water well reports or other documentation showing the water producing zones for each well. "

o Per OAR 690-217-0045(1)(a) "All water level measurements shall be reported to a precision of at least one-tenth of a foot"; the water level measurements reported for this pump test were not to a precision of at least one-tenth of a foot.

o Per OAR 690-217-0025(5) " Water level measurements during the first 10 minutes of pumping shall be timed no more than two minutes apart." Two of the four measurements that occurred during the first 10 minutes of pumping were more than two minutes apart.

Approved pump test letters will be digitally posted to the water right in WRIS; all other pump test letters will be mailed to permit holder.

Please contact me if you have any questions.
