Application for

Extension of Time for a Water Right Permit (NON-Municipal/ NON-Quasi-Municipal/ NON-Domestic)

OREGON WATER RESOURCES DEPARTMENT
Oregon Water Resources Department
725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.oregon.gov/OWRD

Criteria for a Permit Extension of Time

The Department can accept requests for an extension of time on permits to (1) complete construction, and/or to (2) apply water to beneficial use. (The request cannot be approved for more than two years from the date of the extension.)

In order to approve a permit extension request the Department must be able to find:

1) **Construction has begun:**

   A. **For Groundwater Permits**
   Construction of the well(s), *authorized by the permit*, began within 5 years of the date the permit was issued.

   B. **For Surface Water or Reservoir Permits**
   Construction of the water system began within 5 years of the date the permit was issued.

The Department will also confirm that:

2) If required, a fish screen, fish passage or fish by-pass device was installed before or prior to diversion of any water. An exception to the need to confirm installation prior to diversion of any water would be a waiver submitted to the Department from ODFW stating that a fish screen, fish passage or fish by-pass device was not required, provided your permit allows for a waiver.

If you have questions, please call the Department at (503)-986-0900 and ask to speak with a permit extension specialist.

Received by OWRD
JUL 24 2026
Salem, OR

TO THE DIRECTOR OF THE OREGON WATER RESOURCES DEPARTMENT

A separate extension application must be submitted for <u>each</u> permit as per OAR 690-315-0020(2).

I, Patterson Real Estate Holdings, LLC & Northwest Farm Credit Services FLCA
NAME OF PERMIT HOLDER *[OAR 690-315-0020(1) and (3)(a)]*

29300 SE Burnett Rd	Eagle Creek	OR	97022

JUL 24 2026
Salem, OR

Before submitting your Application for Extension of Time, make sure the following items are included:

- This completed Application for Extension of Time.
- Statutory fee of $1,170
- Signature page (Second page of this Application for Extension of Time).
- Letter granting an agent authority to act on behalf of the permit holder (*if applicable*)
- All supporting documentation and/or evidence referenced in the Application for Extension of Time. (ODFW Fish screen approval or waiver, contract for stored water, etc)

MAIL COMPLETED APPLICATION
along with the Supporting documents and/ or evidence and correct fee to:

Water Resources Department
Attn: Water Right Permit Extensions
725 Summer Street NE, Suite A
Salem, Oregon 97301

GENERAL TIPS:

- Permit holders of **municipal, quasi-municipal, or domestic water use permits DO NOT use this form**. The correct form is APPLICATION FOR EXTENSION OF TIME FOR MUNICIPAL AND QUASI-MUNICIPAL WATER USE PERMITS.

- Request the amount of time necessary, not to exceed two years, to complete construction of the water project and/or to use the permitted quantity of water under the terms and conditions of your permit. Should this request be approved, it will be the final extension of time authorized. ORS 537.230 & 630 *[Section 27, Chapter 282, Oregon Laws 2025]*

- A separate APPLICATION FOR EXTENSION OF TIME must be submitted for each permit. OAR 690-315-0020(2).

- Permit extensions are evaluated under OAR Chapter 690, Division 315. These rules may be viewed at the State of Oregon, Secretary of State Website. To be granted an extension of time, the Department must make four specific findings; 1) the application is complete, 2) construction of the water system began within the time specified in the permit and applicable statute, 3) there is good cause, and 4) the project can be completed within the time being requested. If the Department cannot make all four findings, the extension of time cannot be approved.

- You may provide OWRD with any additional information or evidence that will aid us in making our decision. Please note that OWRD may require other information that is necessary to evaluate the application. OAR 690-315-0020(3)(n).

- After careful review of the Application for Extension of Time, you may contact OWRD at (503) 986-0900, to ask questions and request assistance from a Permit Extensions Specialist in the Water Rights Services Division.

Received by OWRD
JUL 24 2026
Salem, OR

- An Application for an Extension of Time will be reviewed for completeness. A response is required for each item contained in the application. OWRD will return any incomplete or deficient applications to the applicant. OAR 690-315-0040(1)(a).

Reference Materials Needed to Complete this Application:

- **The water right permit.** If needed, a copy of the water right permit can be downloaded from the Department's Website, or, a copy of the permit may be requested by water right application number from the Water Rights Division at 503-986-0900 (copy fees will apply).

- **Previous Applications and Orders.** Copies of previous applications and orders that may inform the completion of the Application for Extension of Time, if available, may be downloaded from the Department's Website. **NOTE: If the document requested is not available on the Department's website, you may submit a Public Record Request to obtain any additional information available in the file.**

- **Documentation which demonstrates compliance with permit conditions** (for example, well construction logs; static water level measurement reports; annual water use reports; ODFW fish screen certification; a plan to monitor the effect of water use on ground water aquifers utilized under the permit; etc.).

Questions to complete this application for an Extension of Time
Please see the instruction sheet to help you answer these items.

1. Beginning Construction within required deadlines. OAR 690-315-0020(3)(d)

For Groundwater Permits

Has construction of the point of appropriation (well) authorized under this permit begun?
☒ **Yes** ☐ **No**

Date construction began Month:11 Day: 25 Year: 1998

Details of construction and attach documentation: Wells 1, 2, and 5 were drilled and connected to the system between November 1998 and April 2001. Copies of the well logs and Initial Static Water levels were submitted on the first Extension application and are attached again with this application. Wells 3, 4, a replacement well for the #5 well, and an additional well (#7) were drilled and connected to the system between January 2017 and July 2020. Well logs for these wells are attached. Well #5 Replacement was drilled because the original well produced too much sand for our sprinklers and drip system. Well # 7 was drilled to attempt to get closer to the allowed volume under the permit. Well #4 drilled location is not auhtorized under the existing permit and extension, according to OWRD most recent extension application approval (9/5/2025). We will apply for a permit amendment for well #4, the replacmetn well (#5R) and the additional POA (well #7), following approval of an extension. The aproval of the permit amendment will allow to move forward with completeing and submitting the Claim of Beneficial Use.

Salem, OR

For Surface/Reservoir Permit

Has construction of the water system begun? ☐ **Yes** ☐ **No**

Date construction began Month: Day: Year:

Details of construction and attach documentation: NA

OAR 690-315-0020(3)(A)(e)(A)

2a. Permits typically contain standard or special conditions that must be fully satisfied to lawfully develop and use permitted water. Review the permit subject to this extension to identify which of the conditions listed in the 2nd column are contained within it. Using the extra row labeled "other" to specify any other additional conditions included in the permit, or specified in a final order approving a permit amendment or prior extension of time. In the 1st column check the box for each condition (row) identified as relevant. In the 3rd column check "Yes" if you have completed or met the permit condition. Check "No" if the condition is not yet satisfied. In the 4th column, give the date when the condition was satisfied or will be satisfied. Attach any pertinent documentation. Note: a pump test condition does not need to be addressed here however; you must submit the results of the test to the Department for approval prior to certification.

CHART-A

Permit Conditions in this Permit		Have Completed or Met?	Date satisfied/ or will be satisfied
Checkbox	Ground water Check those included on this permit		
☒	Installation of a meter/totalizing flow meter	☒ Yes ☐ No	Well totalizing flow meters installed for all alls, last completed on 6/18/2020: Proposed Well (7) CLAC 75843.
☐	Submittal of annual water usage report	☒ Yes ☐ No	Annual
☒	Submittal of static water level measurements in the month required	☒ Yes ☐ No	March, 2026: March 1999 and seven consecutive measurements were reported for wells 1, 2, and 5. Wells 3, 4, 5R, and 7 were drilled after the 7 year timeframe. Levels for these wells were taken annually and can be submitted if required.
☐		☐ Yes ☐ No	NA
☒	Special well construction standards	☒ Yes ☐ No	Cased and sealed to 150 feet minimum when drilled.

☐	Other (Specify):	☐ Yes ☐ No	
☐	Other (Specify):	☐ Yes ☐ No	
☐	Other (Specify):	☐ Yes ☐ No	

2b. If you have identified that you have NOT complied with Permit conditions, explain the reasons why and indicate a date certain, when you will be in compliance.

The permit conditions have been complied with. A permit amendment is required for the proposed wells to resolve location discrepancies and groundwater review process. This new extension will allow the permits amendment process to move forward. The approval of the permit amendment and completion of conditions then can apply for a claim of beneficial use, water right certificate.

[OAR 690-315-0020(3)(e)]

3. Provide evidence of physical work made toward completion of the water system, and of progress made toward making beneficial use of water within the permitted time period (CHART-B); and if applicable, within the time period of the most recent extension granted (CHART-C). CHART-B (below) must be completed for all Application for Extension of Time requests. *Use chronological order.* Itemize each work item, and do not combine multiple work actions in one area. (Planning, formulating a business plan, securing financing, letting contracts, purchasing but not installing equipment, surveying, clearing land, or planting crops ***is not*** *considered work in the development of the water system.* ***Work accomplished under other water rights may not be considered work under this permit.***)

10. In the chart below provide a summary of your future plans and schedule to complete the construction of the water system, and/or apply water to full beneficial use under the terms and conditions of the permit.

CHART-E

APPROXIMATE DATE RANGE (projected)	WORK OR ACTION TO BE ACCOMPLISHED (projected)	ESTIMATED COST (projected)
2026 - 2028	Request Extension for Permits G 13691, G 15195, and G 15841 and upon approval, submit a Permit Amendment for well #4 location, change POD/POA well (authorized) for Well #5 (CLAC 56693) with one replacement well (#5R) drilled (CLAC 72846) and add POA Well # 7 drilled (CLAC 75843) to the permitted wells. Pending the approval of proposed permit amendments, we will then submit our Claim of Beneficial Use.	$18,500.00
Year:	Date intend to apply water to full beneficial use under the terms and conditions of this permit.	
	Total Cost	**$18,500.00**

[OAR 690-315-0020(3)(g)]

11. Estimated remaining cost to complete the project: $18,500.00

(The total cost from CHART-E)

[OAR 690-315-0020(3)(j)]

12. Provide a summary of your plan to complete construction, meeting all permit conditions and apply the water to beneficial use: *(List all tasks or steps needed to complete the project, the date when each task will be completed, and the cost associated with each task; attach additional pages if necessary.)* All construction is complete and now we are requesting an Extension of time to submit Permit Amendment Applications to update the permit for the location authorized for well #4, change the authorized well (#5) for a replacment well (5R) and add POA Well # 7 for approval of the proposed wells to meet the capcity needs for the water delivery system. Once a Transfer is obtained for the permit amendments, we will submit the Claim of Beneficial Use for each permit involved. I would estimate that this can be done by spring of 2028, pending on the Departments time frame for processing and complete review of the applications.

Received by OWRD
JUL 24 2026
Salem, OR

[OAR 690-315-0020(3)(k)]

13. Justify the time requested to complete the project and/or apply the water to full beneficial use. *(Include any other information or evidence to establish that the requested amount of time is sufficient and that you will be able to complete the project within the amount of time requested.)*

The Extension of time is needed to submit and attain the necessary Permit Amendments to resolve well location for permit authorization (well #4), change one replacement well (5R, CLAC 72846) and add one (APOA) for new well (#7, CLAC 75843) drilled for the Nursery water delivery system. Submission for the Claim of Beneficial Use to be completed upon permit amendment approval.

[OAR 690-315--0020(3)(l)]

14a. Will a denial of the extension result in undue hardship? *(Describe the hardship and the effects.)* Yes, we have made a huge investment in this project and a denial would not let us finish the final steps to complete the Claim process. As stated in our previous extension request, we were suddenly regulated off our primary water source from Eagle Creek in August of 2016. This was the first time we have been shut off since purchasing the property in 1997. As soon as we were regulated off the creek source, we applied and received an extension of time to attempt to improve the production of water from the wells. This also included constructing and connecting well's 3 and 4, replacing well 5, and drilling an additional well 7. The location of proposed well 4 was drilled at different location on the property to try to improve it's volume. The construction of wells 4, 5R and 7 is the reason we need the extension of time so we can apply for a Permit Amendment and submit our COBU. We can file our Claim of Beneficial Use as soon as we gain approval of the extension and Permit amendment.

The denial of this request combined with the regulation of our primary water source during the time of year we need it the most would be catastophic to our business and result in the potential loss of millions of dollars of nursery stock. The wells were constructed as a supplemental and backup source of water for the time of year we cannot use the Creek source, so the loss of water from the wells along with the loss of the millions of dollars we have invested in the project would cause a tremendous hardship.

Received by OWRD
JUL 24 2026
Salem, OR

14b. Are there any other reasonable alternatives that exist for meeting your water use needs? *(Explain in detail, consider other potential sources of water, and describe their feasibility)* There is no other source of water in this area beside the Creek source and groundwater. There is no public source in this area. We also constructed Well 6 under Permit G-15842 during this time which could only produce water from the Columbia River Basalt aquifer. This well was drilled to a depth of 3154 ft and only produces 71 GPM. This well cost over a million dollars to construct and failed to produce the water we hoped for.

[OAR 690-315-0020(3)(h)

15. Was the delay in the timely completion of this water development project and/or timely application of water to full beneficial use caused by any additional government requirements, other than the conditions contained within the permit, which significantly delayed the completion and perfection of this right? *(Explain in detail, including how much time did this delay the project; list dates.)* Before we began being regulated from our Primary source of water from Eagle Creek, we had considered completing the Beneficial use Claim for only the three wells that we had constructed at that time. After being shut off, we were forced to construct the other wells in an attempt to reach the amount of water authorized by the permit.

[OAR 690-315-0020(3)(h)

16. Describe any unforeseen events which contributed to the delay of completion of this project that you had no control over. *(Explain in detail what the unforeseen events were (i.e. health issues, natural disaster) and how much time was spent addressing the unforeseen events. Delays caused by business decisions are not considered unforeseen events)* Before we began being regulated from our Primary source of water from Eagle Creek, we had considered completing the Beneficial use Claim for only the three wells that we had constructed at that time. After being shut off, we were forced to construct the other wells in an attempt to reach the amount of water authorized by the permit. We finished all the work before the completion date from the last extension and had our Water Right consultant, Steve Applegate working on the completion of these steps when he became Ill with cancer and passed away. Unfortunately, this caused us to have to start all over again which is the reason for our need of this extension request.

[OAR 690-315-0020(3)(h)]

17. Describe an additional reasons why the construction was not completed, and/or water was not beneficially used within permit time limits. *(Provide supporting information for the reason(s) that best fits your circumstances.)*

Construction had been completed during the authorized extension. The additional time will be necessary to file the necesary permit amendments for fix any auhtorized well location discrpeancies and to replace well 5 with the proposed new well (5R) and to propose one additional new well (7). The review the file application documents and the permit time

Received by OWRD
JUL 24 2026
Salem, OR

constraints will now require an extension of time to allow application of a permit amendments for the proposed wells needed for total water capacity of the updated water delivery system.

[OAR 690-315-0020(3)(m)(n)]

18. Provide any other information you wish OWRD to consider while evaluating your Application for Extension of Time.

We believe that we have proven diligence in both the investment and progress toward completion of this project. We are in the process at this time of finalizing all of our various Water Right Claims and greatly appreciate your consideration in this extension request as we are so close to completion.

[OAR 690-315-0040(2)(f)]

19. Will the income or use of the water project provide a fair and reasonable return on your investment? *(Explain in detail)* The use of water from the wells on this permit is crucial to the survival of the plant material and business each time we are regulated from using the water from the creek. The Eagle Creek regulation has forced us to limit the water use underwater right Certificate 61024 and then change our planting rotation from Spring to Fall thus losing a full season of growth.

[OAR 690-315-0040(4)(d)]

20. Describe in detail if there are other economic interest, beyond those of the permit holder, which are dependent upon the completion of this project. *(Who will be effected and how?)* There is a potential nursery lease sale being proposed, which the buyer will need the water rights and wells for its operations and costs being considered.

WELL LOCATIONS:

WELL #1: NE ¼ SW ¼, SECTION 31, T2S, R4E, W.M.; 2180 FEET SOUTH & 440 FEET EAST FROM SW CORNER, DLC 38

WELL #2: NE ¼ SW ¼, SECTION 31, T2S, R4E, W.M.; 1720 FEET SOUTH & 460 FEET EAST FROM THE SW CORNER, DLC 38

WELL #3: SE ¼ NW ¼, SECTION 31, T2S, R4E, W.M.; 1320 SOUTH & 320 FEET EAST FROM THE SW CORNER, DLC 38

WELL #4: SE ¼ NW ¼, SECTION 31, T2S, R4E, W.M.; 950 FEET SOUTH & 160 FEET EAST FROM THE SW CORNER, DLC 38

WELL #5: SE ¼ NW ¼, SECTION 31, T2S, R4E, W.M.; 560 FEET SOUTH & 10 FEET EAST FROM THE SW CORNER, DLC 38

The amount of water used for NURSERY OPERATIONS is limited to a diversion of 0.15 cubic foot per second per acre. For the irrigation of **containerized nursery plants**, the amount of water diverted is limited to ONE-FORTIETH of one cubic foot per second (or its equivalent) and 5.0 acre feet per acre per year. For the irrigation of **in ground nursery**

Salem, OR

plants the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre per year. The use of water for NURSERY OPERATIONS may be made at anytime, during the period of allowed use specified above, that the use is beneficial. For the irrigation of **any other crop**, the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NE ¼ SW ¼ 8.9 ACRES
NW ¼ SW ¼ 2.1 ACRES
SW ¼ SW ¼ 0.3 ACRES
SE ¼ SW ¼ 4.0 ACRES
SECTION 31
TOWNSHIP 2 SOUTH, RANGE 4 EAST, W.M.

Measurement, recording and reporting conditions:

A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The well(s) shall produce groundwater from no shallower than 150 below land surface.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

Measurements must be made according to the following schedule:

Before Use of Water Takes Place
Initial and Annual Measurements
The Department requires the permittee to submit an initial water level measurement in the month specified above once well construction is complete and annually thereafter until use of water begins; and

After Use of Water has Begun
Seven Consecutive Annual Measurements
Following the first year of water use, the user shall submit seven consecutive annual reports of static water level measurements. The first of these seven annual measurements will establish the reference level against which future annual measurements will be compared. Based on an analysis of the data collected, the Director may require that the user obtain and report additional annual static water level measurements beyond the seven year minimum reporting period. The additional measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the Department on forms provided by the Department. The Department requires the individual performing the measurement to:

(A) Identify each well with its associated measurement; and
(B) Measure and report water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
(C) Specify the method used to obtain each well measurement; and
(D) Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:

(A) An average water level decline of three or more feet per year for five consecutive years; or
(B) A water level decline of 15 or more feet in fewer than five

Salem, OR

consecutive years; or
(C) A water level decline of 25 or more feet; or
(D) Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

STANDARD CONDITIONS

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Complete application of the water to the use shall be made on or before October 1, 2006. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued September 17, 2002

Dwight Stenvall for
Paul R. Cleary, Director
Water Resources Department

REAL ESTATE TRANSACTIONS: Pursuant to ORS 537.330, in any transaction for the conveyance of real estate that includes any portion of the lands described in this permit, the seller of the real estate shall, upon accepting an offer to purchase that real estate, also inform the purchaser in writing whether any permit, transfer approval order, or certificate evidencing the water right is available and that the seller will deliver any permit, transfer approval order or certificate to the purchaser at closing, if the permit, transfer approval order or certificate is available.

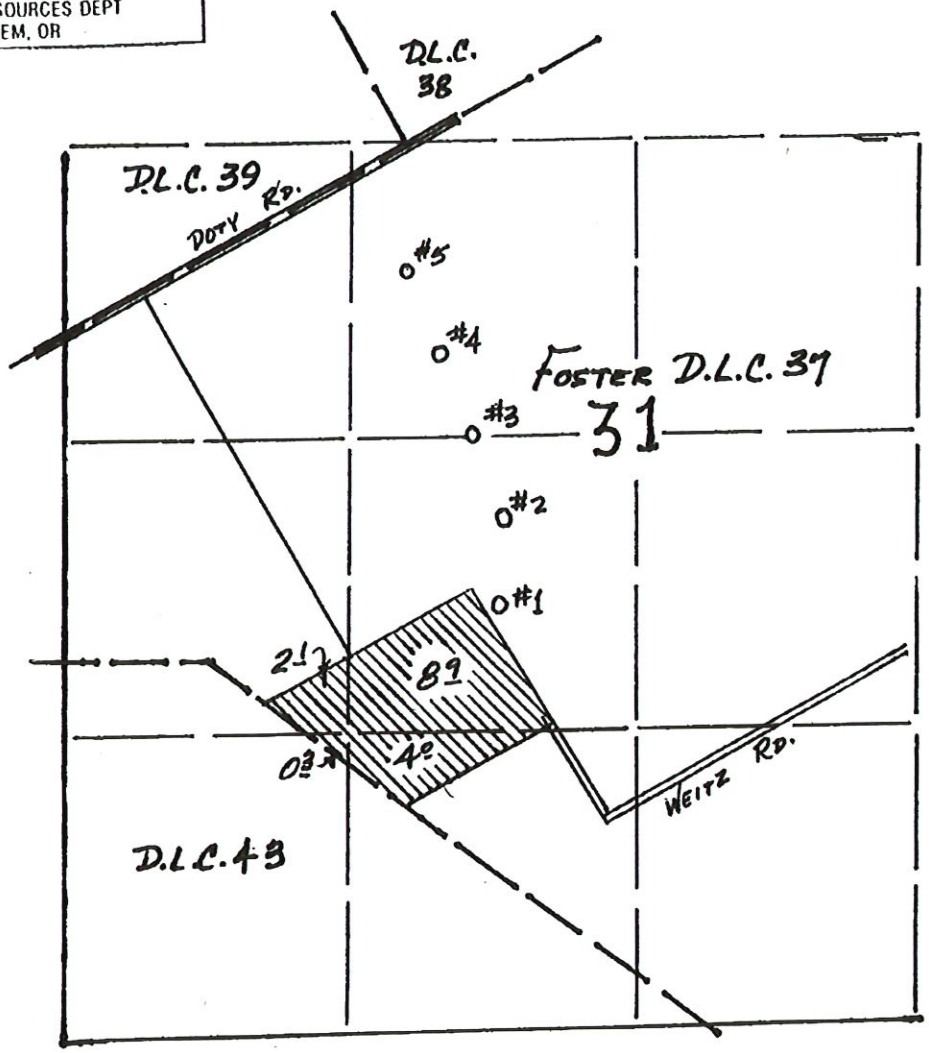

CULTURAL RESOURCES PROTECTION LAWS: Permittees involved in ground-disturbing activities should be aware of federal and state cultural resources protection laws. ORS 358.920 prohibits the excavation, injury, destruction or alteration of an archeological site or object, or removal of archeological objects from public and private lands without an archeological permit issued by the State Historic Preservation Office. 16 USC 470, Section 106, National Historic Preservation Act of 1966 requires a federal agency, prior to any undertaking to take into account the effect of the undertaking that is included on or eligible for inclusion in the National Register. For further information, contact the State Historic Preservation Office at 503-378-4168, extension 232.
