D:\191-004\191-004_OWRD1.DOC

Dear Sir/Madam:

Previously Maridean and Hugh Eisele submitted the "Claim of Beneficial Use and Site Report" (doing business as (dba) "Scenic Fruit Co." for one well in the Deep Creek Basin of the Clackamas River drainage.) They had received Groundwater Permit G-13115 (Application G-14285) to use a maximum rate of 1.50cfs (674gpm) from 6 wells (only Well #1 was drilled) for Agricultural Use and Irrigation for Nursery Operations. This property now named Satellite Farm, uses irrigation water from March 1st to October 31st of each year for general nursery uses and water the remaining part of the year for temperature control/general agricultural uses. This application adds Additional Points of Appropriations for Wells #2 through Well #6. The property is located on the easterly and southerly sides of SE Firwood Road, located southeast of the City of Sandy.

They use a combination of "Rainbird" "Wade Rain" and other rotating sprinklers. They will also use drip irrigation lines and "soaker" hoses when possible to conserve irrigation water. They have two existing permitted reservoirs as "bulge-in-the-pipe" if the well(s) do not produce as much water as they asked for in the attached application.
