2. SOURCE AND PROPERTY OWNERSHIP

A. The Proposed Source of Water

Provide the commonly used name of the water body from which water will be diverted, and the name of the stream or lake it flows into. If unnamed, say so:

Source 1: Elk Lake Tributary to: None
Source 2: _____ Tributary to: _____
Source 3: _____ Tributary to: _____
Source 4: _____ Tributary to: _____

If any source listed above is stored water that is authorized under a water right permit, certificate, or decree, attach a copy of the document or list the document number (for decrees, list the volume, page and/or decree name). _____

B. Applications to Use Stored Water

Complete this section if any source listed in item 2A above is stored water.

Do you, or will you, own the reservoir(s) described in item 2A above?

☒ Yes.

☐ No. (Please enclose a copy of your written notification to the operator of the reservoir of your intent to file this application, which you should have already mailed or delivered to the operator.)

If *all* sources listed in item 2A are stored water, the Department will review your application using the expedited process provided in ORS 537.147, unless you check the box below. Please see the instruction booklet for more information.

☐ By checking this box, you are requesting that the Department process your application under the standard process outlined in ORS 537.150 and 537.153, rather than the expedited process provided by ORS 537.147. To file an application under the standard process, you must enclose the following:

- A copy of a signed non-expired contract or other agreement with the owner of the reservoir (if not you) to impound the volume of water you propose to use in this application.
- A copy of your written agreement with the party (if any) delivering the water from the reservoir to you.

Surface Water/2

WATER RESOURCES DEPT
SALEM, OREGON

C. Property Ownership

Do you own all the land where you propose to divert, transport, and use water?

☒ Yes (Skip to section 3 "Water Use.")

☐ No (Please check the appropriate box below.)

☐ I have a recorded easement or written authorization permitting access.

☐ I do not currently have written authorization or easement permitting access.

☐ Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigated and/or domestic use only (ORS 274.040).

You must provide the legal description of: (1) the property from which the water is to be diverted, (2) any property crossed by the proposed ditch, canal or other work, and (3) any property on which the water is to be used as depicted on the map.

List the names and mailing addresses of all affected landowners.

3. WATER USE

Please read the instruction booklet for more details on "type of use" definitions, how to express how much water you need and how to identify the water source you propose to use. You must fill out a supplemental form for some uses as they require specific information for that type of use.

A. Type(s) of Use(s)

See list of beneficial uses provided in the instructions.

- If your proposed use is **domestic**, indicate the number of households to be supplied with water: See Attached B
- If your proposed use is **irrigation**, please attach **Form I**
- If your proposed use is **mining**, attach **Form R**
- If your proposed use is **municipal or quasi-municipal**, attach **Form M**
- If your proposed use is **commercial/industrial**, attach **Form Q**

B. Amount of Water

Provide the amount of water you propose to use from each source, for each use, in cubic feet-per-second (cfs) or gallons-per-minute (gpm). If the proposed use is from storage, provide the amount in acre-feet (af):

(1 cfs equals 448.8 gpm. 1 acre-foot equals 325,851 gallons or 43,560 cubic feet)

Source	Type of use	Amount			
Elk Lake	Human Consumption	0.005	☒ cfs	☐ gpm	☐ af
			☐ cfs	☐ gpm	☐ af
			☐ cfs	☐ gpm	☐ af
			☐ cfs	☐ gpm	☐ af

C. Period of Use

Indicate the time of year you propose to use the water: May 1 - November 30

(For seasonal uses like irrigation give dates when water use would begin and end, e.g. March 1-October 31.)

D. Acreage

If you will be applying water to land, indicate the total number of acres where water will be applied or used:

(This number should be consistent with your application map.)

NA

4. WATER MANAGEMENT**A. Diversion**

What method will you use to divert water from the source?

See Attachment C

☐ Pump (give horsepower and pump type):

☐ Head-gate (give dimensions):

☐ Other means (describe):

B. Monitoring

How will you monitor your diversion to be sure you are within the limits of your water right (allowed rate and duty) and you are not wasting water?

☐ Weir

☐ Meter

☐ Periodic Sampling

☒ Other means (describe): Bucket and Stopwatch

5. RESOURCE PROTECTION

A. Protection Practices

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

☒ Diversion will be screened to prevent uptake of fish and other aquatic life.

Describe planned actions: Pump has 1/8" mesh screen

☒ Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas. Describe planned actions: Pump removed each winter.

No excavation needed. Pipe is run on surface of ground

☒ Operating equipment in a water body will be managed and timed to prevent damage to aquatic life. Describe: _____

☐ Water quality will be protected by preventing erosion and run-off of waste or chemical products. Describe: No run off

☐ Other: _____

6. PROJECT SCHEDULE

Indicate the anticipated dates that the following construction tasks should begin. If construction has already begun, or is completed, please indicate that date.

Proposed date construction will begin: Not Applicable

Proposed date construction will be completed: Not Applicable

Proposed date beneficial water use will begin: Immediately upon applicaton approval

7. REMARKS

If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.

See cover letter

8. MAP REQUIREMENTS

The Department cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the township, range, section, and quarter/quarter section of the proposed points of diversion and place of use. The map must provide tax lot numbers. See the map guidelines sheet for detailed map specifications.

9. SIGNATURE

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be canceled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit to me, I may have to stop using water to allow senior water right holders to get water they are entitled to, and

I swear that all information provided in this application is true and correct to the best of my knowledge:

Signature of Applicant (If more than one applicant, all must sign.)

8/31/07
Date

Before you submit your application be sure you have:

- Answered each question completely.
- Attached a legible map which includes township, range, section, quarter/quarter and tax lot number.
- Included a Land Use Information Form or receipt stub signed by a local official.
- Included the legal description of all the property involved with this application. You may supply a copy of the deed, land sales contract, or title insurance policy, to meet this requirement.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount. The Department's fee schedule can be found at www.wrd.state.or.us or call (503) 986-0900.

Oregon Water Resources Department

Application Supplement for Human Consumption & Livestock Uses

For water use permit applications within or above scenic waterways, or from streams for which water is not available due to required instream flows, the Department may issue limited permits for human consumption and livestock uses. Human consumption use is limited to use of water for drinking, cooking, and sanitation, and does not include other uses such as lawn or garden watering or other related water uses.

In order to issue a permit to you for human consumption or livestock use, the Department must find that you cannot reasonably obtain water from any other source. For human consumption, an additional finding must be made that denial of the water right would result in loss of reasonable expectations for use of your property. For livestock use, additional findings must be made that issuance of a permit is necessary to prevent the livestock from watering in or along the stream bed and that you have excluded livestock from the stream and the adjacent riparian zone.

Please answer the following questions, and sign and return this form to Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266.

1. Can you reasonably obtain water from any other source? YES / NO
(circle one)

If not, please describe why each of the following options are not reasonable:

- a. Groundwater, such as a well on yours or a neighbor's property. (If expense is the reason groundwater is not reasonable, please provide two estimates of the cost.)
There are no groundwater wells at Elk Lake
- b. Securing stored water from upstream reservoirs.
No reservoirs exist
- c. Trucking water. (If expense is the reason this option is not reasonable, please provide a copy of an estimate of the cost of trucking water.) -
Unknown if service is even available, USFS has denied permission to construct water reservoir/cistern on USFS lots.

For Recreation Residences
As of March 4, 1915, As Amended
(Ref. FSM 2710)

STEVE AND LESLIE SKELTON of 4460 Fox Hollow Rd., Eugene, OR 97405 (hereafter called the holder) is hereby authorized to use National Forest lands, for a recreation residence for personal recreational use on the Deschutes National Forest, subject to the provisions of this permit including items I.A through XI.D, on page(s) 2 through 8. This permit covers 0.5 acres.

Described as: Lot 11 of the Elk Lake E tract.
(A plat of which is on file in the office of the Forest Supervisor.)

The following improvements, whether on or off the lot, are authorized:

On-lot facilities: toilet, stone fireplace
Off-lot facilities: driveway

This use shall be exercised at least 15 days each year, unless otherwise authorized in writing. It shall not be used as a full-time residence to the exclusion of a home elsewhere.

THIS PERMIT IS NOT TRANSFERABLE
PURCHASERS OF IMPROVEMENTS ON SITES AUTHORIZED BY THIS PERMIT MUST SECURE A NEW
PERMIT FROM THE FOREST SERVICE.

THIS PERMIT IS ACCEPTED SUBJECT TO ALL OF ITS TERMS AND CONDITIONS.

(hereafter called the holder) is hereby authorized to use National Forest lands, for a recreation residence for personal recreational use on the Deschutes National Forest, subject to the provisions of this permit including items I through XI, on page(s) 2 through 8. This permit covers 0.50 acres.

Described as: (1) Lot EL E 15 of the Elk Lake tract.

(A plat of which is on file in the office of the Forest Supervisor.)

The following improvements, whether on or off the site, are authorized in addition to the residence structure:

On-lot facilities: Garage, stairway, fire ring, propane tank.

Off-lot facilities: Maintaining an off-summer-home-lot water supply system (including pipeline, pump, and storage tank) for domestic use only. A strip of land approximately 48 feet in length and 2 feet in width to accommodate a buried pipeline between Elk Lake and the northeast boundary of Tract E, Lot 10.

Driveway, sign.

This use shall be exercised at least 15 days each year, unless otherwise authorized in writing. It shall not be used as a full-time residence to the exclusion of a home elsewhere.

THIS PERMIT IS NOT TRANSFERABLE
PURCHASERS OF IMPROVEMENTS ON SITES AUTHORIZED BY THIS PERMIT MUST SECURE A NEW PERMIT FROM THE FOREST SERVICE.

THIS PERMIT IS ACCEPTED SUBJECT TO ALL OF ITS TERMS AND CONDITIONS.

Summer Home Joint Applicants
Tract E

September 3, 2007

Elk Lake is located in the Oregon Cascades approximately 32 miles from Bend, Oregon. Its elevation is approximately 4900 feet above sea level. Access is by the Cascade Lakes Highway. Oregon Highway 46. Road access is usually allowed between late May and November as the road is closed at Mount Bachelor, 12 miles to the north and at Deschutes Bridge, seven miles to the south by the Oregon State Highway department during the remainder of the year. The road was not paved all the way to Elk Lake until approximately 1960. Hy 46 between Mt Bachelor and Deschutes Bridge is covered by snow the remaining months and is a designated snowmobile trail. During the winter and spring the lake is frozen and covered with snow.

There are 26 summer homes and Elk Lake Lodge on Elk Lake on United States Forest Service leased land. Most of the leases on Elk Lake were granted in the 1920's and 1930's. Many of the summer homes have been associated with the same families who originally obtained leases on the property.

Originally water was taken from several of the springs and streams that flow into the lake. As the Forest Service opened up more land around the lake to leases, the families hauled water from the lake in buckets for their use. While there are several springs around the lake, many of these dry up by mid summer, and the lake is the only available water supply for most of the summer homes.

None of the summer homes on the lake have a well. As Forest Service rules prohibit lawns, and all of the summer homes are in the National Forest, there is no need for irrigation of the land around the lake. Water use is limited to personal use by the summer home owners and is used only during the summer months when the lake is accessible by road and the lake is not frozen, about four to five months a year.

We have been informed that the State of Oregon Water Master for the Deschutes Basin has identified Elk Lake as being a "closed pool," and that it has no outlet. Since the Forest Service has not approved any new leases since the 1930's, the use of Elk Lake for a source of water has been static for approximately 80 years. We hope that your office will take this into consideration when determining the reporting requirements for water usage and that the requirements will either be minimal or not required.

The Forest Service notified the summer home owners in 2007 that water rights need to be obtained as a condition of re-issuing new permits by December 2008.

S-86965

Through the help of the Forest Service, the Water Master for the Deschutes Basin and your Salem Office, we have been granted permission to apply jointly for water rights by tract for those home owners who want to participate in the process as a group.

The attached Surface water application contains individual information regarding the Tract and lot numbers, names of permit holders, and individual information required on your form and in the attachments is included with the application. We have also included a map with points of diversion associated with each of the lots and home owners that have applied.

With respect to Tract E, each of the POD information applies to one lot, with exception of Lots 15 and 10. These two lots are served by one point of diversion that is physically located on lot 10. These two lots belong the Guyer family and the Nelson Cabin Trust. They are identified in the surface application under the information for point of diversion "C". We assume that any permit issued will attach to both lots in that case as well as each of the individual lots and POD's listed in the application.

Since the application contains a number of sections that require individual information about the summer home lots that are associated with each point of diversion, these sections have been identified as attachments. Where separate information is required there is a reference to an attachment that provides the information for each section. We also have included several different maps with different scales. These represent the best maps available that provide an adequate scale and the location of each point of diversion. While the extra maps may be redundant, we hope they will be sufficient to meet your requirements. The hand drawn map was done with the assistance of Jeremy Giffin, Watermaster for the Deschutes Basin. The application along with all of the maps were reviewed by Mr. Giffin before this application was forwarded to the Forest Service for signature.

If you find any errors or omissions in the attached application, please contact Steven Skelton (Tract E, Lot 11) at cell phone number 503-807-6902 so that corrections can be made as quickly as possible.

Thank you
