R-26030 R-1220
Application No. 26031 Permit No. 20597
IN NAME OF

E.E. Krupke

Surveyed Oct. 1 1963, by Ralph Jackson

Permit No.R-1220.....

Application No. R-26030

County **WHEELER**

Preliminary Data for Proof of Appropriation of Water

1. Name E. E. Krupke 2. Address Mitchell, Oregon
3. Source of supply Fort Creek and unnamed tributary thereto
Tributary of Mountain Creek (also known as Badger Creek) a trib. of (John Day River)
4. Amount of water ~~220~~ ^{150.0} acre feet 5. Priority date June 12, 1951
6. Use ~~The right herein granted is limited to the construction of Fort Creek Reservoir~~
~~and the storage of water from Fort Creek and an unnamed tributary thereto to be~~
~~appropriated under Application No. 26031, Permit No. 20597, for irrigation and~~
~~supplemental irrigation.~~
7. Location of ~~point of diversion~~ SW 1/4 Sec. 19 Tp. 12 S. Rg. 24 E., W. M.
(Legal Subdivision)
8. The description of land given below corresponds to that shown in the permit covering land to be irrigated, or, if for other purposes, the place of use.

[illegible]

Land on which water is to be used is part of the property described by appropriator as follows:

REPORT OF PERSON MAKING INSPECTION

Description of works:

Dam: Earthfill,

length: 950'

height: 16⁵/₂₃' from top of conduit downstream,

Crest: 12⁰/₁₄

Freeboard: 6' measured from apparent high water level.

Outlet: 18", gate-value controlled.

Water supplied by ditch from Fort Creek, and by an unnamed tributary which flows directly into Res. Channel at tributary stream separated from Res. by dike - at high water level water backs up into unnamed stream and flows around dike into channel, thus it serves as a spillway.

Info: Mr. Krupke.

Survey tied to ^{19/20}/_{30/29} stone

10⁵

Plans at 6' from crest - surface 31' above cap - 150 a.f. from curve.

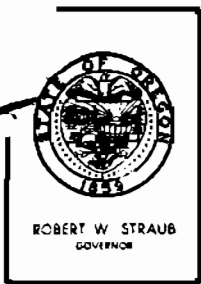

I,, do hereby certify that I have made an inspection of the works described herein and in Permit No., on the day of, 19....., and found the foregoing statements and descriptions of works to be accurate. In my opinion the appropriation has been completed to the extent of
(Quantity of water in second-feet or acre-feet)
and I recommend the issuance of water right certificate for this amount.

NOTICE TO INSPECTORS

If conditions do not justify the above report by you, please return this form without your signature, with a full report by letter.

Dear Mr. Harris:

In July of 1974, you advised that you intended to rebuild the Krupke Reservoir, and had contacted the local Soil Conservation Service to provide the necessary plan and specifications. In July of 1976, at the request of the Soil Conservation Service, we provided them with a set of the original plans and specifications, and in late July of 1976, the area engineer for the Soil Conservation Service advised that that organization would not provide engineering assistance in the preparation of plans and specifications.

Would you please advise of your intentions regarding the structure, and if you intend to rebuild, advise the name of your engineer.

Very truly yours,

A.M. Petska
Engineer

Dear Sir:

In September of 1975 at your request we forwarded a set of prints for the Fort Creek Dam. It was our understanding that the owner, Clinton O. Harris wishes to rebuild this structure and that the Soil Conservation Service will provide plans and specifications. As we mentioned in previous correspondence, these plans and specifications must be reviewed and approved by this department prior to beginning construction. We further pointed out that in order that the existing water rights and that priority date remain in effect, the repair and resumption of use of the stored water must be completed within five years of the date of last use.

Would you please advise as to when we might expect these plans and specifications to be submitted.

Very truly yours,

A. M. Petska

Dear Al,

Maybe I can answer some of your questions in regard to the rebuilding of the Fort Creek Dam by owner Clinton O. Harris, Wheeler Co. and to the SCS involvement at this date.

We have provided Mr. Harris with a geologic report on the rebuilding of the Fort Creek Dam. SCS recommendations to Mr. Harris was "the site conditions do not justify a further attempt at repairing or replacing the existing structure. The site should be dropped from further consideration". In view of this geologic recommendation I doubt very much that we will provide any additional engineering assistance to Mr. Harris for rebuilding the Fort Creek Dam. Our previous commitment to Mr. Harris was for a geologic and preliminary report for the rebuilding. We have also informed Mr. Harris that the SCS could not provide engineering assistance in preparation of plans and specifications due to the shortage of engineering assistance available and also recommended he obtain the service of a licensed consultant engineer.

I do not know his intentions at this date.

Very truly yours,

Elwin A. Ross

Dear Mr. Krupke:

On February 27, 1964, we mailed you copies of proofs of the certificates in connection with the incomplete water rights represented by your permits numbered R-1220 and 20597, together with the instructions that the statement at the bottom of each page be signed and the copies be returned to this office accompanied by the certificate recording fees in the amount of \$2.00.

To date these forms have not been received nor has any correspondence regarding reasons for not returning them been received. This is to notify you that unless we receive the signed final proof forms and the certificate recording fees, or a request for additional time within thirty days from the date of this letter, we will be required to take steps toward the cancellation of these permits.

Dear Mr. Krupke:

Enclosed is the final proof in connection with the incomplete water right represented by your permit number R-1220 and 20597.

The data contained in the proof, which is based on an inspection and survey of your project made by a representative of this department, defines the extent to which your water right has been completed within the terms of your Permit. The proof should be dated and signed by you and returned to this office.

Upon receipt of the proof, properly executed and accompanied by the statutory recording fee of \$1.00, a Certificate of Water Right will be issued confirming the rights thereunder and, after being recorded in the county records, will be forwarded to you.

Very truly yours,

CHRIS L. WHEELER
State Engineer

Re: Applications Nos. R-26030 26031

This will acknowledge receipt of Forms A and B, being notices of the beginning of construction and completion of construction under Permit No. R-1220 and 20597.

These reports have been filed with other matter pertaining to the water right, and the permit is in good standing until October 1, 1955, when under its terms, all the water which it is intended to use at any time should be used to the full extent intended.

Very truly yours,

Chas. E. Stricklin

RECEIVED
NOV 21 1951
STATE ENGINEER
SALEM, OREGON

Dear Sir:

In reply to your letter of Nov. 8, 1951 you are correct in your interpreting the map as showing use of water from an unnamed tributary to Fort Creek, the tributary being an intermittent stream flowing for but a matter of several days each year during the spring run-off or during an occasional, rare cloud burst.

The percentage of appropriation is highly questionable since some years no flow is seen at all. Although the basin represents 11 % of the entire basin shown I would hesitate attributing more than 2 % appropriation to the unnamed tributary.

Your completion of items 1 and 4 in the application will be appreciated.

Very truly yours,

Fred D. Gustafson

Fred D. Gustafson

June 15, 1951

Memo Re: Examination of the Fort Creek Dam Site
E. E. Krupke, Owner

Subject examination was made on March 28, 1951 in company with Fred D. Gustafson, the engineer who has been commissioned to serve as engineer for the project, and Robert D. Conklin of this office.

The site is located on Fort Creek, a tributary of Badger or Mountain Creek, which in turn is a tributary of the John Day River. It is further described as being in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 19, Township 12 South, Range 24 East, W. M.

Topographically, the site is very gently rolling to such an extent that the dam site, proper location for spillway and other features are difficult to distinguish. The drainage area above the site amounts to only .66 square miles, but by means of a feeder ditch, a portion of the runoff of a neighboring area of 5.5 square miles is brought into the reservoir.

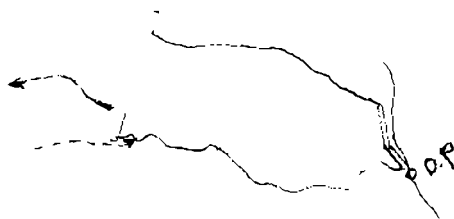

Surface indications are that the dam and reservoir sites have a sufficient depth of a soil overburden to form a tight reservoir and there are no defects or weaknesses apparent that might result in failure of the dam.

Accordingly, it is recommended that the plans and specifications be approved and that the applications be approved and placed in line for the issuance of permits.

Respectfully submitted,

FRED SCHLAFER, Engineer
