HINES, OR 97738

Reference: File G-17073

Dear Mr. Clemens:

**THIS IS NOT A PERMIT AND IS
SUBJECT TO CHANGE AT THE NEXT PHASE OF PROCESSING.**

This letter is to inform you of the preliminary analysis of your water use permit application and to describe your options. In determining whether a water use permit application may be approved, the Department must consider the factors listed below, all of which must be favorable to the proposed use if it is to be allowed. Based on the information you have supplied, the Water Resources Department has made the following preliminary determinations:

Initial Review Determinations:

1. The application requested the use of 3.5 cubic feet per second (CFS) of water, from Well 1 (HARN 1117), Well 3 (HARN 1118), Well 4 (HARN 1116), Well 5 (HARN 1128), and Well A for irrigation use on 280.0 acres from March 1 through October 31 of each year.
2. The proposed use is not prohibited by law or rule except where otherwise noted below.
3. The use of water from Well 1 (HARN 1117), Well 3 (HARN 1118), Well 4 (HARN 1116), Well 5 (HARN 1128), and Well A in Malheur Lake Basin for irrigation use is allowable under the Malheur Lake Basin Program.
4. If properly conditioned, the proposed use of ground water will avoid injury to existing ground water rights and the resource.

The Department has determined, based upon OAR 690-009, that the proposed ground water use will not have the potential for substantial interference with any surface water source.

5. The Department has determined there are deficiencies with the application. Existing Permit G-9879 describes locations of Well 3 and Well 4 that do not match the locations on the application map. In addition, Well 1 and Well A are not shown on the map. Please refer to the **Additional Information Required** section below for specific information.

Summary of Initial Determinations

The use of 3.5 CFS from Well 1 (HARN 1117), Well 3 (HARN 1118), Well 4 (HARN 1116), Well 5 (HARN 1128), and Well A in Malheur Lake Basin for irrigation use on 280.0 acres is allowable during the full period requested, March 1 through October 31.

Because of these favorable determinations, the Department can now move your application to the next phase of the application review process where public interest factors will be evaluated.

Additional Information Required:

Additional information is required to process your application prior to issuance of any Proposed Final Order that may recommend approval. Please provide the following item(s):

- The map submitted does not meet the requirements of OAR 690-310-0050(4)(a). **Please provide a map that shows the location of the five wells by reference to a recognized public land survey corner.** The location may be shown by distance and bearing (distance north or south and distance east or west from the corner) or by coordinates. Please be sure to clearly label each well and the corresponding coordinates on the revised map that you submit.

Permit G-9879 indicates the location of Well 3 as 1370 feet North, and 1270 feet West, from the SE Corner, Section 9, Township 25 South, Range 31 East, W.M. Your map describes Well 3 as 1310 feet North and 1270 feet West, from the SE Corner, Section 9, Township 25 South, Range 31 East, W.M.

Permit G-9879 also indicates the location of Well 4 as 1400 feet North and 620 feet East from the SW Corner, Section 10, Township 25 South, Range 31 East, W.M. Your map describes the location of Well 4 as 1135 feet North and 700 feet East, from the SW Corner, Section 10, Township 25 South, Range 31 East, W.M.

Please submit this information no later than Thursday, January 8, 2009. If you are unable to submit the information listed above, you may request an administrative hold for up to an additional 180 days. You must submit the request in writing, stating how much more time you will need and why you need additional time. If an administrative hold is granted, your application will not be processed further until the requested information is received or the extended deadline has passed.

If we do not receive the items requested above or a request for an administrative hold by this date, the Department will likely proceed with a Proposed Final Order recommending denial of the application.

Please reference the application number when sending any correspondence regarding the conclusions of this initial review. Comments received within the comment period will be evaluated at the next phase of the process.

To Proceed With Your Application:

If you choose to proceed with your application, you do not have to notify the Department. Your application will automatically be placed on the Department's Public Notice to allow others the opportunity to comment. After the comment period the Department will complete a public interest review and issue a Proposed Final Order.

Withdrawal Refunds:

If you choose not to proceed, you may withdraw your application and receive a refund (minus a \$150 processing charge per application.) To accomplish this you must notify the Department in writing by **Friday, December 19, 2008**. For your convenience you may use the enclosed "STOP PROCESSING" form.

If A Permit Is Issued It Will Likely Include The Following Conditions:

1. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter or other suitable measuring device as approved by the Director at each point of appropriation. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
 - B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
2. The Department requires the water user to obtain, from a qualified individual (see below), and report annual static water levels for each well on the permit. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

The permittee shall report an initial March static water-level measurement once well construction is complete and annual measurements thereafter. Annual measurements are required whether or not the well is used. The first annual measurement will establish a reference level against which future measurements will be compared. However, the Director may establish the reference level based on an analysis of other water-level data. The Director may require the user to obtain and report additional water levels each year if more data are needed to evaluate the aquifer system.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board. Measurements shall be submitted on forms provided by, or specified by, the Department. Measurements shall be made with equipment that is accurate to at least the standards specified in OAR 690-217-0045. The Department requires the individual performing the measurement to:

- A. Associate each measurement with an owner's well name or number and a Department well log ID; and
- B. Report water levels to at least the nearest tenth of a foot as depth-to-water below ground surface; and
- C. Specify the method of measurement; and
- D. Certify the accuracy of all measurements and calculations reported to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the wells if any of the following events occur:

- A. Annual water-level measurements reveal an average water-level decline of three or more feet per year for five consecutive years; or
- B. Annual water-level measurements reveal a water-level decline of 15 or more feet in fewer than five consecutive years; or
- C. Annual water-level measurements reveal a water-level decline of 25 or more feet; or
- D. Hydraulic interference leads to a decline of 25 or more feet in any neighboring well with senior priority.

The period of restricted use shall continue until the water level rises above the decline level which triggered the action or the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or causing substantial interference with senior water rights. The water user shall not allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

The water source identified in your application may be affected by an Agricultural Water Quality Management Area Plan. These plans are developed by the Oregon Department of Agriculture (ODA) with the cooperation of local landowners and other interested stakeholders, and help to ensure that current and new appropriations of water are done in a way that does not adversely harm the environment. You are encouraged to explore ODA's Water Quality Program web site at http://www.oregon.gov/ODA/NRD/water_agplans.shtml to learn more about the plans and how they may affect your proposed water use.

If you have any questions:

Feel free to call me at 503-986-0853 if you have any questions regarding the contents of this letter or your application. Please have your application number available if you call. General questions about water rights and water use permits should be directed to our customer service staff at 503-986-0801. When corresponding by mail, please use this address: Michele McAleer, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266. Our fax number is 503-986-0901.

Sincerely,

A handwritten signature in black ink that reads "Michele R. McAleer". The signature is written in a cursive, flowing style.

APPLICATION FACT SHEET

Application File Number: G-17073

Applicant: TIM CLEMENS

County: HARNEY

Watermaster: 10

Priority Date: JUNE 17, 2008

Source: WELL 1 (HARN 1117), WELL 3 (HARN 1118), WELL 4 (HARN 1116), WELL 5 (HARN 1128), AND WELL A IN MALHEUR LAKE BASIN

Use: IRRIGATION USE ON 280.0 ACRES

Quantity: 3.5 CUBIC FEET PER SECOND

Basin Name & Number: Malheur Lake, #12

Stream Index Reference: Volume 2 MALHEUR L & MISC

Well Locations:

WELL 1 (HARN 1117) - NENE, SECTION 9, T25S, R31E, W.M.; 4100 FEET NORTH AND 340 FEET WEST FROM SE CORNER, SECTION 9

WELL 3 (HARN 1118) - SESE, SECTION 9, T25S, R31E, W.M.; 1370 FEET NORTH AND 1270 FEET WEST FROM SE CORNER, SECTION 9

WELL 4 (HARN 1116) - NWSW, SECTION 10, T25S, R31E, W.M.; 1135 FEET NORTH AND 700 FEET EAST FROM SW CORNER, SECTION 10

WELL 5 (HARN 1128) - NWNE, SECTION 16, T25S, R31E, W.M.; 1295 FEET SOUTH AND 2100 FEET WEST FROM NE CORNER, SECTION 16

WELL A (PROPOSED) - SWNE, SECTION 9, T25S, R31E, W.M.; 480 FEET SOUTH AND 600 FEET WEST FROM NE CORNER, SECTION 9

Place of Use:

NE $\frac{1}{4}$ SW $\frac{1}{4}$ 40.0 ACRES
SE $\frac{1}{4}$ SW $\frac{1}{4}$ 40.0 ACRES
NW $\frac{1}{4}$ SE $\frac{1}{4}$ 40.0 ACRES
