

615187
6-17157

Scale
1"=1000'

NARRATIVE:

The Purpose of this map is to show plan for developing undeveloped Farm ground. The land as shown should have the proper pH to grow organic Alfalfa hay for organic livestock feed.

The map is based upon assessor map, topog/gaod map, & US D Aerial map without benefit of actual survey. All measurements are approximate only.

Proposed well location is based upon the services of a Water Downset. Well constructors tell me the well should be located after drilling a Discovery Hole or Holes.

Our top priority would be the 110, M/L, acre Pivot with second priority being the 20, M/L, acre wheel line with the 30, M/L, acre wheel line last. Our irrigation experts, J.W. Kerns @ K/ramath Falls, tell us they could design a system with two wells to supply the pivot if necessary.
