Reference: File G-16615

Dear Applicant:

On September 18, 2008, the Water Resources Department issued a Final Order for Application G-16615. The Final Order identified documentation that Well 1 complies with current minimum well construction standards must be submitted to the Department no later than 60 days from the date of the final order and that failure to submit the required documentation within 60 days from the date of the final order may result in the proposed rejection of Application G-16615. As of the date of this letter, the Department has not yet received the requested documentation.

In repairing the well, the well owner should work closely with the Department and/or a licensed well constructor to ensure that repairs are carried out in a manner that will not violate well construction or other rules. The well owner is encouraged to contact Kris Byrd of the Department's Enforcement Section at 503-986-0851 to determine how to proceed.

Please also note that regardless of the outcome of this application, you will need to work with the Department to either repair or abandon the well(s) to comply with the minimum standards for the construction, conversion, alteration, maintenance, and abandonment of water supply wells in order to protect the state's ground water supply (OAR 690-200).

Please submit documentation that Well 1 complies with current minimum well construction standards no later than **February 28, 2009**. If we do not receive the requested information by the above date, **we will need to remove Well 1 from the application and issue a Superceding Final Order.**

If you have any questions, please feel free to call me at 503-986-0815.

Sincerely,

Joel Plahn
Water Rights Caseworker
