### INTEROFFICE MEMO

FORWARD TO: Sarah Henderson DATE: 10-12-06  
FIELD PROCESSOR WORKING ON THIS TRANSFER

FROM: ~~\_\_\_\_\_~~ WATERMASTER, DISTRICT # 3  
GROUNDWATER SECTION

(SIGNATURE) \_\_\_\_\_ *date signed*  
signed by injury reviewer

SUBJECT: WATER RIGHT TRANSFER # 10239

A change in: POU POD POA USE of water.

In the name(s) of Ashley Family Ranch LLC

In my opinion (assuming the right is valid), the proposed change

MAY BE MADE WITHOUT INJURY WOULD RESULT IN INJURY\* to an existing water right.

\*The approval of this transfer application would result in injury to other water rights because \_\_\_\_\_

Headgate notices HAVE HAVE NOT Been issued for diversion from the source(s) which serve(s) this right.

If for change in point of diversion, is there any intervening point(s) for diversion between the authorized and proposed points of diversion? (Yes or No) NO

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

- X (1) PRIOR to the diverting of water at the new point of diversion . . . *see attached memo*
- \_\_\_\_\_ (2) WHEN IN the judgement of the watermaster it becomes necessary . . .

The enclosed copy of the transfer application and map(s) is for your records.

**Subject:** T-10239, Ashley Family Ranch LLC

---

The proposed additional POD is in a priority WAB, so I am recommending we require a measuring device.

It is my understanding that the original POD is an open gravity-flow ditch with a headgate and the new additional POD will be a pump station that will pump water up to the ditch. I think a single measuring device on the ditch will be sufficient, somewhere below the point where the inflow from the pump enters the ditch, so it can measure total flow from both POD's. I would recommend a Parshall flume, v-notch weir, standard contracted weir, or something similar as appropriate.

  
Robert Wood  
District 3 Watermaster
