One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet.

You can submit a Notice of Exemption Reservoir if your pond stores less than 400,000 cubic feet (43,560 x 9.2).
