2. LOCATION AND SOURCE

A. Reservoir Name: Revana #2 Reservoir

B. Source: Provide the name of the water body or other source from which water will be diverted, and the name of the stream or lake it flows into. Indicate if source is run-off, seepage, or an unnamed stream or spring.

Source: Unnamed swale Tributary to: Chehalem Creek

C. Reservoir Location

Township (N or S)	Range (E or W)	Section	quarter/quarter	tax lot number
3S	3W	17	SW/SE	101

D. County of Use: Yamhill

E. Dam: Maximum height of dam: 20 feet. If excavated, write "excavated" or "0 feet".

F. Quantity: Amount of water to be stored in the reservoir at maximum capacity.

List quantity in Acre-Feet: 9.1

3. WATER USE

Indicate the proposed use(s) of the stored water. **NOTE: You may wish to consider filing for "Multipurpose use" for your reservoir. Multipurpose use does not limit the types of future uses for the stored water. Multipurpose covers all uses including: stockwater, fish and wildlife, aesthetics, domestic, irrigation, agriculture, fire protection and pollution abatement.** If any use will be out of reservoir use, regardless of the type of storage listed, a secondary application must be filed to appropriate the stored water.

This letter provides additional information for the attached Revana Vineyards water right applications. The application includes two alternate process reservoirs and a surface water application that includes irrigation. The owner plans to use the water for a range of purposes (listed on the reservoirs as "multipurpose") including but not limited to wildlife, aesthetics, fire suppression, and irrigation.

In the surface water application, the owner requests to irrigate from these reservoirs on the entire property. We realize that the proposed storage of these reservoirs is much less volume than the maximum duty allowed for irrigation (2.5 AF per acre of irrigation). The owner does not plan to irrigate in amounts close to this maximum allowed volume. However, the owner proposes to beneficially use irrigation water in the following methods.

1. Establish new vines or re-establish vines, as needed, using drip irrigation or hand watering.
2. If certain vines are suffering from drought, the owner may want to irrigate certain vines using hand watering via trucks or drip irrigation.
3. Sometimes vineyards need to add some water at certain periods prior to harvest to control the quality of the grapes. This, again, will likely be accomplished via using hand watering via trucks or drip irrigation.
4. At times the vineyard may wish to establish erosion control vegetation. The vegetation may need to be watered depending on the year and this would likely be done via hand watering or using typical Rainbird overhead sprinklers.

Clearly, none of these uses will require having storage equivalent to $[2.5 \text{ AF/yr} * 79.7 \text{ acres} = \sim 200 \text{ AF}]$ the maximum duty for irrigation. The owner may not have enough stored water in some years to fulfill all of their potential watering needs and they are entering into this process with that knowledge. The owner may irrigate from the ponds until they are dry or may not use them at all depending on the year.

We request that Water Resources please consider these facts when reviewing the applications.
