C. Application/Distribution Method

What equipment will you use to apply water to your place of use?

micro-sprinkler system

Irrigation or land application method (check all that apply):

- Flood High pressure sprinkler Low pressure sprinkler
 Drip Water Cannons Center pivot system
 Hand Lines Wheel Lines
 Siphon tubes or gated pipe with furrows
 other. describe: micro-sprinklers

Distribution method

- Direct pipe from source In-line storage (tank or pond) Open Canal

E. Conservation

What methods will you use to conserve water? Why did you choose this distribution or application method? Have you considered other methods to transport, apply, distribute or use water? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

The micro-sprinkler system has been tested at University of California at Davis and other research centers in the U.S. and Europe. Coupled with irrigation mostly from dusk to dawn, and with soil moisture measurements, this system will be able to conserve water well.

Indicate the anticipated dates that the following construction tasks should begin. If construction has already begun, or is completed, please indicate that date.

Proposed date construction will begin: TBD

Proposed date construction will be completed: May 15, 2010

Proposed date beneficial water use will begin: May 15, 2010

Is this project fully or partially funded by the American Recovery and Reinvestment Act? (Federal stimulus dollars) Yes No
