**E. Conservation**

What methods will you use to conserve water? Why did you choose this distribution or application method? Have you considered other methods to transport, apply, distribute or use water? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

The City has a Water Management and Conservation Plan (WMCP) that describes the various conservation measures that the City will implement. The City understands that a new permit will include a requirement to update the WMCP within a prescribed period of time. Monroe is seeking to obtain access to water from Well #3 to meet growing demand and to build water supply redundancy.

**6. PROJECT SCHEDULE**

Indicate the anticipated dates that the following construction tasks should begin. If construction has already begun, or is completed, please indicate that date.

Proposed date construction will begin: Began 3-29-02, mostly completed by 4-10-02

Proposed date construction will be completed: Within 20 years of permit issuance.

Proposed date beneficial water use will begin: Within 20 years of permit issuance.

Is this project fully or partially funded by the American Recovery and Reinvestment Act? (Federal stimulus dollars)  Yes  No

**7. REMARKS**

*If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.*

Monroe has recently completed a new surface water diversion project to meet long-term supply needs. However, the City continues to develop its ground water resources to help meet these needs and to act as a fully redundant (second source) water supply. The maximum number of gallons per year calculated above is based on 150 gpm on a year-round basis. However, as noted, well 3 is intended as a backup water supply and it is unlikely that the City will need to use well 3 continuously for an entire year.

## 8. MAP REQUIREMENTS

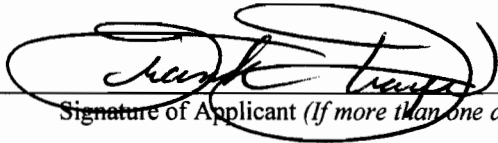

The Department cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the township, range, section, and quarter/quarter section of the proposed well location and place of use. The map must provide tax lot numbers. See the map guidelines sheet for detailed map specifications.

## 9. SIGNATURE

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be canceled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to get water to which they are entitled.

I swear that all information provided in this application is true and correct to the best of my knowledge:

Signature of Applicant (If more than one applicant, all must sign.)

**Request for Water**

A. Discuss the reason(s) for your request for additional water

(e.g. loss of current supply, peak demand, growth, or other): The City of Monroe's primary source of water is surface water from the Long Tom River. Monroe has two permitted wells (Well 1 and Well 2) that provide a partial backup supply of water. Monroe is applying for a permit for Well 3 to add to water supply redundancy.

B. How long is the amount of water requested in this application expected to meet future needs?

(e.g. until the year 2040) Provide partial redundant supply to meet demand through year 2027.

C. Briefly discuss operation of water system and the most constraining component of the system:

Monroe obtains water primarily from the Long Tom River. This water is treated at a water treatment plant. Monroe has three existing wells. Wells 1 and 2 are permitted, and are used as partial backup water sources when needed. Well 3 will also serve as a component of the backup water supply. All water is used in Monroe for municipal purposes.

D. Percentage of water use by type:

Residential: _____	Commercial: <u>13%</u>
Public Authority: _____	Agricultural: _____
Unaccounted for use: <u>27%</u>	Industrial: _____
Other (specify use): <u>Residential 60%</u>	

E. List cost to implement proposed request.

*Compare cost and benefits with other water supply, or combination of supply options. This should include water efficiency measures such as replacing current showerheads with low-flow types. (Attach documentation, as available.)*

Monroe has conducted a comparison of costs and benefits of other water supply options and efficiency measures. For details, please see Monroe's 2008 Water Management and Conservation Plan that is on file with OWRD.

F. How and by how much will your proposed water use efficiency programs increase efficiency?

*(Express as a percentage of per-capita consumption.)*

Monroe has conducted analysis of conservation and efficiency measures. For details, please see Monroe's 2008 Water Management and Conservation Plan that is on file with OWRD.
