- In-line storage (tank or pond)
- Open Canal

**E. Conservation**

What methods will you use to conserve water? Why did you choose this distribution or application method? Have you considered other methods to transport, apply, distribute or use water? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

This Agricultural water right is intended to supply out-of-season water to olive trees. The trees start as clippings, are initially placed in a greenhouse environment, moved to a containerized system and eventually transplanted to fields. The field water will be used to increase soil moisture content prior to irrigation season, frost protection and chemical application. When necessary, water will be applied by a sprinkler system. Where possible, water will be applied through a drip system.
