B. Amount of Water

Provide the production rate in gallons per minute (gpm) and the total annual amount of water you need from each well, from each source or aquifer, for each use. You do not need to provide source information if you are submitting a well log with your application.

Well No	Source or aquifer	Type of use	Total rate of water requested (in gpm)	Total annual quantity (in gallons)	Production rate of well (in gpm)

(The fees for your application will be based on this amount.)

D. Period of Use

Indicate the time of year you propose to use the water: irrigation: Mar. 1-Oct. 31; agriculture: all year
(For seasonal uses like irrigation give dates when water use would begin and end, e.g. March 1-October 31.)

E. Acreage

If you will be applying water to land, indicate the total number of acres where water will be applied or used: 70

(This number should be consistent with your application map.)

Irrigation or land application method (check all that apply):

- | | | |
|--|--|--|
| ☐ Flood | ☐ High pressure sprinkler | ☒ Low pressure sprinkler |
| ☒ Drip | ☐ Water Cannons | ☐ Center pivot system |

What methods will you use to conserve water? Why did you choose this distribution or application method? Have you considered other methods to transport, apply, distribute or use water? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

There is a limited amount of water available for the acreage we want to cover, so we are using drip tube application which conserves water by concentrating it where it is most needed.

6. PROJECT SCHEDULE

Indicate the anticipated dates that the following construction tasks should begin. If construction has already begun, or is completed, please indicate that date.

Proposed date construction will begin: Fall 2010 (if permit granted by then)

7. REMARKS

If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.

3. A I am applying for two wells, as I am not sure how much water we will be able to produce from one well. So I am applying for 67gpm flow from the aggregate of one or two wells. If the first well has sufficient water the second well would not have to be drilled.
