

DEQ DIVISION 33 APPLICATION REVIEW SHEET

Recommendations for Water Right Applications that may affect the
Habitat of Sensitive, Threatened or Endangered Fish Species, OAR 690-33-310 through 340.

Date: 2/15/08 Please return to WRD before **March 20, 2008**. Application #: S-86866

Applicant's Name: **KENT MADISON**

Source: **COLUMBIA RIVER, A TRIBUTARY TO PACIFIC OCEAN**

1) Is there a connection to a 303(d) listed water quality limited water body? NO YES

Explain: The proposed withdrawal site is located on the Columbia River. In this river segment, the Columbia River is 303 (d) listed for Dioxin, pH, temperature, and total dissolved gas (TDG).

2) What is the potential for this use to impact a water quality limited water body: HIGH MEDIUM LOW

Explain: Withdrawal of the identified volume is not projected to result in degraded water quality or measurable flow reductions in the Columbia River.

3) If the answer to question (2) is HIGH or MEDIUM, will the proposed use still result in diminution of water quality for the habitat of sensitive, threatened, or endangered fish species? NO YES

If YES, how? _____

4) Can conditions be applied to mitigate the impact of the use? NO YES

Which conditions are recommended? (select from Menu of Conditions)

Unknown – recommendations for appropriate mitigation measures will be dependant on the species in questions and should be made by ODFW or other appropriate entity. _____

5) If conditions cannot be identified to offset impacts, would the proposed use affect the Habitat of Sensitive, Threatened, or Endangered Fish Species? NO YES

If YES, please explain: Unknown – determination of effects to sensitive, threatened or endangered species should be made by ODFW or other appropriate entity.

6) If a permit is issued, are there any conditions you would like to see included in the permit?

If water use is permitted, it is recommended that water withdrawals be restricted if the quality of the source stream or downstream waters decreases due to the withdrawal or any associated reduction in in-stream flow. _____

7) Your recommendation under OAR 690-033-0330 (2): Approval with conditions
 Approval without conditions
 Denial
