Jeana,

Here you go! Could you give me the status on this one? Danette mentioned there were some issues that came up and I don't want to be surprised.

Hi Doug -

It has come to my attention that you faxed the DEQ Alternate Reservoir Review for R-87376 to OWRD sometime in September 2009. The Department never received the fax. Can you please re-send it? My preference would be for you to send it via email; if that doesn't work, please mail it. Once I receive it, I will let you know.

Here is a link to the application materials in case you need to jog your memory:

DEQ ALTERNATE RESERVOIR APPLICATION REVIEW SHEET

Willamette ← Parrot Creek ← POND on TRIB

In lieu of the water right application process set forth in ORS 537.140 to 537.211, an owner of a reservoir may submit an alternate reservoir application for a reservoir that has a storage capacity less than 9.2 acre-feet or a dam or impoundment structure less than 10 feet in height. ORS 537.409 describes the criteria used to evaluate alternate reservoir applications. The review shall be limited to issues pertaining to: a) water availability, b) potential detrimental impact to existing fishery resources; and c) potential injury to existing water rights. (ORS 537.409 (6))

Within 60 days after the department provides public notice...any person may submit detailed, legally obtained information in writing, requesting the department to deny the application for a permit on the basis that the reservoir: (a) Would result in injury to an existing water right; or (b) Would pose a significant detrimental impact to existing fishery resources. (ORS 537.409 (5))

The review of alternate reservoirs is limited to these criteria only.

Recommendations for Water Right Applications under the Alternate Reservoir review process (ORS 537.409)

|-------------------------------|-----------------------------------|
| Date: May 15, 2009 | R-87376 |
| Please return to | DAVE OBRIST |
| WRD before: June 19, 2009 | |
| Water is available: Jan - Dec | PO BOX 2560 CLACKAMAS OR 97015 |

1) Would the proposed reservoir pose a significant detrimental impact to an existing fishery resource? **NO / YES**

with conditions below

Explain: Water quality or fish habitat impacts are a potential with this proposed pond. In-channel reservoirs pose greater threats to both than off-channel ponds. WRD and the Watermaster should confirm that this pond is off-channel. Regardless of location, reservoirs of this type have the potential to deliver warmer than natural water or sediment that degrades fish habitat to downstream fish bearing reaches. Recommend that appropriate Best Management Practices be followed to prevent habitat impairment and loss of beneficial uses. The Willamette River and its tributaries are water quality limited due to temperature and a TMDL is in place to address this water quality problem.

2) Did you meet with staff from another agency to discuss this application? **NO / YES**
