

## INTEROFFICE MEMORANDUM

TO: Kris Byrd

April 30, 2010

FROM: Kerry Kavanagh

RE: Application G-16989 City of Merrill

---

---

On April 9, 2010, the Department issued a Final Order and draft permit pending the compliance of Well 1 (KLAM 14959) with current minimum well construction standards.

On April 29, 2010, the Department received a letter from Darryl Anderson, on behalf of the applicant, requesting evaluation of his assessment that with the installation of an access port into the side of the casing, that Well 1 (KLAM 14959) will meet current minimum well construction standards. Mr. Anderson described that the well is equipped with an air line for water level measurement.

Please review the information submitted and determine what the applicant will need to do in order to meet current minimum well construction standards.

Please route the file to me when finished and I will notify the applicant and Mr. Anderson *of* the next necessary steps.

Thanks, Kris!

Kerry
