I don't believe that the proposed season will result in injury to downstream users. I agree with the storage season.

Scott C. White

Watermaster, District #21

Oregon Water Resources Department

221 S. Oregon St. #221

PO Box 427

Condon, OR 97823

Since we now have a Watermaster in District #21, Scott White, I think it best we refer these to him. I have called Scott this morning and he has agreed to look into what he thinks would be an appropriate season given that we do not need to consider Division 33 rules.

Hi Tony,

On December 17, 2010, I received revised reviews from Brent Smith, ODFW for these alternate reservoir applications. Brent has recommended a storage season from December 1 through June 30, based on water availability.

Here are links to ODFW revised reviews:

App R-87314: http://apps2.wrd.state.or.us/apps/misc/vault/vault.aspx?Type=WRFolder&folder_image_id=31532

App R-87315: http://apps2.wrd.state.or.us/apps/misc/vault/vault.aspx?Type=WRFolder&folder_image_id=31535

App R-87316: http://apps2.wrd.state.or.us/apps/misc/vault/vault.aspx?Type=WRFolder&folder_image_id=31534

App R-87317: http://apps2.wrd.state.or.us/apps/misc/vault/vault.aspx?Type=WRFolder&folder_image_id=31536

12/21/2010

App R-87318: http://apps2.wrd.state.or.us/apps/misc/vault/vault.aspx?Type=WRFolder&folder_image_id=31537

Do you agree with this storage season? If not, please define the storage season you recommend.

Per the water availability report, water is available at 50% from December 1 through June 30 (WID 30620422 Kahler Creek > John Day River – at mouth).

On your 4-22-09 review, question 2, you wrote: "Irrigation season under John Day Decree is April 1 through September 30. Division 33 may indicate an end to storage season of April 15 even though regulation not likely to order that early in season. --- you also indicated condition "b51a" but did not indicate what storage season you recommend.

Kerry
