

**Oregon Water Resources Department
Water Rights/Adjudications Division**

Water Rights Application
Number S-87641

Prior to the issuance of a permit, the Department must receive an executed and valid contract with the Bureau of Reclamation authorizing appropriation of stored water from Applegate Reservoir.

Please include your application number on any documents submitted to the Oregon Water Resources Department.

Proposed Final Order

Summary of Recommendation: The Department recommends that the attached draft permit be issued with conditions.

Application History

On July 19, 2010, Thomas and Vicky Van Saun submitted an application to the Department for the following water use permit:

- Amount of Water: 52.0 ACRE FEET (AF), BEING 40.0 AF FROM APPELEGATE RESERVOIR, CONSTRUCTED UNDER PERMIT R-7810, FOR IRRIGATION AND SUPPLEMENTAL IRRIGATION, AND 12.0 AF FROM RESERVOIR 1, TO BE CONSTRUCTED UNDER APPLICATION R-87640, PERMIT R-XXXXX, FOR IRRIGATION, SUPPLEMENTAL IRRIGATION, AND TEMPERATURE CONTROL
- Use of Water: IRRIGATION OF 15.9 ACRES; SUPPLEMENTAL IRRIGATION OF 14.15 ACRES; TEMPERATURE CONTROL
- Source of Water: APPELEGATE RESERVOIR, A TRIBUTARY OF APPELEGATE RIVER; RESERVOIR 1, A TRIBUTARY OF APPELEGATE RIVER
- Area of Proposed Use: JACKSON COUNTY WITHIN SECTION 31, TOWNSHIP 37 SOUTH, RANGE 4 WEST, W.M.; AND SECTION 6, TOWNSHIP 38 SOUTH, RANGE 4 WEST, W.M.

On August 27, 2010, the Department mailed the applicant notice of its Initial Review, determining that *"The use of 40.0 AF from Applegate Reservoir, for irrigation of 15.9 acres and supplemental irrigation of 14.15 acres is allowable from April 1 through October 31, contingent upon submittal of a valid contract with the Bureau of Reclamation. The use of 12.0 AF from Reservoir 1 for irrigation of 15.9 acres and supplemental irrigation of 14.15 acres and temperature control is allowable from April 1 through October 31 for irrigation and supplemental irrigation, and year-round for temperature control,*

contingent upon approval of Application R-87640." The applicant did not notify the Department to stop processing the application within 14 days of that date.

On August 31, 2010, the Department gave public notice of the application in its weekly notice. The public notice included a request for comments, and information for interested persons about obtaining future notices and a copy of the Proposed Final Order.

Within 30 days of the Department's public notice, written comments were received from Norm Daft, on behalf of the applicant, clarifying the use of stored water and to request modification of the measuring, reporting, and recording conditions.

On January 28, 2011, Kathy Smith, Watermaster District #14, wrote an email correspondence recommending that a totalizing flow meter be required at each point of diversion.

In reviewing applications, the Department may consider any relevant sources of information, including the following:

- recommendations by other state agencies
- any applicable basin program
- any applicable comprehensive plan or zoning ordinance
- the amount of water available
- the rate and duty for the proposed use
- pending senior applications and existing water rights of record
- the Scenic Waterway requirements of ORS 390.835
- applicable statutes, administrative rules, and case law
- any comments received

Findings of Fact

The Rogue Basin Program allows irrigation, supplemental irrigation, and temperature control.

The Department has evaluated the comments from Mr. Daft and has consulted with the local watermaster. The Department determined that the measurement, recording, and reporting conditions require the installation of a totalizing flow meter prior to appropriation of water, and that the water use be recorded monthly and reported annually to the Department.

Senior water rights exist on Applegate Reservoir, constructed under Permit R-7810, a tributary of Applegate River, and Reservoir 1, to be constructed under Application R-87640, a tributary of Applegate River, or on downstream waters.

Applegate Reservoir, constructed under Permit R-7810, a tributary of Applegate River, and Reservoir 1, to be constructed under Application R-87640, a tributary of Applegate River, are above the Rogue River State Scenic Waterway.

Stored water is available for further appropriation from water legally stored under Permit R-7810 (Applegate Reservoir), contingent upon submission of a valid contract between the applicant and the Bureau of Reclamation to appropriate stored water.

Stored water is available for further appropriation from water legally stored under Application R-87640, Permit R-XXXXX (Reservoir 1), contingent upon approval of Application R-87640.

The Department finds that the amount of water requested, 52.0 AF, is an acceptable amount, unless further limited by the Bureau of Reclamation.

In accordance with OAR 690-033-0330, an interagency team reviewed this proposed use for potential adverse impacts on sensitive, threatened and endangered fish populations. This team consisted of representatives from the Oregon Departments of Water Resources (WRD), Environmental Quality (DEQ), Fish and Wildlife (ODFW), and Agriculture. WRD and ODFW representatives included both technical and field staff. The interagency team recommended that additional limitations or conditions of use be imposed on this application as follows:

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

Conclusions of Law

Under the provisions of ORS 537.153, the Department must presume that a proposed use will not impair or be detrimental to the public interest if the proposed use is allowed in the applicable basin program established pursuant to ORS 536.300 and 536.340 or given a preference under ORS 536.310(12), if water is available, if the proposed use will not injure other water rights and if the proposed use complies with rules of the Water Resources Commission.

The proposed use requested in this application is allowed in the Rogue Basin Program, or a preference for this use is granted under the provisions of ORS 536.310(12).

Water is available for the proposed use.

The proposed use will not injure other water rights.

The proposed use complies with other rules of the Water Resources Commission not otherwise described above.

The application is in compliance with the State Agency Coordination Program regarding land use.

For these reasons, the required presumption has been established.

Once the required presumption has been established, under the provisions of ORS 537.153(2) it may be overcome by a preponderance of evidence that either:

- (a) One or more of the criteria for establishing the presumption are not satisfied; or
- (b) The proposed use will impair or be detrimental to the public interest as demonstrated in comments, in a protest . . . or in a finding of the department that shows:
 - (A) The specific public interest under ORS 537.170(8) that would be impaired or detrimentally affected; and
 - (B) Specifically how the identified public interest would be impaired or detrimentally affected.

In this application, all criteria for establishing the presumption have been satisfied, as noted above. The presumption has not been overcome by a preponderance of evidence that the proposed use will impair or be detrimental to the public interest.

The Department therefore concludes that the proposed use will not impair or be detrimental to the public interest as provided in ORS 537.170.

When issuing permits, ORS 537.211(1) authorizes the Department to include limitations and conditions which have been determined necessary to protect the public interest. The attached draft permit is conditioned accordingly.

Recommendation

The Department recommends that the attached draft permit be issued with conditions.

DATED February 15, 2011

E. Timothy Wall

for Phillip C. Ward, Director
Water Resources Department

*If you have any questions,
please check the information
box on the last page for the
appropriate names and
phone numbers.*

Protests

Under the provisions of ORS 537.153(7) (for surface water) or ORS 537.621(8) (for ground water), you can protest this Proposed Final Order. Protests must be received in the Water Resources Department no later than **April 1, 2011**. Protests must be in writing, and must include the following:

- Your name, address, and telephone number;
- A description of your interest in the Proposed Final Order, and, if you claim to represent the public interest, a precise statement of the public interest represented;
- A detailed description of how the action proposed in this Proposed Final Order would impair or be detrimental to your interest;
- A detailed description of how the Proposed Final Order is in error or deficient, and how to correct the alleged error or deficiency;
- Any citation of legal authority to support your protest, if known;
- If you are the applicant, the protest fee of \$300 required by ORS 536.050; and

- If you are not the applicant, the protest fee of \$600 required by ORS 536.050 and proof of service of the protest upon the applicant.
- If you are the applicant, a statement of whether or not you are requesting a contested case hearing. If you do not request a hearing, the Department will presume that you do not wish to contest the findings of the Proposed Final Order.
- *If you do not protest this Proposed Final Order and if no substantive changes are made in the Final Order, you will not have an opportunity for judicial review, protest or appeal of the Final Order when it is issued.*

Requests for Standing

Under the provisions of ORS 537.153(7) (for surface water) or ORS 537.621(8) (for ground water), persons other than the applicant who support a Proposed Final Order can request standing for purposes of participating in any contested case proceeding on the Proposed Final Order or for judicial review of a Final Order.

Requests for standing must be received in the Water Resources Department no later than **April 1, 2011**. Requests for standing must be in writing, and must include the following:

- The requester's name, mailing address and telephone number;
- If the requester is representing a group, association or other organization, the name, address and telephone number of the represented group;
- A statement that the requester supports the Proposed Final Order as issued;
- A detailed statement of how the requester would be harmed if the Proposed Final Order is modified; and
- A standing fee of \$150. If a hearing is scheduled, an additional fee of \$350 must be submitted along with a request for intervention.

After the protest period has ended, the Director will either issue a Final Order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been submitted and either:

- upon review of the issues, the director finds that there are significant disputes related to the proposed use of water, or

- the applicant requests a contested case hearing within 30 days after the close of the protest period.

If you do not request a hearing within 30 days after the close of the protest period, or if you withdraw a request for a hearing, notify the Department or the administrative law judge that you will not appear or fail to appear at a scheduled hearing, the Director may issue a Final Order by default. If the Director issues a Final Order by default, the Department designates the relevant portions of its files on this matter, including all materials that you have submitted relating to this matter, as the record for purpose of proving a *prima facie* case upon default.

This document was prepared by Kerry Kavanagh. If you have any questions about any of the statements contained in this document I am most likely the best person to answer your questions. You can reach me at 503-986-0816.

If you have questions about how to file a protest or a request for standing, please refer to the respective sections in this Proposed Final Order entitled "Protests" and "Requests for Standing". If you have previously filed a protest and want to know its status, please contact Patricia McCarty at 503-986-0820.

If you have other questions about the Department or any of its programs please contact our Customer Service Group at 503-986-0801. Address all other correspondence to:

Water Rights Section, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266, Fax: 503-986-0901.

DRAFT

This is not a permit.

DRAFT

STATE OF OREGON

COUNTY OF JACKSON

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

THOMAS AND VICKY VAN SAUN
PO BOX 1449
JACKSONVILLE, OR 97530

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-87641

SOURCE OF WATER: APPLGATE RESERVOIR, CONSTRUCTED UNDER PERMIT R-7810, A TRIBUTARY OF APPLGATE RIVER; RESERVOIR 1, TO BE CONSTRUCTED UNDER APPLICATION R-87640, PERMIT R-XXXXX, A TRIBUTARY OF APPLGATE RIVER

PURPOSE OR USE: IRRIGATION OF 15.9 ACRES; SUPPLEMENTAL IRRIGATION OF 14.15 ACRES; TEMPERATURE CONTROL

MAXIMUM VOLUME: 52.0 ACRE FEET (AF) EACH YEAR, BEING 40.0 AF FROM APPLGATE RESERVOIR FOR IRRIGATION AND SUPPLEMENTAL IRRIGATION, AND 12.0 AF FROM RESERVOIR 1, FOR IRRIGATION, SUPPLEMENTAL IRRIGATION, AND TEMPERATURE CONTROL

PERIOD OF USE:

MARCH 1 THROUGH OCTOBER 31 - IRRIGATION & SUPPLEMENTAL IRRIGATION
YEAR ROUND - TEMPERATURE CONTROL

DATE OF PRIORITY: JULY 19, 2010

POINT OF DIVERSION/RE-DIVERSION LOCATIONS:

RESERVOIR 1 - NE $\frac{1}{4}$ NE $\frac{1}{4}$, SECTION 6, T38S, R4W, W.M.; 550 FEET SOUTH AND 510 FEET WEST FROM NE CORNER, SECTION 6

APPLGATE RIVER (APPLGATE RESERVOIR) - SE $\frac{1}{4}$ SW $\frac{1}{4}$, SECTION 6, T38S, R4W, W.M.; 850 FEET NORTH AND 1450 FEET EAST FROM SW CORNER, SECTION 6

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 4.5 acre-feet for each acre irrigated during the irrigation season of each year.

Application S-87641 Water Resources Department

PERMIT DRAFT

THE PLACE OF USE IS LOCATED AS FOLLOWS:

	<u>Primary</u>	<u>Supplemental</u>	<u>Temperature Control</u>
SE ¼ SE ¼		0.75 ACRE	TEMPERATURE CONTROL
	SECTION 31		
TOWNSHIP 37 SOUTH, RANGE 4 WEST, W.M.			
NE ¼ NE ¼	9.0 ACRES	2.0 ACRES	TEMPERATURE CONTROL
NW ¼ NE ¼	6.9 ACRES	11.4 ACRES	TEMPERATURE CONTROL
	SECTION 6		
TOWNSHIP 38 SOUTH, RANGE 4 WEST, W.M.			

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter in good working order.
- B. The permittee shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- C. The permittee shall allow the watermaster access to the meter; provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

The use of water under this right is subject to the terms and conditions of contract No. XXXXX, or a satisfactory replacement, between the Bureau of Reclamation and the applicant, a copy of which is on file in the records of the Water Resources Department.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.
