

Oregon Water Resources Department  
Water Rights Division

Water Rights Application  
Number G-16343

**Final Order**

*Appeal Rights*

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review of this order must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

This statement of judicial review rights does not create a right to judicial review of this order, if judicial review is otherwise precluded by law. Where no changes have been made to a Proposed Final Order on a water right application and no protests have been filed during the protest period, the final order is not subject to judicial review.

*Application History*

On November 18, 2004, RAY CLARNO submitted an application to the Department for a water use permit on behalf of Clarno Cattle Company, S. Corp. On April 11, 2006, the Department issued a Proposed Final Order concluding that, with the mitigation proposed by the applicant, water is available for the proposed use and that the proposed use would ensure the preservation of the public welfare, safety and health. The protest period closed May 26, 2006, and no protest was received.

On July 29, 2005, House Bill 3494, enacted by the 73<sup>rd</sup> Oregon Legislative Assembly, was signed by the Governor. Under Section 2 of this 2005 Act, Oregon Administrative Rules (OAR) 690-505-0600 through 690-505-0630, certified effective by the Secretary of State on September 27, 2002, satisfy the requirements relating to mitigation under Oregon Revised Statutes (ORS) 390.805 to 390.925, 537.322 to 537.360 and 537.505 to 537.795.

As required by OAR 690-505-0615, the applicant must submit proposed mitigation that meets the requirements of OAR 690-505-0610(2)-(5). Pursuant to OAR 690-505-0620, a permit shall not be issued until the applicant provides documentary evidence that mitigation water, in an amount satisfying the mitigation obligation, is legally protected instream.

The applicant submitted a mitigation proposal to provide 9.0 acre-feet of mitigation water within the General Zone of Impact. The applicant is proposing to obtain credits or suitable mitigation that meets the requirements of OAR 690-505-0610(2)-(5) within the General Zone of Impact. One mitigation credit is equivalent to one acre-foot of mitigation water.

### Order

A permit consistent with the attached draft permit shall be issued only upon submission of documentary evidence that 9.0 mitigation credits, or suitable mitigation that meets the requirements of OAR 690-505-0610(2)-(5), within the General Zone of Impact have been obtained.

In addition, payment of outstanding permit recording fees in the amount of \$250.00, are required. Said fees are due and payable prior to the issuance of a permit, even if all mitigation obligations have been satisfied.

*This final order is issued approving application G-16343 contingent upon the required mitigation being provided prior to permit issuance. This final order shall expire 5 years after issuance unless the required mitigation is provided OAR 690-505-0620(2).*

DATED August 31, 2006

  
Phillip C. Ward, Director *for*

DRAFT

This is not a permit.  
STATE OF OREGON

DRAFT

COUNTY OF DESCHUTES

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

CLARNO CATTLE COMPANY  
6811 THUNDERBIRD CT.  
REDMOND, OR 97756

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-16343

SOURCE OF WATER: A WELL IN DRY RIVER BASIN

PURPOSE OR USE: IRRIGATION USE ON 5.0 ACRES

MAXIMUM RATE: 0.063 CUBIC FOOT PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: NOVEMBER 18, 2004

WELL LOCATION: NE  $\frac{1}{4}$  NW  $\frac{1}{4}$ , SECTION 16, T18S, R14E, W.M.; 1050 FEET SOUTH & 600 FEET EAST OF THE NW CORNER OF THE NE  $\frac{1}{4}$  OF THE NW  $\frac{1}{4}$ , SECTION 16

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NE  $\frac{1}{4}$  NW  $\frac{1}{4}$  5.0 ACRES  
SECTION 16  
TOWNSHIP 18 SOUTH, RANGE 14 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the

amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced. However, the use of ground water allowed under the terms of this permit will not be subject to regulation for Scenic Waterway flows so long as mitigation as required herein is maintained.

#### GROUND WATER MITIGATION CONDITIONS

Mitigation Obligation: 9.0 acre-feet in the General Zone Impact (anywhere in the Deschutes Basin above the Madras gage, located on the Deschutes River below Lake Billy Chinook.)

Mitigation Source: 9.0 Mitigation Credits from a chartered mitigation bank, or suitable replacement mitigation that meets the requirements of OAR 690-505-0610(2)-(5), within the General Zone of Impact.

Mitigation water must be legally protected instream for instream use within the Upper Deschutes Zone of Impact and committed for the life of the permit and subsequent certificate(s). Regulation of the use and/or cancellation of the permit, or subsequent certificate(s), will occur if the required mitigation is not maintained.

The permittee shall provide additional mitigation if the Department determines that average annual consumptive use of the subject appropriation has increased beyond the originally mitigated amount.

If mitigation is from a secondary right for stored water from a storage project not owned or operated by the permittee the use of water under this right is subject to the terms and conditions of a valid contract, a copy of which must be on file in the records of the Water Resources Department prior to use of water.

Failure to comply with these mitigation conditions shall result in the Department regulating the ground water permit, or subsequent certificate(s), proposing to deny any permit extension application for the ground water permit, and proposing to cancel the ground water permit, or subsequent certificate(s).

#### STANDARD CONDITIONS

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Complete application of the water to the use shall be made on or before October 1, 2010. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).
