Kerry, I would limit the storage season in the Gibson Gulch drainage to November through June.

Mike,

We have a policy which requires us to get comments from Alternate Reservoir reviewers' before we can proceed with a Final Order for an application.

I sent you a review sheet on 5/11/07 for RE: App R-86763 Meriwether Farms LLC; Chris Millich. The application proposed the storage of 1.0 AF in Popcorn Hill Reservoir #2 from an unnamed spring (source 6), tributary to Gibson Gulch, for multipurpose use.

I've attached a copy of the application form and the map. Please complete/return the form, or if you have no concerns you can simply reply to this email.

Thanks for your help.
