WILLIAM AND ROSA RUPP
420 RD 49
PASCO, WA 99301

Reference: File G-17480

Dear Applicants:

**THIS IS NOT A PERMIT AND IS
SUBJECT TO CHANGE AT THE NEXT PHASE OF PROCESSING.**

This letter is to inform you of the preliminary analysis of your water use permit application and to describe your options. In determining whether a water use permit application may be approved, the Department must consider the factors listed below, all of which must be favorable to the proposed use if it is to be allowed. Based on the information you have supplied, the Water Resources Department has made the following preliminary determinations:

Initial Review Determinations:

1. The application proposed the use 2.0 cubic feet per second (CFS) of water from Well 1 (UMAT 54401) and Well 2 in East Birch Creek Basin for irrigation of 70.2 acres and supplemental irrigation of 72.5 acres March 1 through October 31.
2. The proposed use is not prohibited by law or rule except where otherwise noted below.
3. The use of water from Well 1 (UMAT 54401) and Well 2 in East Birch Creek Basin for irrigation and supplemental irrigation is allowable under the Umatilla Basin Program.
4. Ground water **will not likely** be available in the amounts requested without injury to prior rights and/or within the capacity of the resource.

The Department has determined, based upon OAR 690-009, that the proposed ground water use will not have the potential for substantial interference with any surface water source.

5. The standard allowable rate for irrigation use from ground water is 1/80 CFS per acre. Your application requested 2.0 CFS for irrigation of 70.2 acres and supplemental irrigation of 72.5 acres. If the application is approved, the rate allowed will be limited to 1.79 CFS, being 0.88 CFS for irrigation of 70.2 acres and 0.91 CFS for supplemental irrigation of 72.5 acres.

Summary of Allowable Water Use

Because not all items above are favorable, the use of 1.79 CFS of water, being 0.88 CFS for irrigation of 70.2 acres and 0.91 CFS for supplemental irrigation of 72.5 acres, from Well 1 (UMAT 54401) and Well 2 in East Birch Creek Basin is not allowable, and it appears unlikely that you will be issued a permit.

However, by providing additional information as described below, you may be able to pursue a limited permit. At this time, you must decide whether to proceed or to withdraw your application as described below.

Additional Information Opportunity

The Department determined that the construction of Well 1 (UMAT 54401) and proposed Well 2 will develop low-yielding metamorphic rock. There may be greater well yields in the Columbia River Basalts, which are deeper than the metamorphic rock, and possibly at a slightly different location. If you would like to amend your application by deepening Well 1 (UMAT 54401) into the basalts and/or proposing a deeper completion depth into the basalts for Well 2, please submit your amendment in writing, along with a revised map if you select a different location for Well 2, and \$250 in additional examination fees. You may want to discuss well construction/location issues with Marc Norton, groundwater hydrogeologist with the Department at 503-986-0841.

If you decide to amend your application, please submit this information no later than Thursday, October 27, 2011. If you are unable to submit the information listed above, you may request an administrative hold for up to an additional 180 days. You must submit the request in writing, stating how much more time you will need and why you need additional time. If an administrative hold is granted, your application will not be processed further until the requested information is received or the extended deadline has passed.

If we do not receive the items requested above or a request for an administrative hold by this date, the Department will likely proceed with a Proposed Final Order recommending denial of the application.

Please reference the application number when sending any correspondence regarding the conclusions of this Initial Review. Comments received within the comment period will be evaluated at the next phase of the process.

Withdrawal Refunds:

If you choose not to proceed, you may withdraw your application and receive a refund (minus a \$200 processing charge per application). To accomplish this you must notify the Department in writing by **Friday, October 7, 2011**. For your convenience you may use the enclosed "STOP PROCESSING" form.

To Proceed With Your Application:

If you choose to proceed with your application, you do not have to notify the Department. Your application will automatically be placed on the Department's Public Notice to allow others the opportunity to comment. After the comment period the Department will complete a public interest review and issue a Proposed Final Order.

If A Permit Is Issued It Will Likely Include The Following Conditions:

1. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of appropriation. The permittee shall maintain the meter in good working order.
 - B. The permittee shall keep a complete record of the amount of water diverted each month, and shall submit a report which includes the recorded report water-use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
 - C. The permittee shall allow the watermaster access to the meter; provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.
 - D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.
2. Prior to using water from any well listed on this permit, the permittee shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.
3. If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.
4. The Department requires the water user to obtain, from a qualified individual (see below), and report annual static water levels for each well on the permit. The static water level shall be measured during the period February 1 through March 31. Reports shall be submitted to the Department within 30 days of measurement.

The permittee shall report an initial February/March static water-level measurement once well construction is complete and annual measurements thereafter. Annual measurements are required whether or not the well is used. The first annual measurement will establish a reference level against which future measurements will be compared. However, the Director may establish the reference level based on an analysis of other water-level data. The Director may require the user to obtain and report additional water levels each year if more data are needed to evaluate the aquifer system.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board. Measurements shall be submitted on forms provided by, or specified by, the Department. Measurements shall be made with equipment that is accurate to at least the standards specified in OAR 690-217-0045. The Department requires the individual performing the measurement to:

- A. Associate each measurement with an owner's well name or number and a Department well log ID; and
- B. Report water levels to at least the nearest tenth of a foot as depth-to-water below ground surface; and
- C. Specify the method of measurement; and
- D. Certify the accuracy of all measurements and calculations reported to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if any of the following events occur:

- A. Annual water-level measurements reveal an average water-level decline of three or more feet per year for five consecutive years; or
- B. Annual water-level measurements reveal a water-level decline of 15 or more feet in fewer than five consecutive years; or
- C. Annual water-level measurements reveal a water-level decline of 25 or more feet; or
- D. Hydraulic interference leads to a decline of 25 or more feet in any neighboring well with senior priority.

The period of restricted use shall continue until the water level rises above the decline level which triggered the action or the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or causing substantial interference with senior water rights. The water user shall not allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

5. Dedicated Measuring Tube: Wells with pumps shall be equipped with an unobstructed, dedicated measuring tube pursuant to figure 200-5 in OAR 690-200.

The water source identified in your application may be affected by an Agricultural Water Quality Management Area Plan. These plans are developed by the Oregon Department of Agriculture (ODA) with the cooperation of local landowners and other interested stakeholders, and help to ensure that current and new appropriations of water are done in a way that does not adversely harm the environment. You are encouraged to explore ODA's Water Quality Program web site at http://www.oregon.gov/ODA/NRD/water_agplans.shtml to learn more about the plans and how they may affect your proposed water use.

If you have any questions:

Feel free to call me at 503-986-0816 if you have any questions regarding the contents of this letter or your application. Please have your application number available if you call. General questions about water rights and water use permits should be directed to our customer service staff at 503-986-0801. When corresponding by mail, please use this address: Kerry Kavanagh, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266. Our fax number is 503-986-0901.

Sincerely,

Kerry Kavanagh

APPLICATION FACT SHEET

Application File Number: G-17480

Applicant: WILLIAM AND ROSA RUPP

County: Umatilla

Watermaster: 5

Priority Date: August 11, 2011

Source: WELL 1 (UMAT 54401) AND WELL 2 IN EAST BIRCH CREEK BASIN

Use: IRRIGATION OF 70.2 ACRES; SUPPLEMENTAL IRRIGATION OF 72.5 ACRES

Quantity: 2.0 CUBIC FEET PER SECOND

Basin Name & Number: Umatilla, #7

Stream Index Reference: Volume 4 E BIRCH CR & MISC

Well Location:

WELL 1 (UMAT 54401) - NWNW, SECTION 13, T2S, R32E, W.M.; 50 FEET SOUTH AND 4620 FEET WEST FROM NE CORNER, SECTION 13

WELL 2 - NWNW, SECTION 13, T2S, R32E, W.M.; 370 FEET SOUTH AND 4300 FEET WEST FROM NE CORNER, SECTION 13

Place of Use:

	<u>Primary</u>	<u>Supplemental</u>
SW $\frac{1}{4}$ SE $\frac{1}{4}$		15.0 ACRES
SE $\frac{1}{4}$ SE $\frac{1}{4}$		25.0 ACRES
SECTION 11		
SW $\frac{1}{4}$ SW $\frac{1}{4}$		22.5 ACRES
SE $\frac{1}{4}$ SW $\frac{1}{4}$		10.0 ACRES
SECTION 12		
NW $\frac{1}{4}$ NE $\frac{1}{4}$	19.2 ACRES	
NE $\frac{1}{4}$ NW $\frac{1}{4}$	22.7 ACRES	
NW $\frac{1}{4}$ NW $\frac{1}{4}$	3.7 ACRES	
SW $\frac{1}{4}$ NW $\frac{1}{4}$	3.8 ACRES	
SE $\frac{1}{4}$ NW $\frac{1}{4}$	20.8 ACRES	
SECTION 13		
TOWNSHIP 2 SOUTH, RANGE 32 EAST, W.M.
