**To:** Kerry Kavanagh  
**Subject:** Water Rights S-87720

Dear Kerry,

If the human consumption permit is issued, I intend to make immediate beneficial use of the water for intended purpose (human consumption).

During the months when the live flow water, for human consumption, is not available, I plan on using water from my holding tanks, and not diverting water from the river for domestic use,

Sincerely,

Janette Majors

**Oregon Water Resources Department**  
**Application Supplement for**  
**Human Consumption & Livestock Uses**

For water use permit applications within or above scenic waterways, or from streams for which water is not available due to required instream flows, the Department may issue limited permits for human consumption and livestock uses. Human consumption use is limited to 500 gallons per day for indoor use only for drinking, cooking, and sanitation, and does not include other uses such as lawn or garden watering or other related water uses.

In order to issue a permit to you for human consumption or livestock use, the Department must find that you cannot reasonably obtain water from any other source. For human consumption, an additional finding must be made that denial of the water right would result in loss of reasonable expectations for use of your property. For livestock use, additional findings must be made that issuance of a permit is necessary to prevent the livestock from watering in or along the stream bed and that you have excluded livestock from the stream and the adjacent riparian zone.

Please answer the following questions, and sign and return this form to Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266.

1. Can you reasonably obtain water from any other source? YES / **NO**  
 (circle one)

If not, please describe why each of the following options are not reasonable:

- a. Groundwater, such as a well on yours or a neighbor=s property. (If expense is the reason groundwater is not reasonable, please provide two estimates of the cost.)

The existing well on the property is dry.

\_\_\_\_\_

\_\_\_\_\_

- b. Securing stored water from upstream reservoirs.

I have successfully secured water from reservoir, it is only available for irrigation purposes.

\_\_\_\_\_

- c. Trucking water. (If expense is the reason this option is not reasonable, please provide a copy of an estimate of the cost of trucking water.)

The location is difficult for delivery. The expense would be high due to distance from town, with estimate \$95.00 - \$100.00 per 2000 gallon delivery, from Plum Valley Water 541- 488-5082

**RECEIVED**

WATER RESOURCES DEPT  
 SALEM, OREGON

d. Community or municipal water suppliers.

There is no community or municipal water supplier in the area.

e. Tying in to a neighboring property=s spring.

No known spring

g. Transferring existing water rights to your proposed use(s).

No known domestic/human water rights in the area to transfer. At one point the property had permit for domestic use, it was cancelled.

Please identify any other alternate water sources you have considered, and why they are not feasible:

Rain catchment not feasible, minimal amounts of rain, and only for limited time of year. This would require a huge amount of storage and cost.

2. If you are seeking a permit for **human consumption use**, would denial of your application result in loss of reasonable expectations for use of your property?

YES / NO / NOT APPLICABLE  
(circle one)

If so, please describe how:

There is no viable water source on property (other than the river). Without a viable water source permanent habitation of the home is not possible.

3. If you are seeking a permit for **livestock use**, is the proposed use necessary to prevent the livestock from watering in or along the stream bed?

YES / NO / NOT APPLICABLE  
(circle one)

4. If you are seeking a permit for **livestock use**, have you excluded livestock from the stream and the adjacent riparian zone?

YES / NO / NOT APPLICABLE  
(circle one)
