

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE STATE OF OREGON**

In the Matter of Water Rights Application)
R-87503, Malheur County)

**FINAL ORDER
APPROVING THE STORAGE OF
SURFACE WATER**

Authority

Oregon Revised Statutes (ORS) 537.409 establishes the process by which an application to store waters of the public may be submitted.

Findings of Fact

1. On August 3, 2009, Daniel Hutchison submitted an application for a permit to store water pursuant to ORS 537.409.
Storage Volume: 2.0 ACRE FEET
Dam Height: LESS THAN 10 FEET
Source: BLACK BULL SPRING
Location: MALHEUR COUNTY IN SECTION 34, TOWNSHIP 28 SOUTH, RANGE 37 EAST, W.M.
2. The required examination fees were paid.
3. Clackamas County Circuit Court Judge Susie L. Norby issued an order relating to the processing of reservoir applications filed under ORS 537.409. In this order, Judge Norby determined that an application for stored water filed under ORS 537.409 is not complete unless/until the Department received sufficient information to demonstrate that the reservoir:

APPEAL RIGHTS

Appeal to a circuit court: This is a final order in other than a contested case. Any party affected by a final order in other than a contested case issued by the Water Resources Commission or Water Resources Department may appeal the order to the appropriate circuit court (ORS 536.075). A petition for judicial review must be filed within the 60-day time period specified by ORS 183.484 (2).

Petition to the Department for Reconsideration of the Final Order: A person entitled to judicial review of this order may also file a petition for the Department's reconsideration of the order. The petition for reconsideration must be filed with the Department within 60 calendar days after the date of the order. A copy of the petition must also be delivered or mailed to all other persons and agencies requiring notification under statute or rule (OAR 137-004-0080). The petition must set forth the specific grounds for reconsideration, and may be supported by a written argument. The petition may include a request for a stay of the order if the petition complies with the requirements of OAR 137-003-0090 (2). The Department may grant or deny the petition by summary order. If the Department takes no action, the petition is deemed denied as provided by ORS 183.484 (2). A final order remains in effect during reconsideration until stayed or changed. Following reconsideration, the agency must enter a new order, which may be an order affirming the existing order (OAR 137-004-0080). Reconsideration cannot be granted after the filing of a petition for judicial review, unless permitted by the court (OAR 137-004-0080 (6)).

ORS 537.409 does not provide an opportunity to request a contested-case hearing. Appeal rights on this final order approving the application are limited to the above procedures.

- a. does not pose a significant detrimental impact to existing fishery resources as determined on the basis of information submitted by the State Department of Fish and Wildlife; and
 - b. does not injure any existing water right.
4. The Department provided public notice of the application in the Department's weekly public notice on August 18, 2009. A 60-day comment period followed.
5. The Department has not received public comment related to the possible issuance of the attached permit.
6. Shortly after the Department determined the application was complete, the Department again provided public notice of the application, which occurred on August 2, 2011. The Department did not receive any comments during the second comment period.
7. The Department has determined that the proposed source has not been withdrawn from further appropriation.
8. The proposed reservoir is not prohibited under ORS 390.835.
9. The watermaster has determined that year-round use will not cause injury to senior water rights.
10. Because water is available, the Department finds that existing water rights would not be injured by the proposed use.
11. Based on information provided by the applicant, water flowing from Black Bull Spring **does not** form a well defined natural channel and **does not** flow off the piece of property on which it first arises. **It has been determined by the courts that the use of water from a spring which, under natural conditions, does not form a natural channel and does not flow off the property where it originates at any time during the year is an exempt use and does not require a water right permit.**
12. The Department has determined that, as conditioned, the proposed use will not pose a significant detrimental impact to existing fishery resources.

Conclusions of Law

1. Water is available for the proposed use.
2. The proposed use will not injure existing water rights.
3. The proposed use will not pose a significant detrimental impact to existing fishery resources.
4. Application R-87503 is consistent with the requirements of ORS 537.409.

Now Therefore, it is Ordered:

Application R-87503 is approved, and Permit R-14911 is issued as limited by the conditions contained therein.

Dated at Salem, Oregon on OCTOBER 20, 2011.

E. Timothy Wallin, Water Rights Program Manager
for Phillip C. Ward, Director
Water Resources Department
