INTEROFFICE MEMO

FORWARD TO: Ken Dowden
FIELD PROCESSOR WORKING ON THIS TRANSFER

DATE: 7-19-05

FROM: _____ WATERMASTER, DISTRICT # _____

(SIGNATURE) Michael Zwart *date signed 1/24/07*
signed by injury reviewer

SUBJECT: WATER RIGHT TRANSFER # 9969

A change in: POU POD APOA USE of water.

In the name(s) of Danny Smith

In my opinion (assuming the right is valid), the proposed change

MAY BE MADE WITHOUT INJURY WOULD RESULT IN INJURY* to an existing water right.

*The approval of this transfer application would result in injury to other water rights because _____

The existing right may not be valid because _____

Headgate notices HAVE HAVE NOT Been issued for diversion from the source(s) which serve(s) this right.

If for change in point of diversion, is there any intervening point(s) for diversion between the authorized and proposed points of diversion? (Yes or No) _____

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

_____ (1) PRIOR to the diverting of water at the new point of diversion . . .

_____ (2) WHEN IN the judgement of the watermaster it becomes necessary . . .

The enclosed copy of the transfer application and map(s) is for your records.

**OREGON WATER RESOURCES DEPARTMENT
INTEROFFICE MEMO**

To: Ground Water files Date: January 24, 2007
From: Michael J. Zwart
Subject: Application Review: T-9969, Danny Smith

This application proposes two additional POAs as a result of partitioning of the parcel. The authorized well (UMAT 692) and the proposed additional wells all will produce water from water-bearing zones developed in Columbia River Basalt Group rocks. The application included no well construction details for the proposed wells. Therefore, it is recommended that the order approving the transfer include a condition that allows ground-water production from no deeper than 530 feet below land surface. This is based on the depth of the authorized well with an allowance for the higher elevation at the proposed well sites. Alternately, the applicant should be required to provide well construction information for the proposed wells.

I find that the proposed change may be made without injury provided the following: the rights are valid and the Watermaster can approve the proposal.
