SUBJECT: WATER RIGHT TRANSFER # 10218

A change in: POU POD APOA USE of water.

In the name(s) of Connie Wright

In my opinion (assuming the right is valid), the proposed change

MAY BE MADE WITHOUT INJURY  WOULD RESULT IN INJURY\* to an existing water right.

\*The approval of this transfer application would result in injury to other water rights because \_\_\_\_\_

Headgate notices HAVE HAVE NOT Been issued for diversion from the source(s) which serve(s) this right.

If for change in point of diversion, is there any intervening point(s) for diversion between the authorized and proposed points of diversion? (Yes or No) \_\_\_\_\_

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

\_\_\_\_\_ (1) PRIOR to the diverting of water at the new point of diversion . . .

\_\_\_\_\_ (2) WHEN IN the judgement of the watermaster it becomes necessary . . .

The enclosed copy of the transfer application and map(s) is for your records.

Subject: Application Review: T-10218, Lonnie Wright

This application proposes an additional POA to provide a backup source of water. The authorized well (WASC 2598) and the proposed additional well (WASC 51130) produce water from an aquifer developed in basalt. Both wells are flowing artesian with considerable shut-in pressure.

I find that the proposed change may be made without injury provided the following: the rights are valid and the Watermaster can approve the proposal.
