

Oregon Water Resources Department
Water Rights Services Division

Water Rights Application
Number S-87757

Prior to the issuance of a permit, the Department must receive permit recording fees in the amount of \$400.00. Please include your application number on your check made out to the Oregon Water Resources Department.

Proposed Final Order

Summary of Recommendation: The Department recommends that the attached draft permit be issued with conditions.

Application History

On September 20, 2011, Clatie B Smith, C/O Isenhardt, Evert - Ona Ranch Inc submitted an application to the Department for the following water use permit:

- Amount of Water: 0.01 CUBIC FOOT PER SECOND (CFS)
- Use of Water: DOMESTIC USE EXPANDED FOR ONE HOUSEHOLD
- Source of Water: A SPRING, TRIBUTARY TO NORTH FORK FLORAS CREEK
- Area of Proposed Use: CURRY COUNTY WITHIN SECTION 26, TOWNSHIP 30 SOUTH, RANGE 14 WEST, W.M.

The application materials included information intending to document that no alternate water source is available, and that denial of the permit would cause loss of reasonable expectation for use of the property.

On October 7, 2011, the Department mailed the applicant notice of its Initial Review, determining that "...the use of 0.01 CFS of water from an unnamed spring, tributary to North Fork Floras Creek, for year-round domestic use expanded for one household is not allowable, and it appears unlikely that you will be issued a permit. However, because you have provided evidence that there is no reasonable alternative, we will work with the Oregon Department of Fish and Wildlife to attempt to determine conditions which will protect instream values during months when instream flow requirements are not met. At the next stage of the application process, the Department may find that the use of 0.005 CFS of water, further limited to 500 gallons per day, from an unnamed spring, tributary to North Fork Floras Creek, for human consumption use

(indoor use only: cooking, drinking and sanitation) is in the public interest and allowable during the full season requested." The applicant did not notify the Department to stop processing the application within 14 days of that date.

On October 11, 2011, the Department gave public notice of the application in its weekly notice. The public notice included a request for comments, and information for interested persons about obtaining future notices and a copy of the Proposed Final Order. No written comments were received within 30 days.

In reviewing applications, the Department may consider any relevant sources of information, including the following:

- any applicable basin program
- applicable statutes, administrative rules, and case law
- the amount of water available
- the rate and duty for the proposed use
- pending senior applications and existing water rights of record
- any applicable comprehensive plan or zoning ordinance
- recommendations by other state agencies
- the Scenic Waterway requirements of ORS 390.835
- any comments received

Findings of Fact

The South Coast Basin Program allows domestic use expanded, which includes human consumption (*indoor use only: cooking, drinking, and sanitation*).

Senior water rights exist on a spring, tributary to North Fork Floras Creek, or on downstream waters.

A spring, tributary to North Fork Floras Creek, is not within or above a State Scenic Waterway.

An assessment of water availability has been completed. This assessment compared a calculation of natural streamflow minus the consumptive portion of all relevant rights of record. A copy of this calculation is in the file. This calculation determined that water is not available for further appropriation (at an 80 percent exceedance probability) at any time of year.

The Department finds that no more than 0.005 CFS, further limited to no more than 500 gallons per day, would be necessary for the proposed use. The amount of water allowed shall be restricted to 0.005 CFS, further limited to no more than 500 gallons per day.

In accordance with OAR 690-033-0330, an interagency team reviewed this proposed use for potential adverse impacts on sensitive, threatened and endangered fish populations. This team consisted of representatives from the Oregon Departments of Water Resources (WRD), Environmental Quality (DEQ), Fish and Wildlife (ODFW), and Agriculture. WRD and ODFW representatives included both technical and field staff. The interagency team recommended that additional limitations or conditions of use be imposed on this application as follows:

Allow human consumption at 0.005 CFS, further limited to 500 gallons per day.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter in good working order.
- B. The permittee shall keep a complete record of the amount of water diverted each month, and shall submit a report which includes the recorded report water-use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- C. The permittee shall allow the watermaster access to the meter; provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional prior to diversion of any water. The permittee shall obtain written approval from ODFW that the installation of the required screen and by-pass devices meets the state's criteria or the permittee shall submit documentation that ODFW has determined screens and/or by-pass devices are not necessary.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

Public Interest Findings Regarding Human Consumption Use

The proposed diversion is necessary for human consumption (indoor use only: cooking, drinking, and sanitation).

After considering various alternative water sources, including groundwater, stored water, purchased trucked water, community and municipal suppliers, and transfers of existing water rights, the applicant provided documentation that there are no reasonable alternative sources of water.

The Department has considered the following factors:

The maximum economic development of the waters involved: The applicant has demonstrated that denial of this application would result in loss of reasonable expectations for use of the property.

The control of the waters of this state for all beneficial purposes, including drainage, sanitation and flood control: Human consumption includes uses of water for sanitation (OAR 690-300-0010(24)). Because the applicant has no other reasonable source of water to provide sanitation to their home, human consumption use is necessary to provide the beneficial use of sanitation to the applicant.

The amount of waters available for appropriation for beneficial use: Water is not available for the proposed use during the full period requested.

The prevention of wasteful, uneconomic, impracticable or unreasonable use of the waters involved: The use will be conditioned to require reasonable use of the water and installation of equipment to permit water-use measurement and reporting.

All vested and inchoate rights to the waters of this state or to the use of waters of this state, and the means necessary to protect such rights: Issuance of this right may increase the likelihood that water may not be available for all water rights.

The state water resources policy formulated under ORS 536.295 to 536.350 and 537.505 to 537.534: ORS 536.310(3) provides that "adequate and safe supplies be preserved and protected for human consumption, while conserving maximum supplies for other beneficial uses." The proposed human consumption use will be limited to a rate of 0.005 cubic feet per second, further limited to no more than 500 gallons day.

Applying these factors one may conclude that the proposed use could increase the likelihood that water may not be available for all existing water rights (including those for the protection of fish and wildlife) because water is not available for the proposed use during the full period requested. However, because the proposed use is for sanitation and will not be wasteful, uneconomic, impracticable or unreasonable, and because denial of this application will result in the loss of reasonable expectations for use of the property, the public interest in the proposed use outweighs water availability concerns.

Conclusions of Law

Under the provisions of ORS 537.153, the Department must presume that a proposed use will not impair or be detrimental to the public interest if the proposed use is allowed in the applicable basin program established pursuant to ORS 536.300 and 536.340 or given a preference under ORS 536.310(12), if water is available, if the proposed use will not injure other water rights and if the proposed use complies with rules of the Water Resources Commission.

The proposed use requested in this application is allowed in the South Coast Basin Program.

Water **is not** available for the proposed use.

The proposed use will not injure other water rights.

The proposed use complies with other rules of the Water Resources Commission not otherwise described above.

The application is in compliance with the State Agency Coordination Program regarding land use.

Because water **is not** available, the required presumption **has not** been established.

OAR 690-310-120(2)(b) states that when the presumption is not established, the Department shall determine whether the proposed use will impair or be detrimental to the public interest considering the factors in ORS 537.170(8), and may make specific findings to demonstrate

that even though the presumption is not established, the proposed use will not impair or be detrimental to the public interest, and propose approval of the application with appropriate modifications or conditions.

In consideration of findings described above under "Public Interest Findings Regarding Human Consumption Use", even though the presumption is not established, the proposed use will not impair or be detrimental to the public interest if approved with the following conditions:

1. The use shall be limited to human consumption for one household at a diversion rate of 0.005 CFS, further limited to 500 gallons per day.
2. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter in good working order.
 - B. The permittee shall keep a complete record of the amount of water diverted each month, and shall submit a report which includes the recorded report water-use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
 - C. The permittee shall allow the watermaster access to the meter; provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.
 - D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

When issuing permits, ORS 537.211(1) authorizes the Department to include limitations and conditions which have been determined necessary to protect the public interest. The attached draft permit is conditioned accordingly.

Recommendation

The Department recommends that the attached draft permit be issued with conditions.

DATED September 25, 2012

E. Timothy Wallin, Water Rights Program Manager
for Phillip C. Ward, Director

Protests

Under the provisions of ORS 537.153(7) (for surface water) or ORS 537.621(8) (for ground water), you can protest this Proposed Final Order. Protests must be received in the Water Resources Department no later than **November 9, 2012**. Protests must be in writing, and must include the following:

- Your name, address, and telephone number;
- A description of your interest in the Proposed Final Order, and, if you claim to represent the public interest, a precise statement of the public interest represented;
- A detailed description of how the action proposed in the Proposed Final Order would impair or be detrimental to your interest;
- A detailed description of how the Proposed Final Order is in error or deficient, and how to correct the alleged error or deficiency;
- Any citation of legal authority to support your protest, if known;
- To affect the Department's determination that the proposed use in this application will, or will not, impair or be detrimental to the public interest ORS 537.153(2)(b) requires that a protest demonstrate, by a preponderance of evidence any of the following: (a) One or more of the criteria for establishing the presumption are, or are not, satisfied; or

(b) the specific public interest in ORS 537.170(8) that would be impaired or detrimentally affected, and specifically how the identified public interest in ORS 537.170(8) would be impaired or be detrimentally affected;

- If you are the applicant, the protest fee of \$300 required by ORS 536.050; and
- If you are not the applicant, the protest fee of \$600 required by ORS 536.050 and proof of service of the protest upon the applicant.
- If you are the applicant, a statement of whether or not you are requesting a contested case hearing. If you do not request a hearing, the Department will presume that you do not wish to contest the findings of the Proposed Final Order.
- *If you do not protest this Proposed Final Order and if no substantive changes are made in the Final Order, you will not have an opportunity for judicial review, protest or appeal of the Final Order when it is issued.*

Requests for Standing

Under the provisions of ORS 537.153(7) (for surface water) or ORS 537.621(8) (for ground water), persons other than the applicant who support a Proposed Final Order can request standing for purposes of participating in any contested case proceeding on the Proposed Final Order or for judicial review of a Final Order.

Requests for standing must be received in the Water Resources Department no later than **November 9, 2012**. Requests for standing must be in writing, and must include the following:

- The requester's name, mailing address and telephone number;
- If the requester is representing a group, association or other organization, the name, address and telephone number of the represented group;
- A statement that the requester supports the Proposed Final Order as issued;
- A detailed statement of how the requester would be harmed if the Proposed Final Order is modified; and
- A standing fee of \$150. If a hearing is scheduled, an additional fee of \$350 must be submitted along with a request for intervention.

After the protest period has ended, the Director will either issue a Final Order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been submitted and either:

- upon review of the issues, the director finds that there are significant disputes related to the proposed use of water, or
- the applicant requests a contested case hearing within 30 days after the close of the protest period.

If you do not request a hearing within 30 days after the close of the protest period, or if you withdraw a request for a hearing, notify the Department or the administrative law judge that you will not appear or fail to appear at a scheduled hearing, the Director may issue a Final Order by default. If the Director issues a Final Order by default, the Department designates the relevant portions of its files on this matter, including all materials that you have submitted relating to this matter, as the record for purpose of proving a *prima facie* case upon default.

This document was prepared by Kerry Kavanagh. If you have any questions about any of the statements contained in this document I am most likely the best person to answer your questions. You can reach me at 503-986-0816.

If you have questions about how to file a protest or a request for standing, please refer to the respective sections in this Proposed Final Order entitled "Protests" and "Requests for Standing". If you have previously filed a protest and want to know its status, please contact Patricia McCarty at 503-986-0820.

If you have other questions about the Department or any of its programs please contact our Customer Service Group at 503-986-0801. Address all other correspondence to:

Water Rights Section, Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266, Fax: 503-986-0901.

DRAFT

This is not a permit.

DRAFT

STATE OF OREGON

COUNTY OF CURRY

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

CLATIE B SMITH
C/O ISENHART EVERT - ONA RANCH INC
97065 LANGLOIS MOUNTAIN RD
LANGLOIS, OR 97450

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: S-87757

SOURCE OF WATER: A SPRING, TRIBUTARY TO NORTH FORK FLORAS CREEK

PURPOSE OR USE: HUMAN CONSUMPTION (INDOOR USE ONLY: COOKING, DRINKING,
AND SANITATION) FOR ONE HOUSEHOLD

MAXIMUM RATE: 0.005 CUBIC FOOT PER SECOND, FURTHER LIMITED TO 500
GALLONS PER DAY

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: SEPTEMBER 20, 2011

POINT OF DIVERSION LOCATION: SW $\frac{1}{4}$ SW $\frac{1}{4}$, SECTION 26, T30S, R14W, W.M.;
4213 FEET SOUTH AND 3989 FEET WEST FROM NE CORNER, SECTION 26

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SE $\frac{1}{4}$ NW $\frac{1}{4}$
SECTION 26
TOWNSHIP 30 SOUTH, RANGE 14 WEST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the meter in good working order.
- B. The permittee shall keep a complete record of the amount of water diverted each month, and shall submit a report which includes the recorded report water-use measurements to the Department annually or more frequently as may be required by

the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.

- C. The permittee shall allow the watermaster access to the meter; provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional prior to diversion of any water. The permittee shall obtain written approval from ODFW that the installation of the required screen and by-pass devices meets the state's criteria or the permittee shall submit documentation that ODFW has determined screens and/or by-pass devices are not necessary.

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decreases to the point that those waters no longer meet state or federal water quality standards due to reduced flows.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.
