# WATERMASTER ALTERNATE RESERVOIR APPLICATION REVIEW SHEET

Recommendations for Water Right Applications under the Alternate Reservoir review process (ORS 537.409)

In lieu of the water right application process set forth in ORS 537.140 to 537.211, an owner of a reservoir may submit an alternate reservoir application for a reservoir that has a storage capacity less than 9.2 acre-feet or a dam or impoundment structure less than 10 feet in height. ORS 537.409 describes the criteria used to evaluate alternate reservoir applications.

The review shall be limited to issues pertaining to: a) water availability, b) potential detrimental impact to existing fishery resources; and c) potential injury to existing water rights. (ORS 537.409 (6))

Within 60 days after the department provides public notice...any person may submit detailed, legally obtained information in writing, requesting the department to deny the application for a permit on the basis that the reservoir: (a) Would result in injury to an existing water right; or (b) Would pose a significant detrimental impact to existing fishery resources. (ORS 537.409 (5))

**The review of alternate reservoirs is limited to these criteria only.**

Application #: R-

Applicant's Name: Mark & Julie Winton

1) Does the proposed reservoir have the potential to injure existing water rights?  NO  YES

THE PROPOSED RESERVOIR DOES NOT HAVE THE POTENTIAL TO INJURE ANY EXISTING WATER RIGHT BECAUSE THE SOURCE OF WATER IS FROM RUN OFF FROM A DRY DRAW AND A SPRING THAT DOES NOT RUN INTO ANY SIGNIFICANT WATER WAY.

2) Can conditions be applied to mitigate the potential injury to existing water rights?  NO  YES

If YES, which conditions are recommended:

3) Did you meet with staff from another agency to discuss this application?  NO  YES

Note: It is unlikely that ODFW will be able to complete this form while you wait, nevertheless we recommend making an appointment to submit the form so as to provide any necessary clarifications. See pg. 6 of Instructions for contact information.

**This portion to be completed by Oregon Department of Fish and Wildlife (ODFW) staff.**

- 1) Is the proposed project and AO<sup>2</sup> off channel? .....  YES  NO  
 (if yes then proceed to #4; if no then proceed to #2)
- 2) Is the proposed project or AO located where NMF<sup>3</sup> are or were historically present? .....  YES  NO  
 (if yes then proceed to #3; if no then proceed to #4)
- 3) If NMF are or were historically present:  
 a. Is there an ODFW-approved fish-passage plan? .....  YES  NO  
 b. Is there an ODFW-approved fish-passage waiver or exemption? .....  YES  NO

If fish passage is required under ORS 509.580 through .910, then either 3(a) or 3(b) must be "Yes" to move forward with the application. If responses to 3(a) and 3(b) are "No", then the proposed reservoir does not meet the requirements of Oregon Fish Passage Law and shall not be constructed as proposed.

- 4) Would the proposed reservoir pose any other significant detrimental impact to an existing fishery resource? .....  YES  NO  
 .....  
 Explain below (for example, list STE species or other existing fishery resources that would be impacted negatively.)

- Any diversion or appropriation of water for storage during the period \_\_\_\_\_ through \_\_\_\_\_ poses a significant detrimental impact to existing fishery resources. (For example, if diversion of water for storage during a certain time period would cause a significant detrimental impact to an existing fishery resource, then ODFW should recommend conditions or limitations.) If NMF fish are present at the project site or point of water diversion then the applicant should be advised that a fish screen consistent with screening criteria will be required.
- This proposed pond or reservoir contemplates impounding water in the Columbia Basin above Bonneville Dam. ODFW has determined that additional diversions of water in this area pose a significant detrimental impact to existing fishery resources during the period April 15 through September 30.

- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and **all** of the following apply:
  - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
  - b) The application involves a change in place of use only;
  - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; **and**
  - d) The application involves irrigation water uses only.

## NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.
