**Agent Information** – The agent is authorized to represent the applicant in all matters relating to this application.

AGENT / BUSINESS NAME		PHONE	FAX
ADDRESS			CELL
CITY	STATE	ZIP	E-MAIL*

Note: Attach multiple copies as needed

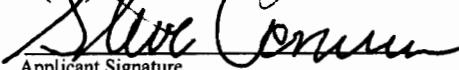

\* By providing an e-mail address, consent is given to receive all correspondence from the department electronically. (paper copies of the final order documents will also be mailed.)

**By my signature below I confirm that I understand:**

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot use water legally until the Water Resources Department issues a permit.
- Oregon law requires that a permit be issued before beginning construction of any proposed well, unless the use is exempt. Acceptance of this application does not guarantee a permit will be issued.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land-use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water-right holders to get water to which they are entitled.

I (we) affirm that the information contained in this application is true and accurate.

**SECTION 2: PROPERTY OWNERSHIP**

Please indicate if you own all the lands associated with the project from which the water is to be diverted, conveyed, and used. RECEIVED BY OWRD

- Yes
- There are no encumbrances.
  - This land is encumbered by easements, rights of way, roads or other encumbrances.
- No
- I have a recorded easement or written authorization permitting access.
  - I do not currently have written authorization or easement permitting access.
  - Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).
  - Water is to be diverted, conveyed, and/or used only on federal lands.

DEC 17 2012

SALEM, OR

List the names and mailing addresses of all affected landowners *(attach additional sheets if necessary)*.

**SECTION 3: WELL DEVELOPMENT**

WELL NO.	NAME OF NEAREST SURFACE WATER	IF LESS THAN 1 MILE:	
		DISTANCE TO NEAREST SURFACE WATER	ELEVATION CHANGE BETWEEN NEAREST SURFACE WATER AND WELL HEAD
	un named intermittent storm swale	~ 100 Ft.	< 10 Ft.
	Willamette River	~ 5340 Ft.	< 40 Ft.

Please provide any information for your existing or proposed well(s) that you believe may be helpful in evaluating your application. For existing wells, describe any previous alteration(s) or repair(s) not documented in the attached well log or other materials *(attach additional sheets if necessary)*.

**SECTION 3. WELL DEVELOPMENT, CONTINUED**

Source (aquifer), if known: Willamette Zone

Total maximum rate requested: 28 gpm (each well will be evaluated at the maximum rate unless you indicate well-specific rates and annual volumes in the table below).

Complete the table below. If this is an existing well, the following information may be found on the applicable well log (If a well log is available, please submit it in addition to completing the table.) If this is a proposed well, or well-modification, consider consulting with a licensed well driller, geologist, or certified water right examiner.

Well ID	Well Type	Well Status	Well Depth	Well Diameter	Well Construction	Well Completion	Well Location	Proposed Use		
								Flow Rate	Annual Volume	
<input checked="" type="checkbox"/>	Existing	Active	8 in.	0 to 80'	25 to 80'	0 to 18'	10'	Willamette Zone	28 gpm	12.5 ac ft
<input type="checkbox"/>	Existing	Active								
<input type="checkbox"/>	Existing	Active								
<input type="checkbox"/>	Existing	Active								
<input type="checkbox"/>	Existing	Active								
<input type="checkbox"/>	Existing	Active

DEC 17 2012

SALEM, OR

**SECTION 5: WATER MANAGEMENT**

**A. Diversion and Conveyance**

What equipment will you use to pump water from your well(s)?

- Pump (give horsepower and type): 7.25 HP Variable drive sub turbine Pump.
- Other means (describe): \_\_\_\_\_

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

**B. Application Method**

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler)

Rain Bird Falcon 6504 Stream Rotor and standard Pop up Flower Bed sprinklers

**C. Conservation**

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to aquatic life and riparian habitat; prevent the discharge of contaminated water to a surface stream; prevent adverse impact to public uses of affected surface waters.

to provide healthy plant Beds + Lawn areas, By using electric Valves + Timer with water rates adjusted to needs By area. Daily monitor of water areas, adjust water log + OR - as needed also Daily check of irrigation system.

**SECTION 6: STORAGE OF GROUND WATER IN A RESERVOIR**

If you would like to store ground water in a reservoir, complete this section (if more than one reservoir, reproduce this section for each reservoir).

Reservoir name: \_\_\_\_\_ Acreage inundated by reservoir: \_\_\_\_\_

Use(s): \_\_\_\_\_

Volume of Reservoir (acre-feet): \_\_\_\_\_ Dam height (feet, if excavated, write "zero"): \_\_\_\_\_

*Note: If the dam height is greater than or equal to 10.0' above land surface AND the reservoir will store 9.2 acre feet or more, engineered plans and specifications must be approved prior to storage of water.*

**SECTION 7: USE OF STORED GROUND WATER FROM THE RESERVOIR**

If you would like to use stored ground water from the reservoir, complete this section (if more than one reservoir, reproduce this section for each reservoir).

Annual volume (acre-feet): \_\_\_\_\_

USE OF STORED GROUND WATER	PERIOD OF USE

**SECTION 8: PROJECT SCHEDULE**

Date construction will begin: A.S.A.P

Date construction will be completed: Oct. 31 2013

Date beneficial water use will begin: June 01 2013

**SECTION 9: WITHIN A DISTRICT**

Check here if the point of diversion or place of use are located within or served by an irrigation or other water district.

RECEIVED BY OWRD

## Water-Use Permit Application Processing

DEC 17 2012

### 1. Completeness Determination

SALEM, OR

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050 ([www.oregon.gov/owrd/law](http://www.oregon.gov/owrd/law)). The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

### 2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$200. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

### 3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives public notice of the application in the weekly notice published by the Department at [www.oregon.gov/owrd](http://www.oregon.gov/owrd). The public comment period is 30 days from publication in the weekly notice.

### 4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

### 5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$300.00 for the applicant and \$600.00 for non-applicants. Protests are filed on approximately 10% of Proposed Final Orders. If a protest is filed, the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

### 6. Final Order Issued

If no protests are filed, the Department issues a Final Order consistent with the PFO. If the application is approved, a permit is issued that specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate.

# Minimum Requirements Checklist

Minimum Requirements (OAR 690-310-0040, OAR 690-310-0050 & ORS 537.615)

## Include this checklist with the application

Check that each of the following items is included. The application will be returned if all required items are not included. If you have questions, please call the Water Rights Customer Service Group at (503) 986-0900.

- SECTION 1: applicant information and signature
- SECTION 2: property ownership
- SECTION 3: well development
- SECTION 4: water use
- SECTION 5: water management
- SECTION 6: storage of groundwater in a reservoir
- SECTION 7: use of stored groundwater from the reservoir
- SECTION 8: project schedule
- SECTION 9: within a district

# For Local Government Use Only

SALEM, OR

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

**Please check the appropriate box below and provide the requested information**

Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): 9.2680

Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.) **If approvals have been obtained but all appeal periods have not ended, check "Being pursued."**

Type of Land-Use Approval Needed (e.g., plan amendments, rezones, conditional-use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Land-Use Approval:	
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being Pursued <input type="checkbox"/> Not Being Pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being Pursued <input type="checkbox"/> Not Being Pursued

**Subject:** RE: PSI for well site, ASAP

RECEIVED BY OWRD

DEC 17 2012

SALEM, OR

Michael,

As long as the well is not within 1/4 mile of a perennial stream, there is a decent chance the applicant could get a right for up to 1% of the natural flow or instream right. In this case it doesn't look like any of the streams within 1/4 mile of the well are perennial, so they should be ok. Of course, I wouldn't tell them that they are guaranteed a right... lots of things could go wrong.

**To:** Joshua Hackett  
**Subject:** PSI for well site, ASAP

Hi Josh,

Someone from Eugene Parks and Rec is coming in tomorrow morning for a pre application conference re a proposed GR application.

The site is very near what shows up as an intermittent channel on a USGS topo, but the channel and one branch total about 8,000 feet and do not connect to any other streams.

I don't know the exact well location but it will be 100 to 500' from the channel.

I don't want to be in another situation like I caused with Mr Grapel where I said he could not get a permit because he was too close to a Blue line on a USGS topo, then you said he could because that water source was so ephemeral..

There is only one other right in the section, from a well for an industrial use.

the approximate well site is: 44.08245468; -123.13946533; WM 17.00S 4.00W 23 NENW  
tax map 1704143401400

Thanks for your help,

**Subject:** Map Fixes and other stuff

Hi Steve,

Kerry Kavanagh (Water Rights Section in Salem) called me to talk about deficiencies in the map and application. I told her I'd have you get her corrections post haste, or else she'll have to send it back.

The map:

It might help if I'd listed both sections on the top of the map.  
It should say: T 17 S, R 4 W, sec 14 & 23 (add & 23)

The acreages, I think you just looked at the first part of the 1/4 1/4 and not the whole thing when listing the acreages by 1/4 1/4.

I am sure what you meant to put there was:

3 SE SW 14  
1 1/2 SW SE 14  
1/8 NE NW 23  
1/8 NW NE 23

you see part of the land is in the Southern part of Section 14, and part of it (the smaller part) is in the Northern part of section 23.

So those 1/4 1/4s need to be fixed as above.

Then the well location (which I think I may have done wrong), should be 300' West, (not 50'). I don't know where 50 came from.

I recommend taking that little note off talking about the small planting beds; though if you want it you should correct the 1/4 1/4s to be the NE NW and NW NE sec 23.

With those fixes, the map should be perfect.

Another thing the Department needs is a legal description of the all the affected lands:

legal description means: "A legal description is a description of a specific parcel of real estate which often uses one of the following methods; government survey metes and bounds, aliquot parts, subdivision block and lot numbers, or a combination of these. It is often found on a deed, land sales contract, or title insurance policy."

Lastly, Kerry thinks the Well Description page 5 might not give the hydrogeologist enough information to evaluate the well. I think it does, because I think there is just one sand and gravel aquifer out there and this other information is not meaningful in this circumstance. But and None-the Less, to cover those bases, I suggest you add these words in these columns:

Column:

Casing Interval: 0 to 80;

Perforated or Screened interval: 25 to 80

Seal Interval: 0 to 18

Most Recent Static Water Level & Date: About 10 from other logs

**RECEIVED**

DEC 21 2012

WATER RESOURCES DEPT  
SALEM, OREGON

This in no way requires you to actually construct a well 80 deep well nor perforate the entire casing. That is just a maximum production possibility anyway, if you drill, case or perforate less, you will have a lesser impact on the resource.

You must seal to at least 18 feet.

Call me if you have questions and if you want to call Kerry, her # is 503-986-0816.

Welcome to the New World,

MM

Hi Kerry,

I have made the adjustments to the map and well development section and hope they are what your looking for. I took some deed info off of RLID not sure if they will work, please let me know. I'm sure I can find the Original deeds after the Christmas break.  
Thanks for taking the time to help us get this right.

Subject: Map Fixes and other stuff

Hi Steve,  
Kerry Kavanagh (Water Rights Section in Salem) called me to talk about deficiencies in the map and application. I told her I'd have you get her corrections post haste, or else she'll have to send it back.

The map:  
It might help if I'd listed both sections on the top of the map.  
It should say: T 17 S, R 4 W, sec 14 & 23 (add & 23)

The acreages, I think you just looked at the first part of the 1/4 1/4 and not the whole thing when listing the acreages by 1/4 1/4.

I am sure what you meant to put there was:

3 SE SW 14  
1 1/2 SW SE 14  
1/8 NE NW 23  
1/8 NW NE 23

you see part of the land is in the Southern part of Section 14, and part of it (the smaller part) is in the Northern part of section 23.

So those 1/4 1/4s need to be fixed as above.

Then the well location (which I think I may have done wrong), should be 300' West, (not 50'). I don't know where 50 came from.

I recommend taking that little note off talking about the small planting beds; though if you want it you should correct the 1/4 1/4s to be the NE NW and NW NE sec 23.

With those fixes, the map should be perfect.

Another thing the Department needs is a legal description of the all the affected lands:  
legal description means: "A legal description is a description of a specific parcel of real estate which often uses one of the following methods; government survey metes and bounds, aliquot parts, subdivision block and lot numbers, or a combination of these. It is often found on a deed, land sales contract, or title insurance policy."

Lastly, Kerry thinks the Well Description page 5 might not give the hydrogeologist enough information to evaluate the well. I think it does, because I think there is just one sand and gravel aquifer out there and this other information is not meaningful in this circumstance. But and None-the Less, to cover those bases, I suggest you add these words in these columns:

Column:  
Casing Interval: 0 to 80;  
Perforated or Screened interval: 25 to 80  
Seal Interval: 0 to 18  
Most Recent Static Water Level & Date: About 10 from other logs

This in no way requires you to actually construct a well 80 deep well nor perforate the entire casing. That is just a maximum production possibility anyway, if you drill, case or perforate less, you will have a lesser impact on the resource.

**RECEIVED**

DEC 28 2012

**Subject:** RE: Map Fixes and other stuff

Hi Steve, Hi Kerry,

To get the legal description of the bigger lot go to RLID,

Click on Deeds and Records at the top;

Search by Tax Map and Lot;

map being 17041434, the tax lot is 04400, search;

In the rows that appear, look at the top row and across to the right under the View heading, click on the picture and an image will appear of a Financing Statement, the second and third pages are the Mets and Bounds description of this lot. The other lots, 3500, 3601 and 5800 in map 17041443 do not have that information in RLID. From what we ask though, it says a Subdivision Lot and Block # are adequate. For those lots the Subdivision is Sunny Lea, Block 1, lots 8, 9, 10, 11, 12, 13, 14 & 15. I am getting those numbers from the County tax map. **Kerry**, Does that work?

Thanks,  
Mm

**Subject:** Map Fixes and other stuff

Hi Steve,

Kerry Kavanagh (Water Rights Section in Salem) called me to talk about deficiencies in the map and application. I told her I'd have you get her corrections post haste, or else she'll have to send it back.

The map:

It might help if I'd listed both sections on the top of the map.

It should say: T 17 S, R 4 W, sec 14 & 23 (add & 23)

The acreages, I think you just looked at the first part of the 1/4 1/4 and not the whole thing when listing the acreages by 1/4 1/4.

I am sure what you meant to put there was:

3 SE SW 14

*G-17610*

1 1/2 SW SE 14  
1/8 NE NW 23  
1/8 NW NE 23

you see part of the land is in the Southern part of Section 14, and part of it (the smaller part) is in the Northern part of section 23.

So those 1/4 1/4s need to be fixed as above.

Then the well location (which I think I may have done wrong), should be 300' West, (not 50'). I don't know where 50 came from.

I recommend taking that little note off talking about the small planting beds; though if you want it you should correct the 1/4 1/4s to be the NE NW and NW NE sec 23.

With those fixes, the map should be perfect.

Another thing the Department needs is a legal description of the all the affected lands:  
legal description means: "A legal description is a description of a specific parcel of real estate which often uses one of the following methods; government survey metes and bounds, aliquot parts, subdivision block and lot numbers, or a combination of these. It is often found on a deed, land sales contract, or title insurance policy."

Lastly, Kerry thinks the Well Description page 5 might not give the hydrogeologist enough information to evaluate the well. I think it does, because I think there is just one sand and gravel aquifer out there and this other information is not meaningful in this circumstance. But and None-the Less, to cover those bases, I suggest you add these words in these columns:

Column:  
Casing Interval: 0 to 80;  
Perforated or Screened interval: 25 to 80  
Seal Interval: 0 to 18  
Most Recent Static Water Level & Date: About 10 from other logs

**RECEIVED**

DEC 26 2012

WATER RESOURCES DEPT  
SALEM, OREGON

This in no way requires you to actually construct a well 80 deep well nor perforate the entire casing. That is just a maximum production possibility anyway, if you drill, case or perforate less, you will have a lesser impact on the resource.

You must seal to at least 18 feet.

Call me if you have questions and if you want to call Kerry, her # is 503-986-0816.

Hi Kerry,

I have made the adjustments to the map and well development section and hope they are what your looking for. I took some deed info off of RLID not sure if they will work, please let me know. I'm sure I can find the Original deeds after the Christmas break.

Thanks for taking the time to help us get this right.

Hi Steve,

Great talking with you today. Here are the pdf's of the application materials you submitted.

I will be back in the Salem office on Wednesday, 12/26/12.

Kerry
