NOTICE TO SELLERS & BUYERS:

By law, all water belongs to the public (ORS 537.110). In almost every instance, a permit or water right certificate from the Water Resources Department is needed before using, diverting or storing water (ORS 537.130). However, most domestic wells do not require water rights. A certificate of water right stays with the land. In order to keep track of water right ownership, the Department requests that this form be submitted to the Department. ***If for multiple rights, a separate form for each right will be required.***

Water that has been used for a long time in one place or that involves a water structure (like a dam) that already exists is no guarantee that there is a water right which would allow the water use to continue.

If you have any questions about this form or water right requirements, please contact your local watermaster or call the Water Resources Department at 503-986-0900.

Area Calculation for Parcel 2 of Land Partition 6-12

The boundary of Parcel 2 of Land Partition 6-12 is intended to be at the centerline of the canals that encompass the parcel except on the east side of the parcel, south of the driveway to the ranch headquarters, the parcel line extends from the centerline of the canal to the right of way line of Highway 140 running parallel to and at a distance of 60 feet from the centerline of the driveway. From there it follows the Highway 140 right of way line south to its intersection with the easterly extension of the centerline of the east-west canal which is the south boundary of Parcel 2.

The area of the Parcel was calculated by surveying a line along the roads on both sides of the canals and then calculating a "best fit" line halfway between the two measured lines to approximate the canal centerline. In several areas where the canal could be accessed only on one side, the distance to the canal centerline was estimated and the surveyed line was offset that distance to approximate the canal centerline.

Measurements were made using a Trimble 4000 Series base station and Trimble 4800 Series GPS receiver mounted to an ATV which was used to traverse the roads. The survey controller was set to take measurements at 50-foot intervals. Additional intermediate measurements were made where the Surveyor determined that more information was needed to accurately calculate the area. Approximately 1600 measurements were made.

AutoCAD Civil 3D software was used to create the calculated boundary. As a check, the surveyed lines and calculated property lines were overlaid on aerial photographs to confirm the relationship of the measured points with the road and canal centerlines.

Using the calculated boundary, the area of the parcel was determined to be 1778 acres.
