Dear Applicant:

The Oregon Water Resources Department received your application for a permit to use or store water. Your application has been assigned file number R 87935. Please refer to this number when contacting the Department. A description of the steps that must be followed when processing an application has been included on the reverse side of this letter.

The Department's goal is to process applications within statutory deadlines. As you can see, the first step in the process is for you to receive an Initial Review. Recently, surface water and reservoir applications have been receiving their Initial Reviews in approximately two to three months, whereas ground water applications have been averaging approximately five to six months.

Your application is subject to review and comment from other state agencies and interested parties.

NOTE: The filing of an application for a permit to use or store water does not allow you to use water. Water may be used only after a permit is issued.

I will be coordinating the processing of your application. If you have any questions, please call me at 503-986-0859.

Sincerely,

Mary Rohling
Water Right Application Caseworker

Water-Use Permit Application Processing

1. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$200. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

2. Public Notice

Within 7 days of the mailing of the initial review, the Department gives public notice of the application in the weekly notice published by the Department at www.oregon.gov/owrd. The public comment period is 30 days from publication in the weekly notice.

3. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the initial review report, the Department issues a Proposed Final Order explaining the proposed decision to deny or approve the application. A proposed final order proposing approval of an application will include a draft permit and may request additional information or outstanding fees required prior to permit issuance.

4. Public Notice

Within 7 days of issuing the proposed final order, the Department gives public notice in the weekly notice. Notice includes information about the application and the proposed final order. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$350.00 for the applicant and \$700.00 for non-applicants. Protests are filed on approximately 10% of Proposed Final Orders. If a protest is filed the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

5. Final Order Issued

If no protests are filed, the Department can issue a Final Order within 60 days of the close of the period for receiving protest. If the application is approved, a permit is issued. The permit specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate.

If no protest is filed and if the applicant does not request any administrative holds, the approximate total processing time is 9 months for surface water and reservoir applications and 14 months for ground water applications.

Processing of Applications for Alternate Reservoirs and the Use of Stored Water Exclusively

After a completed application has been received by the Department, the Department must make public notice of the application within 60 days. The Department does not notify individual, neighboring landowners of an application unless they are identified in the application as affected landowners. The public notice is to ensure that any person may submit detailed information requesting the Department deny an application based on injury to existing water rights or based on significant detrimental impact to an existing fishery resource. All comments must be submitted within 60 days of the public notice.

The Department issues a Final Order within 180 days of the priority date (i.e. date of submission of the application). The Department recommends applicants not schedule excavation work or otherwise expend financial resources until on ODFW fish passage plan and the alternate reservoir application have been approved.
