### By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet. SALEM, OR
- I cannot legally use water until the Water Resources Department issues a permit to me.
- The Department encourages all applicants to wait for a permit to be issued before beginning construction of any proposed diversion. Acceptance of this application does not guarantee a permit will be issued.
- If I begin construction prior to the issuance of a permit, I assume all risks associated with my actions.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to get water to which they are entitled.

I (we) affirm that the information contained in this application is true and accurate.

**C. Conservation**

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to public uses of affected surface waters.

The water requested is needed to maintain and enhance wildlife habitat in the Double 'O' unit of the Malheur National Wildlife Refuge. Diversion dams, conveyance systems and control structures are monitored regularly to assure the efficient distribution and use of water. Malheur NWR uses flood application of water to provide the maximum benefit to wildlife. The system operates in a very efficient manner for a refuge. Return flows are collected and redistributed throughout the system.

**SECTION 6: RESOURCE PROTECTION**

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

- Diversion will be screened to prevent uptake of fish and other aquatic life.  
Describe planned actions:  
Fish screening is a high priority to Malheur NWR. The Refuge is working with Oregon Department of Fish and Wildlife to install up-to-date fish screens or screened pumping stations where required.
- Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas.  
Describe planned actions:  
Any excavation or clearing of banks in natural riparian areas and natural wetlands will be done in compliance with Section 404 and DSL permits
- Operating equipment in a water body will be managed and timed to prevent damage to aquatic life.  
Describe:  
Timing of any work will be done prevent damage to aquatic life
- Water quality will be protected by preventing erosion and run-off of waste or chemical products.  
Describe:  
Grazing is confined to non-riparian zones.

**SECTION 8: WITHIN A DISTRICT**

Check here if the point of diversion or place of use are located within or served by an irrigation or other water district.

**SECTION 9: REMARKS**

Use this space to clarify any information you have provided in the application.

The springs have been used in the manner described for many years. These springs arise on the Malheur National Wildlife Refuge and do not flow off the Refuge in a well-defined natural channel.

The U.S. Fish and Wildlife Service submits this application without waiving any of its existing rights or subjecting its existing water uses or rights to the jurisdiction of the State absent a McCarran Amendment proceeding. Existing rights may include water rights acquired, established, or protected under ORS 537.800, 537.120 and 539.010, or the federal reserved water rights doctrine prior to or when the properties were acquired by the U.S. Fish and Wildlife Service.

The water use listed in Section 4, "Wildlife Refuge Management," may include Wildlife Use, Aquatic Life, Wetland Enhancement, Riparian Area Enhancement, Fire Protection, Irrigation, Stock Watering, Recreation Use, Construction, Flood Control, Reservoir Maintenance, or Dust Control.
