Dear Mr. Burnison:

According to the terms of your permit No. G-2311, for appropriation of 0.08 cubic foot per second from a well for irrigation of 6.0 acres, complete application of water was to have been made by October 1, 1965.

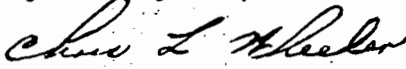

Complete application of water means the application of water to beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of October 7, 1965.

ORS 537.260 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the State Engineer proof of completion of the appropriation as required by ORS 537.230 and 537.250, the State Engineer may, after 60 days' notice by registered mail, order the cancelation of the permit."\*\*\*\*

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, the permit(s) may be canceled without further notice.

If for any reason you are no longer interested in the project described by the permit, we would appreciate it if you would so advise. If the property involved has changed hands and any part of the project has been completed, you should immediately assign the permit to the new owner and advise us of his name and address. An assignment form will be furnished upon request.

Very truly yours,

Dear Mr. Burnison:

This will acknowledge receipt of your letter received January 24, 1966, in regards to permit number G-2311.

The time limits for completion of construction work and complete application of water have expired on your permit; and if you have not obtained the necessary facilities and equipment to make proof of completion of construction work by the due date of October 1, 1964, the permit would not be valid.

We will proceed towards cancelation of this permit. This will not prejudice any future applications. If you decide to proceed with this project in the future, you can file a new application and use the application map on file.

Very truly yours,

CHRIS L. WHEELER
