MICHAEL ZWART

Subject: APPLICATION G-13758 & 59, MCKIBBEN FAMILY LIMITED PARTNERSHIP

These applications propose to use 2.0 cfs of groundwater for supplemental frost and temperature control from up to three wells (G-13758) and 0.75 cfs for supplemental irrigation of 24 acres from one well (G-13759). The three wells are unnumbered in the applications, so I assigned them numbers 1-3 (see maps). The well proposed for G-13759 is #3. The wells are 140, 90, and 235 feet deep, respectively, and produce water from an unconfined to semiconfined aquifer developed in gravel and cemented gravel. Well #3 is about 1500 feet from the natural headwaters of Dugger Creek. Wells #1 & #2 are about 3000 feet from this point. Static water levels indicate that the head in this aquifer may be somewhat lower than the creek. Hydraulic connection appears to be possible, but is likely poor between the water-bearing zones of well #3 and the creek. Water-bearing zones and well construction are not well documented for wells #1 and #2, being constructed in 1916.

It is concluded that the wells will not have the potential for substantial interference with Dugger Creek. Permit condition 4I is recommended due to the close proximity of senior groundwater rights.

SUBJECT:	Application G-13759  Reviewer's Name
1. PER	DWATER/SURFACE WATER CONSIDERATIONS  THE Basin rules, one or more of the proposed POA's is/is not within feet/mile of a surface water source () and taps a groundwater source raulically connected to the surface water.
a b <del>_</del>	ED UPON 0AR 690-09 currently in effect, I have determined that the proposed groundwater use will, or have the potential for substantial interference with the nearest will not surface water source, namely
3. BAS. a b	DWATER AVAILABILITY CONSIDERATIONS  ED UPON available data, I have determined that groundwater for the proposed use  _will, or likely be available in the amounts requested without injury to prior rights  _will not and/or within the capacity of the resource; or  _will if properly conditioned, avoid injury to existing rights or to the groundwater resource:  i. \( \subseteq \) The permit should contain condition \( \#(s) \) \( \frac{\psi \infty}{\psi} \);  iiThe permit should contain special condition(s) as indicated in "Remarks" below;  iiiThe permit should be conditioned as indicated in item 4 below; or
b c d	THE PERMIT should allow groundwater production from no deeper thanft. below land surface; The permit should allow groundwater production from no shallower thanft. below land surface; The permit should allow groundwater production only from the groundwater reservoir between approximatelyft. andft. below land surface; Well reconstruction is necessary to accomplish one or more of the above conditions. One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.
REMARI	KS:

(Well Construction Considerations on Reverse Side)

THE WELL which is the point of appropriation for this application does not meet current well 5. construction standards based upon: a.\_\_\_\_review of the well log; b.\_\_\_\_field inspection by \_\_\_\_\_ c.\_\_\_report of CWRE \_\_\_\_\_\_\_ d.\_\_\_other: (specify) \_\_\_\_\_ THE WELL construction deficiency: 6. a.\_\_\_\_constitutes a health threat under Division 200 rules; b.\_\_\_\_commingles water from more than one groundwater reservoir; c.\_\_\_\_permits the loss of artesian head; d.\_\_\_permits the de-watering of one or more groundwater reservoirs; e. other: (specify) 7. THE WELL construction deficiency is described as follows: a.\_\_\_\_was, or b.\_\_\_\_was not 8. THE WELL constructed according to the standards in effect at the time of original construction or most recent modification. c. I don't know if it met standards at the time of construction. RECOMMENDATION: A.\_\_\_I recommend including the following condition in the permit: "No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department." B.\_\_\_I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department. C.\_\_\_\_REFER this review to Enforcement Section for concurrence. THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit (Signature) I do not concur in G/H's recommendation A or B above relating to conditioning or withholding the permit for the following reasons:\_\_\_\_\_ (Signature)

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)
