FROM:		Groundwater/Hydrology Section Man alloton
		Application G- 13787 Reviewer's Name
<u>GRC</u> 1.	PER	OWATER/SURFACE WATER CONSIDERATIONS THE Basin rules, one or more of the proposed POA's is/is not within feet/mile of a surface water source () and taps a groundwater source
	hydr	aulically connected to the surface water.
2.	a.	ED UPON 0AR 690-09 currently in effect, I have determined that the proposed groundwater us will, or have the potential for substantial interference with the nearest will not surface water source, namely; or will if properly conditioned, adequately protect the surface water from interference: i. The permit should contain condition #(s) 713_;
	đ.	iiThe permit should contain special condition(s) as indicated in "Remarks" below; iiiThe permit should be conditioned as indicated in item 4 below; or will, with well reconstruction, adequately protect the surface from substantial interference.
		OWATER AVAILABILITY CONSIDERATIONS
3.	a b	ED UPON available data, I have determined that groundwater for the proposed use will, or likely be available in the amounts requested without injury to prior rights will not and/or within the capacity of the resource; or will if properly conditioned, avoid injury to existing rights or to the groundwater resource: i. The permit should contain condition #(s) 7E.; ii. The permit should contain special condition(s) as indicated in "Remarks" below; iii. The permit should be conditioned as indicated in item 4 below; or
4.		_THE PERMIT should allow groundwater production from no deeper thanft. below land surface;
		_The permit should allow groundwater production from no shallower thanft. below land surface;
		_The permit should allow groundwater production only from theft. below land surface;
		_Well reconstruction is necessary to accomplish one or more of the above conditions. _One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.
REI	MARI	KS:

(Well Construction Considerations on Reverse Side)

5.	THE WELL which is the point of appropriation for this application does not meet current well
	construction standards based upon:
	areview of the well log;
	bfield inspection by
	creport of CWRE
	dother: (specify)
6.	THE WELL construction deficiency:
	aconstitutes a health threat under Division 200 rules;
	bcommingles water from more than one groundwater reservoir;
	cpermits the loss of artesian head;
	dpermits the de-watering of one or more groundwater reservoirs; eother: (specify)
	eother. (spechy)
7.	THE MELL construction deficiency is described as follows:
7.	THE WELL construction deficiency is described as follows:
	·
8.	THE WELL awas, or constructed according to the standards in effect at the time of bwas not original construction or most recent modification. cI don't know if it met standards at the time of construction.
REC	COMMENDATION:
A	I recommend including the following condition in the permit:
	"No water may be appropriated under terms of this permit until the well(s) has been repaired
	to conform to current well construction standards and proof of such repair is filed with the
-	Enforcement Section of the Water Resources Department."
в	I recommend withholding issuance of the permit until evidence of well reconstruction is filed
C	with the Enforcement Section of the Water Resources Department.
<u> </u>	KENER this leview to Enforcement Section for concurrence.
	THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL
I co	oncur in G/H's recommendation A or B above relating to conditioning or withholding the permit
	(Signature)
I de	o not concur in G/H's recommendation A or B above relating to conditioning or withholding the mit for the following reasons:
