Superseding)	
TO: FROM SUBJE	Water Rights Section Groundwater/Hydrology Section Marc a Norton Reviewer's Name
1.]	INDWATER/SURFACE WATER CONSIDERATIONS PER THE Basin rules, one or more of the proposed POA's is/is not within feet/mile of a surface water source () and taps a groundwater source hydraulically connected to the surface water.
	BASED UPON 0AR 690-09 currently in effect, I have determined that the proposed groundwater us awill, orhave the potential for substantial interference with the nearest will notwill interference with the nearest will if properly conditioned, adequately protect the surface water from interference: iThe permit should contain condition #(s); iiThe permit should contain special condition(s) as indicated in "Remarks" below; iiiThe permit should be conditioned as indicated in item 4 below; or d. will, with well reconstruction, adequately protect the surface from substantial interference.
3. 1 8 1	INDWATER AVAILABILITY CONSIDERATIONS BASED UPON available data, I have determined that groundwater for the proposed use awill, or likely be available in the amounts requested without injury to prior rights bwill not and/or within the capacity of the resource; or bwill if properly conditioned, avoid injury to existing rights or to the groundwater resource: iThe permit should contain condition #(s); iiiThe permit should contain special condition(s) as indicated in "Remarks" below; iiiThe permit should be conditioned as indicated in item 4 below; or
4. a	 THE PERMIT should allow groundwater production from no deeper thanft. below land surface; The permit should allow groundwater production from no shallower thanft. below land surface; The permit should allow groundwater production only from the

- c.____The permit should allow groundwater production only from the______ groundwater reservoir between approximately _____ft. and _____ft. below land surface;
- d.___Well reconstruction is necessary to accomplish one or more of the above conditions.
- e.___One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS: This supercedes the 2/25/96 Review-See 6 12203.

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)

- 5. THE WELL which is the point of appropriation for this application does not meet current well construction standards based upon:
 - a.____review of the well log; b.____field inspection by _____; c.____report of CWRE _____; d.___other: (specify) _____
- 6. THE WELL construction deficiency:
 - a.____constitutes a health threat under Division 200 rules;
 - b.____commingles water from more than one groundwater reservoir;
 - c.____permits the loss of artesian head;
 - d.____permits the de-watering of one or more groundwater reservoirs;

e.____other: (specify) ______

7. THE WELL construction deficiency is described as follows:

8. THE WELL a.____was, or constructed according to the standards in effect at the time of b.____was not original construction or most recent modification. c.____I don't know if it met standards at the time of construction.

RECOMMENDATION:

A.____I recommend including the following condition in the permit:

"No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department."

- B.____I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department.
- C.____REFER this review to Enforcement Section for concurrence.

THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL

I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit
