Tri-City Redy Mix
Route 1, Box 237
Myrtle Creek, Oregon 97457

Gentlemen:

On June 5, 1970, a representative of this office inspected the property in connection with the incomplete water right represented by Permit number 30365. This permit describes the appropriation of 1.34 cubic feet per second of water from the South Umpqua River for washing of aggregate.

Our field engineer contacted Mrs. Doud, and according to her information, the gravel plant has been moved from the location of this permit and there is no intention to use it at this site again. Mrs. Doud signed an authorization to cancel the permit. This letter is being sent to you so that we may clear our records.

According to the terms of the permit, complete application of water to beneficial use was to have been made by October 1, 1968. According to the field engineer's report, proof of appropriation of water has not been made.

In accordance with the provisions of ORS 537.260, you are hereby notified that unless we receive proof that beneficial use of water was made prior to October 1, 1968, and has been in use since that date, within 60 days from the date of this letter, your permit will be canceled without further notice.

Very truly yours,

Myron V. Bish
Assistant

40964

June 15, 1965

Tri-City Redy Mix
Route 1, Box 237
Myrtle Creek, Oregon

Gentlemen:

The permit approving your application No. 40964 for appropriation of water from the South Umpqua River for washing aggregate contains the clause:

"This permit is issued subject to the maintenance and use of adequate treatment facilities to remove the sediment before returning the water to the stream".

The information available to us indicates that the proposed method of removing sediment is not adequate; therefore it will be necessary to add to the treatment facilities to remove sediment before appropriation of water can be made.

The permit approving your application has been issued and the appropriation of 1.34 cubic feet per second of water from the South Umpqua River is authorized subject to maintenance of adequate treatment facilities to remove the sediment.

Very truly yours,

CHRIS L. WHEELER
State Engineer

卷之四

Talked to Jack B. [unclear]

According to Mr. Dodd, ~~the~~ ~~that~~ all the

children and adults for approx 2-3 more years
before they run out of ground at this location
and Dodd said he would continue working as long as
possible. The weather & aggregate situation are moving

9-27-67
[Signature]

There is report report for washer only
expect to get it in one more year

MRS - 6-24-67
