Water Resources Department

MEMO

\_\_\_\_\_\_, 2001

TO	Application G- <u>14908</u> GW: <u>K. Lite</u>							
FROM								
SUBJECT	Scenic Waterway Interference Evaluation							
Yes	The source of appropriation is within or above a Scenic Waterway							
Yes No	Use the Scenic Waterway condition (Condition 7J).							

PREPONDERANCE OF EVIDENCE FINDING: (Check box only if statement is true)

X

At this time the Department is unable to find that there is a preponderance of evidence that the proposed use of ground water will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife.

FLOW REDUCTION: (To be filled out only if <u>Preponderance of Evidence</u> box is not checked)

Exercise of this permit is calculated to reduce monthly flows in \_\_\_\_\_\_ Scenic Waterway by the following amounts expressed as a proportion of the consumptive use by which surface water flow is reduced.

SUBJECT: Application G- 14908

## GROUND WATER/SURFACE WATER CONSIDERATIONS

PER THE \_\_\_\_\_ Basin rules, one or more of the proposed POA's is/is not within 1. feet/mile of a surface water source (\_\_\_\_\_\_) and taps a ground water source hydraulically connected to the surface water.

K.Lit

- 2. BASED UPON 0AR 690-09 currently in effect, I have determined that the proposed ground water use a. Xwill, or have the potential for substantial interference with the nearest
  - b.\_\_\_will not
  - b. \_\_\_\_will not surface water source, namely <u>Descludes</u> <u>Crooked</u> Ror c. \_\_\_\_will if properly conditioned, adequately protect the surface water from interference:
    - i.
- The permit should contain condition #(s)\_\_\_\_; The permit should contain special condition(s) as indicated in "Remarks" below;
  - The permit should be conditioned as indicated in item 4 below; or iii.
  - d. will, with well reconstruction, adequately protect the surface from substantial interference.

## GROUND WATER AVAILABILITY CONSIDERATIONS 3.

- BASED UPON available data, I have determined that ground water for the proposed use
  - a. will, or likely be available in the amounts requested without injury to prior rights
  - will not b.\_\_ and/or within the capacity of the resource; or
  - c. X will if properly conditioned, avoid injury to existing rights or to the ground water resource:

    - i. The permit should contain condition #(s) 7  $\beta$ ; ii. The permit should contain special condition(s) as indicated in "Remarks" below;
    - iii. The permit should be conditioned as indicated in item 4 below; or
- 4. a. THE PERMIT should allow ground water production from no deeper than ft. below land surface:
  - b. The permit should allow ground water production from no shallower than ft. below land surface:
  - c. The permit should allow ground water production only from the ground water reservoir between approximately \_\_\_\_\_\_ ft. and \_\_\_\_\_\_ ft. below land surface; d. \_\_\_\_\_\_ Well reconstruction is necessary to accomplish one or more of the above conditions.
  - e. One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS:

(Well Construction Considerations on Reverse Side)
