Form C (690-4471)

IMPORTANT: This form is a notice to the Water Resources Director that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the Water Resources Department until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.

Fill out, detach and mail to the Water Resources Department, Salem, OR 97310, when all of the water has been applied.

I did not receive the field form or report.

Mr. Rich stated that the land has been sold for commercial development and the well won't be used for irrigation as the map shows.

Enclosed is the field form, report, map, and proof form and note from Mr. Rich regarding permit G-5502 issued to Samuel Rich.

You will note from Bob's report he spoke with Sam's son who reported minimal use of the well.

Now Sam says he never used the well because he never received confirmation to use water. He did submit a signed C form, so I suspect he just forgot (permit was issued March 21, 1975). He said all use is from Wolf Creek Water District.

If use of the well is abandoned as a source of irrigation water, obtain Mr. Rich's signature on cancel autho form. If the well is still in use, maybe he will sign the proof after you review the situation with him.

Thanks.

PROOF OF APPROPRIATION OF WATER

SAMUEL J. RICH

of 1860 NW 216th Ave., Hillsboro, State of OR 97123,
has applied beneficially the waters of
a well

a tributary of Rock Creek (Tualatin River) for the purpose of
irrigation of 1.5 acres

under Permit No. G-5502 and that the use of said waters has been completed under the terms of said
permit; that the priority of the right dates from
December 16, 1971

that the amount of water for the purposes aforesaid, has been actually beneficially used in the amount of

0.02 cubic foot per second

or its equivalent in case of rotation, measured at the point of diversion from the well. The well is
located in the NE 1/4 SW 1/4, as projected within Butler DLC
48, Section 26, T1N, R2W, WM; 540 feet North and 3270 feet West from the NE
corner, Butler DLC 48.

The amount of water used for irrigation, together with the amount secured under any other right
existing for the same lands, shall be limited to one-eightieth of one cubic foot per second
per acre, or its equivalent for each acre irrigated and shall be
further limited to a diversion of not to exceed 2 1/2 acre-feet per acre for
each acre irrigated during the irrigation season of each year

and shall
conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

File No. G-5688

Dear Mr. Rich:

According to the terms of your permit number G-5502, which is for the appropriation of 0.09 cfs from a well (Rock Creek) for the irrigation of 14.5 acres,

complete application of water was to have been made by October 1, 1977.

Complete application of water means the application of water to a beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of October 6, 1977.

ORS 537.260 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the Water Resources Director proof of completion of the appropriation as required by ORS 537.230 and 537.250, the Water Resources Director may, after 60 days' notice by registered mail, order the cancellation of the permit..."

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, the permit(s) may be canceled without further notice.

If, for any reason, you are no longer interested in the project described by the permit, we would appreciate it if you would so advise. If the property involved has changed hands and any part of the project has been completed, you should immediately assign the permit to the new owner and advise us of his name and address. An assignment form will be furnished upon request.

Sincerely,
James E. Sexson, Director

Dear Mr. Rich:

This will acknowledge your application for a permit to appropriate 40 gallons of water per minute from a well for the irrigation of 1/4 acres, a reproducible map, two prints, a legal description, and the fee of \$20 for which our receipt number 26504 is enclosed. The application has been filed and numbered G-5688.

In Item Number 4 of the application, you have described the well as being located south and west from the northeast corner of the Butler Donation Land Claim Number 48; however, your map does not show this and the legal description submitted to support your application tends to describe the lands as shown on your map. If your map is correct, I will amend this item to agree with the map, with your written authorization.

It is also necessary to show, in Item Number 12, the location of the area to be irrigated. With your written approval, I will add the correct forty-acre tracts to your application based on the information shown on the map and it will not be necessary to return the application.

Upon receipt of your written authorization to amend the application, proper action will be taken.

Very truly yours,
