

INFO: RICHARD WILKINSON

Mr. Wilkinson said that he has used the additional div. pt. but has disconnected the power for the pump & does not intend to use it anymore.

There is a well upstream along the Cr. & he plans on pumping from the Cr. into the same mainline as the well. & when Cr. goes dry he will use the well.

He couldn't ^{afford} the minimum power cost pumping from the Cr. above as is moving the div. pt. to the vic. of the well. _{as the Cr. dries up too early,}

This new div isn't in yet.

Told him he should apply on it.

This Transfer should be cancelled.
