RE: Application R-87950

Dear Applicant,

I am writing this letter in reference to Application R-87950 in the name of Jensen Holdings LLC. Upon review of fish use maps, the reservoir site located on an unnamed tributary that flows into Yamhill Creek, Oregon Department of Fish and Wildlife (ODFW) have determined that native migratory fish are not currently, nor were historically present in the channel reach where the reservoir is located. Therefore, fish passage or diversion screening at the reservoirs for Application R-87950 are not required. However, if fish are stocked in the reservoirs ODFW approved screening will be required at that time to ensure fish stay in the reservoir.

Please let me know if you have any questions or need any further clarification.

Sincerely,

Ben Walczak
Assistant District Fish Biologist
North Willamette Watershed District
