RE: Application R-87985 and S-87986

Mr. Urstadt,

I am writing this letter in reference to Applications R-87985 and S-87986 in the name of Hollis Land and Timber LLC. During a site visit on February 3, 2014, Tom Murtagh, District Fish Biologist, inspected the reservoir site on an unnamed tributary that flows into Bryan Creek. The reservoir site is the point of diversion in review for fish passage and diversion screening. Oregon Department of Fish and Wildlife (ODFW) have determined that native migratory fish are not currently, nor were historically present in the channel reach where the reservoir is located. Therefore, fish passage or diversion screening at the reservoir for Application R-87985 and S-87986 is not required. However, if fish are stocked in the reservoir ODFW approved screening will be required at that time to ensure fish stay in the reservoir.

Please let me know if you have any questions or need any further clarification.

Sincerely,

Ben Walczak  
Assistant District Fish Biologist  
North Willamette Watershed District
