

Oregon Water Resources Department
Water Rights Division

Water Rights Certificate
Number 73477

Reservoir Mitigation Order

Application History

A reservoir was constructed prior to January 1, 1995. As evidence of the right to store water, pursuant to ORS 537.407(1), an application was submitted.

Pursuant to ORS 537.407(3)(b) the Department has received information demonstrating that the reservoir results in injury to an existing water right.

ORS 537.407(6) specifies that "...the director shall require the owner of the reservoir to take appropriate action to mitigate injury to existing water rights or impact to the existing fishery resource."

Therefore, the Department has determined that with the following additional mitigation condition(s), the injury to existing water rights and/or detrimental impact to existing fishery resources, described above, will be mitigated.

Order

If required by the Watermaster, the water user shall install and maintain a headgate , an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Watermaster (Department).

The pond may be filled one time only per year. No diversion of water to storage can occur during times all water rights are not met on the on West Bridge Creek and/or Bridge Creek.

Therefore, pursuant to ORS 537.407, the use evidenced by certificate 73477 shall be allowed to continue if the injury/negative impact of the reservoir is mitigated as described above.

DATED January 16, 1998

Martha O. Pagel
Director
